RESOLUTION NO. 2122-0213

**RESOLUTION OF THE BOARD OF EDUCATION OF THE OAKLAND UNIFIED
SCHOOL DISTRICT DECLARING THE FUTILITY OF PUBLIC BIDDING FOR
THE FIRE AND LIFE SAFETY SYSTEM TESTING & INSPECTION
MAINTENANCE WORK AT MULTIPLE SITES AND APPROVING A
CONTRACT FOR THAT WORK**

WHEREAS, the Oakland Unified School District (“District”) would like to award a contract to Johnson Controls Fire Protection, LP (“Contractor”) for maintaining Contractor’s fire equipment, which includes testing, inspection, and potential repairs of the fire alarm, fire sprinkler, fire standpipe, fire hoses, fire hydrants, fire pump, emergency lights, and exit lights at multiple school sites (“Work”);

WHEREAS, Contractor has provided a quote for the Work and is able to complete the Work for One Million, One Hundred Fourteen Thousand, Two Hundred and NO/100 Dollars (\$1,114,200.00);

WHEREAS, the District’s Deputy Chief of Facilities Planning and Management and District staff believe that the Contractor’s quoted price to perform the Work is reasonable;

WHEREAS, competitive bidding is not required because there is no advantage to competitive bidding due to Contractor being the only company that has the ability to maintain the fire alarm systems since they are manufactured by the Contractor and the original installation contract does not permit any other entity to perform the Work;

WHEREAS, the Work must be provided by the Contractor to ensure continuity of quality and appearance of the work since Contractor has the sole expertise to perform the Work, and Contractor is familiar with the District’s needs and is acquainted with the District’s sites;

WHEREAS, California law provides that “Where competitive proposals work an incongruity and are unavailing as affecting the final result or where they do not produce any advantage . . . the statute requiring competitive bidding does not apply” (*Hiller v. City of Los Angeles* (1961) 197 Cal.App.2d 685, 694), and that public entities need not comply with competitive bidding processes where to do so would be impractical or futile and would not serve the purposes of competitive bidding (*Los Angeles Dredging Company v. City of Long Beach* (1930) 210 Cal. 348; *Graydon v. Pasadena Redevelopment Agency* (1980) 104 Cal.App.3d 631; and *Taylor Bus Service, Inc. v. San Diego Bd. of Education* (1987) 195 Cal.App.3d 1331);

WHEREAS, competitively bidding the Work would not affect the final result to the District except to further increase the cost of the Work and delay completion of the Work, and it would not produce an advantage to the District because only Contractor can perform the Work;

NOW THEREFORE, the Board of Education of the Oakland Unified School District hereby resolves, determines, and finds the following:

1. That the foregoing recitals are true.
2. For the reasons stated above, a competitive public bidding process for the Work would be unavailing, would not produce an advantage to the public or the District, and would not serve the goals of the competitive bid process in that it would not obtain the best economic result for the public, on each of the following sufficient and independent grounds.
3. Based on the foregoing, it would be incongruous, futile, and unavailing to publicly bid the Work.
4. Accordingly, District's Board of Education hereby awards a contract to Contractor to perform the Work, which contract is attached hereto as Exhibit "1," without further advertising for or inviting of bids.

The foregoing Resolution was adopted by the Board of Education of the Oakland Unified School District at a regularly scheduled meeting on the 11th day of May 2022, by the following vote:

In addition to any other information requested, Contractor shall submit, prior to approval of any change order, its request for a time extension (if any), as well as all information necessary to substantiate Contractor’s belief that such change will delay the completion of the Work. 7. **TRENCH SHORING:** If this Contract is in excess of \$25,000 and is for the excavation of any trench deeper than five (5) feet, Contractor must submit and obtain District's approval and acceptance, in advance of excavation, of a detailed plan showing the design of shoring, bracing, sloping, or other provisions to be made for worker protection from the hazard of caving ground during the excavation of such trench or trenches. If the plan varies from the shoring system standards, the plan shall be prepared by a registered civil or structural engineer.
8. **EXCAVATIONS OVER FOUR FEET:** If this Contract includes excavations over four (4) feet, Contractor shall promptly, and before the following conditions are disturbed, notify the District, in writing, of any: (1) Material that the Contractor believes may be hazardous waste, as defined in Section 25117 of the Health and Safety Code, that is required to be removed to a Class I, Class II, or Class III disposal site in accordance with provisions of existing law; (2) Subsurface or latent physical conditions at the Site(s) differing from those indicated; or (3) Unknown physical conditions at the Site(s) of any unusual nature, different materially from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract. The District shall promptly investigate the conditions, and if it finds that the conditions do materially so differ, or do involve hazardous waste, and cause a decrease or increase in the Contractor's cost of, or the time required for, performance of any part of the Work shall issue a change order under the procedures described in the Contract. In the event that a dispute arises between the District and the Contractor regarding whether the conditions materially differ, or involve hazardous waste, or cause a decrease or increase in the Contractor's cost of, or time required for, performance of any part of the work, the Contractor shall not be excused from any scheduled completion date provided for by the Contract, but shall proceed with all Work. Contractor shall retain any and all rights provided either by Contract or by law which pertain to the resolution of disputes and protests between the contracting parties.

19. **TIME IS OF THE ESSENCE:** Time is of the essence in the performance of and compliance with each of the provisions and conditions of this Contract.
20. **OCCUPANCY:** District reserves the right to occupy buildings at any time before formal Contract completion and such occupancy shall not constitute final acceptance or approval of any part of the Work covered by this Contract, nor shall such occupancy extend the date specified for completion of the Work.
21. **FORCE MAJEURE CLAUSE:** Contractor shall be excused from performance hereunder during the time and to the extent that it is prevented from obtaining delivery, or performing by act of God, fire, strike, loss, or shortage of transportation facilities, lock-out, commandeering of materials, product, plant, or facilities by the government, when satisfactory evidence thereof is presented to the District, provided that it is satisfactorily established that the non-performance is not due to the fault or neglect of Contractor.
22. **INDEMNIFICATION / HOLD HARMLESS CLAUSE:** To the furthest extent permitted by California law, Contractor shall defend, indemnify, and hold harmless the District, their agents, representatives, officers, consultants, employees, and volunteers (the “indemnified parties”) from any and all demands, losses, liabilities, claims, suits, and actions (the “claims”) of any kind, nature, and description, including, but not limited to, attorneys’ fees and costs, directly or indirectly arising from personal or bodily injuries, death, property damage, or otherwise arising out of, connected with, or resulting from the performance of this Contract except to the extent that the claims are caused by the negligence or willful misconduct of the indemnified parties. The District shall have the right to accept or reject any legal representation that Contractor proposes to defend the District.
23. **PAYMENT:** For Required Work (see *Exhibit A*), Contractor will be paid the lump sum price stated in *Exhibit B*. For authorized Potential Work (see *Exhibit A*), Contractor shall be paid based on the specific price in *Exhibit B* for that type of Potential Work or, in the absence of a specific price in *Exhibit B*, based on the hourly rates in *Exhibit B* that would apply to that type of Potential Work. However, to the extent that payment for the authorized Potential Work would exceed the amount of the contract price allocated to Potential Work during the contract term, the authorized Potential Work

may not be performed until a change order or amendment to increase the contract price is signed by the Contractor and approved by the District's governing board. By the 7th day of each month, Contractor shall submit an application for payment for the Required Work performed during the previous calendar month, and the amount requested to be paid shall be calculated as described above. The Application for Payment must include evidence of Contractor's performance of Work and compliance with the Contract Documents, including labor and apprenticeship requirements. The District may deduct from any payment an amount necessary to protect the District from loss because of: (1) any sums expended by the District in performing any of Contractor's obligations under the Contract which Contractor has failed to perform or has performed inadequately; (2) defective Work not remedied; (3) stop payment notices as allowed by state law; (4) reasonable doubt that the Work can be completed for the unpaid balance of the Total Contract price or by the scheduled completion date; (5) unsatisfactory prosecution of the Work by Contractor; (6) unauthorized deviations from the Contract; (7) failure of the Contractor to maintain or submit on a timely basis proper and sufficient documentation as required by the Contract or by District during the prosecution of the Work; (8) erroneous or false estimates by the Contractor of the value of the Work performed; (9) any sums representing expenses, losses, or damages, as determined by the District, incurred by the District for which Contractor is liable under the Contract; and (10) any other sums which the District is entitled to recover from Contractor under the terms of the Contract or pursuant to state law, including section 1727 of the California Labor Code. The failure by the District to deduct any of these sums from a progress payment shall not constitute a waiver of the District's right to such sums. The District shall pay any undisputed amounts within 30 days of submittal of the application for payment.

24. **PERMITS AND LICENSES:** Contractor and all of its employees, agents, and subcontractors shall secure and maintain in force, at Contractor's sole cost and expense, all licenses and permits as are required by law, in connection with the furnishing of materials, supplies, or Services herein listed.
25. **INDEPENDENT CONTRACTOR STATUS:** While engaged in carrying out the Services of this Contract, the Contractor is an independent contractor, and not an officer, employee, agent, partner, or joint venture of the District. Contractor shall be solely responsible for its own Worker's Compensation insurance, taxes, and other similar charges or obligations. Contractor shall be liable for its own actions, including its negligence or gross negligence, and shall be liable for the acts, omissions, or errors of its agents or employees.
26. **ANTI-DISCRIMINATION:** It is the policy of the District that in connection with all work performed under contracts there be no discrimination against any employee engaged in the work because of race, color, ancestry, national origin, or religious creed, and therefore the Contractor agrees to comply with applicable Federal and California laws including, but not limited to the California Fair Employment and Housing Act beginning with Government Code Section 12900, and Labor Code Section 1735. In addition, the Contractor agrees to require like compliance by all its subcontractor(s).

All workmanship and merchandise must be warranted to be in compliance with applicable California energy, conservation, environmental, and educational standards.
28. **CONFIDENTIALITY:** Contractor shall maintain the confidentiality of all information, documents, programs, procedures, and all other items that Contractor encounters while performing the Contractor's Services to the extent allowed by law. This requirement shall be ongoing and shall

survive the expiration or termination of this Contract and specifically includes all student, parent, and disciplinary information.

29. **COMPLIANCE WITH LAWS:** Contractor shall give all notices and comply with all laws, ordinance, rules and regulations bearing on conduct of the Work as indicated or specified. LEAD-BASED MATERIALS CERTIFICATION

Fire and Life Safety System Testing & Inspection Maintenance Services

PROJECT/CONTRACT NO. _____ between Oakland Unified School District (“District”) and Johnson Controls Fire Protection LP (“Contractor” or “Bidder”) (“Contract” or “Project”).

This certification provides notice to the Contractor that:

- (1) Contractor's work may disturb lead-containing building materials.
- (2) Contractor shall notify the District if any work may result in the disturbance of lead-containing building materials.
- (3) Contractor shall comply with the Renovation, Repair and Painting Rule, if lead-based paint is disturbed in a six-square-foot or greater area indoors or a 20-square-foot or greater area outdoors.

1. Lead as a Health Hazard

Lead poisoning is recognized as a serious environmental health hazard facing children today. Even at low levels of exposure, much lower than previously believed, lead can impair the development of a child's central nervous system, causing learning disabilities, and leading to serious behavioral problems. Lead enters the environment as tiny lead particles and lead dust disburse when paint chips, chinks, peels, wears away over time, or is otherwise disturbed. Ingestion of lead dust is the most common pathway of childhood poisoning; lead dust gets on a child's hands and toys and then into a child's mouth through common hand-to-mouth activity. Exposures may result from construction or remodeling activities that disturb lead paint, from ordinary wear and tear of windows and doors, or from friction on other surfaces.

Ordinary construction and renovation or repainting activities carried out without lead-safe work practices can disturb lead-based paint and create significant hazards. Improper removal practices, such as dry scraping, sanding, or water blasting painted surfaces, are likely to generate high volumes of lead dust.

Because the Contractor and its employees will be providing services for the District, and because the Contractor's work may disturb lead-containing building materials, CONTRACTOR IS HEREBY NOTIFIED of the potential presence of lead-containing materials located within certain buildings utilized by the District. All school buildings built prior to 1978 are presumed to contain some lead-based paint until sampling proves otherwise.

2. Overview of California Law

Education Code section 32240 et seq. is known as the Lead-Safe Schools Protection Act. Under this act, the Department of Health Services is to conduct a sample survey of schools in the State of California for the purpose of developing risk factors to predict lead contamination in public schools. (Ed. Code, § 32241.)

Any school that undertakes any action to abate existing risk factors for lead is required to utilize trained and state-certified contractors, inspectors, and workers. (Ed. Code, § 32243, subd. (b).)

Moreover, lead-based paint, lead plumbing, and solders, or other potential sources of lead

contamination, shall not be utilized in the construction of any new school facility or the modernization or renovation of any existing school facility. (Ed. Code, § 32244.)

Both the Federal Occupational Safety and Health Administration ("Fed/OSHA") and the California Division of Occupational Safety and Health ("Cal/OSHA") have implemented safety orders applicable to all construction work where a contractor's employee may be occupationally exposed to lead.

The OSHA Regulations apply to all construction work where a contractor's employee may be occupationally exposed to lead. The OSHA Regulations contain specific and detailed requirements imposed on contractors subject to those regulations. The OSHA Regulations define construction work as work for construction, alteration, and/or repair, including painting and decorating. Regulated work includes, but is not limited to, the following:

- a. Demolition or salvage of structures where lead or materials containing lead are present;
- b. Removal or encapsulation of materials containing lead;
- c. New construction, alteration, repair, or renovation of structures, substrates, or portions thereof, that contain lead, or materials containing lead;
- d. Installation of products containing lead;
- e. Lead contamination/emergency cleanup;
- f. Transportation, disposal, storage, or containment of lead or materials containing lead on the site or location at which construction activities are performed; and
- g. Maintenance operations associated with the construction activities described in the subsection.

Because it is assumed by the District that all painted surfaces (interior as well as exterior) within the District contain some level of lead, it is imperative that the Contractor, its workers and subcontractors fully and adequately comply with all applicable laws, rules and regulations governing lead-based materials (including title 8, California Code of Regulations, section 1532.1).

Contractor shall notify the District if any Work may result in the disturbance of lead-containing building materials. Any and all Work that may result in the disturbance of lead-containing building materials shall be coordinated through the District. A signed copy of this Certification shall be on file prior to beginning Work on the Project, along with all current insurance certificates.

3. Renovation, Repair and Painting Rule, Section 402(c)(3) of the Toxic Substances Control Act

The EPA requires lead safe work practices to reduce exposure to lead hazards created by renovation, repair and painting activities that disturb lead-based paint. Pursuant to the Renovation, Repair and Painting Rule (RRP), renovations in homes, childcare facilities, and schools built prior to 1978 must be conducted by certified renovations firms, using renovators with training by a EPA-accredited training provider, and fully and adequately complying with all applicable laws, rules and regulations

governing lead-based materials, including those rules and regulations appearing within title 40 of the Code of Federal Regulations as part 745 (40 CFR 745).

The RRP requirements apply to all contractors who disturb lead-based paint in a six-square-foot or greater area indoors or a 20-square-foot or greater area outdoors. If a DPH-certified inspector or risk assessor determines that a home constructed before 1978 is lead-free, the federal certification is not required for anyone working on that particular building.

4. Contractor's Liability

If the Contractor fails to comply with any applicable laws, rules, or regulations, and that failure results in a site or worker contamination, the Contractor will be held solely responsible for all costs involved in any required corrective actions, and shall defend, indemnify, and hold harmless the District, pursuant to the indemnification provisions of the Contract, for all damages and other claims arising therefrom.

If lead disturbance is anticipated in the Work, only persons with appropriate accreditation, registrations, licenses, and training shall conduct this Work.

It shall be the responsibility of the Contractor to properly dispose of any and all waste products, including, but not limited to, paint chips, any collected residue, or any other visual material that may occur from the prepping of any painted surface. It will be the responsibility of the Contractor to provide the proper disposal of any hazardous waste by a certified hazardous waste hauler. This company shall be registered with the Department of Transportation (DOT) and shall be able to issue a current manifest number upon transporting any hazardous material from any school site within the District.

The Contractor shall provide the District with any sample results prior to beginning Work, during the Work, and after the completion of the Work. The District may request to examine, prior to the commencement of the Work, the lead training records of each employee of the Contractor.

THE CONTRACTOR HEREBY ACKNOWLEDGES, UNDER PENALTY OF PERJURY, THAT IT:

1. HAS RECEIVED NOTIFICATION OF POTENTIAL LEAD-BASED MATERIALS ON THE OWNER'S PROPERTY;
2. IS KNOWLEDGEABLE REGARDING AND WILL COMPLY WITH ALL APPLICABLE LAWS, RULES, AND REGULATIONS GOVERNING WORK WITH, AND DISPOSAL, OF LEAD.

THE UNDERSIGNED WARRANTS THAT HE/SHE HAS THE AUTHORITY TO SIGN ON BEHALF OF AND BIND THE CONTRACTOR. THE DISTRICT MAY REQUIRE PROOF OF SUCH AUTHORITY.
