Contractor and any Contractor Parties performing services shall be competent to perform those services.

3. **Term.** The term for performance of the Services shall begin on **June 23, 2022**, and shall end on **June 23, 2023** (“Term”), except as otherwise stated in Section 4 below, and Contractor shall complete the Services within the Term. There shall be no extension of the Term without an amendment signed by all Parties and approved by the District’s governing board. Written notice by the District Superintendent or designee shall be sufficient to stop further performance of the Services by Contractor or the Contractor Parties. In the event of early termination, Contractor shall be paid for satisfactory Services performed to the date of termination. Upon payment by District, District shall be under no further obligation to Contractor, monetarily or otherwise, and District may proceed with the work in any manner District deems proper.

Such termination shall be effective immediately upon Contractor’s receipt of the notice.

5. **Payment of Fees for Services.** District agrees to pay Contractor based on the hourly rates listed in *Exhibit B* for Services satisfactorily performed. Contractor shall not increase these hourly rates over the course of this Agreement. Total fees paid by District to Contractor for Services under the Agreement

ACC Project No.: 79670

Scope of Work Description

ACC is proposing to conduct in situ Soil Sampling at Burckhalter Elementary School in Oakland, California. Proposed scope of work includes assessing shallow soils for lead and arsenic, and soil waste characterization prior to the proposed development of new athletic courts and play structure.

ACC proposes advancement of up to six (6) soil borings to approximately 1.0 ft bgs, or refusal, via a hand auger. ACC will subcontract a concrete corer to core 6"-8" diameter holes through the existing asphalt pavement at six locations. Samples will be collected from the barrel of the hand auger using stainless steel sleeves subsequently capped with plastic sheeting and tight-fitting plastic caps and in new ziploc bags. Samples will be stored on ice and delivered to a state-certified laboratory following standard chain-of-custody protocol. Sampling equipment will be decontaminated between sampling locations. Soil borings will be back filled with soil cuttings and fast-setting cement. ACC assumes the soil sampling can be completed during normal business hours.

Samples will be analyzed discretely for lead and arsenic by EPA analytical method 6010. Four samples will additionally be composited by the laboratory into one 4:1 sample and analyzed as a single sample for analyses typical of landfill disposal requirements. Additional analytical methods include CAM 17 Metals by method 6010; total petroleum hydrocarbons as gasoline, diesel, and motor oil by method 8015; VOCs by 8260; SVOCs by 8270; PCBs by 8082; Organochlorine pesticides by 8081, and additional waste criteria (STLC/TCLP), as needed. Samples will be analyzed on a standard turn around time (5-7 business days). Laboratory turnaround times cannot be guaranteed by ACC.

ACC will prepare a written report signed by a Professional Geologist that discusses soil sampling procedures, analytical results, and recommendations and includes a sample location map and analytical results tables.

ACC's understanding is soil will be off-hauled to a landfill pending characterization. Proposed costs do not include assessment of baserock. Proposed work does not include costs for reviewing/signing waste profiles; interaction with the landfills/haulers; or additional hours for consulting beyond the scope of this proposal.

A 10% lump sum contingency amount is included in this proposal as a line item and is included in the total cost.
