The PARTIES hereby agree as follows:

1. **Term.**

- a. This Agreement shall start on the below date (“Start Date”):

Start Date **(June 6, 2022)**

If no Start Date is entered, then the Start Date shall be the latest of the dates on which each of the PARTIES signed this Agreement.

- b. The work shall be completed no later than the below date (“End Date”):

End Date **(July 8, 2022)**

If no End Date is entered, then the End Date shall be the first June 30 after the Start Date. If the term set forth above would cause the Agreement to exceed the term limits set forth in Education Code section 17596, the Agreement shall instead automatically terminate upon reaching said term limit.

2. **Services.** VENDOR shall provide the services (“Services”) as described in #1A and #1B of **Exhibit A**, attached hereto and incorporated herein by reference. To the extent that there may be a school closure (e.g., due to poor air quality, planned loss of power, COVID-19) or similar event in which school sites and/or District offices may be closed or otherwise inaccessible, VENDOR shall describe in #1B of **Exhibit A** whether and how its services would be able to continue.

3. **Alignment and Evaluation.**

- a. VENDOR agrees to work and communicate with OUSD staff, both formally and informally, to ensure that the Services are aligned with OUSD’s mission and are meeting the needs of students as determined by OUSD.

- b. OUSD may evaluate VENDOR in any manner which is permissible under the law. 4. **Inspection and Approval.** VENDOR agrees that OUSD has the right and agrees to provide OUSD with the opportunity to inspect any and all aspects of the Services performed including, but not limited to, any materials (physical or electronic) produced, created, edited, modified, reviewed, or otherwise used in the preparation, performance, or evaluation of the Services. 5. **Data and Information Requests.** VENDOR shall timely provide OUSD with any data and information OUSD reasonably requests regarding students to whom the Services are provided. VENDOR shall register with and maintain current information within OUSD's Community Partner database unless OUSD communicates to VENDOR in writing otherwise, based on OUSD's determination that the Services are not related to community school outcomes. If and when VENDOR's programs and school site(s) change (either midyear or in subsequent years), VENDOR shall promptly update the information in the database.
6. **Confidentiality and Data Privacy.**
 - a. OUSD may share information with VENDOR pursuant to this Agreement in order to further the purposes thereof. About Nexlore

Nexlore is an onsite enrichment service provider which offers a wide range of STEAM & Fitness solutions.

Nexlore's mission is to foster the joy of learning by helping children find their passion and excel. Our programs are currently offered at hundreds of schools and education centers across the states.

Each of our programs can be applied as a weekly enrichment and/or as a special onsite field trip.

[Here](#) is an intro video to Nexlore programs.

Our Programs

Nexlore Makers Club is an engineering program designed to inspire kids to pursue future in science & technology. Students interact with fun Maker Kits that enhance mechanical, artistic, and engineering skills, while encouraging them to act as inventors in their own right. Participants design their own hydraulic claws, learn to harness energy to power race cars, and experiment with structural design. Plus, students can keep their inventions and proudly share their projects with family and friends. Nexlore Makers Club is fully aligned with Next Generation Science Standards, and reminds kids to always explore, experiment, and create!

Nexlore Robocoding: Coding without a computer? It's the best way to start! Nexlore RoboCoding gives students a hands-on introduction to the fundamentals of both coding and robotics, allowing them to build and execute programs in the real world! With award-winning Cubelets kits, students combine robotic cubes—each with their own unique function—to create machines that can light up, move, and interact with the world around them. Students gain an in-depth understanding of fundamental concepts like inputs, outputs, and processing, and discover how simple building- blocks can come together to perform more and more complex tasks. By working together to solve coding and building challenges, students also reinforce essential life skills like teamwork, communication, and problem-solving.

NEXPLORE

ScienceWiz

Nexplore offers three Science programs - Science Wiz, Nature Watch and Survival Science – which are built upon inquiry, experimentation and play!

Science Wiz: Each Course, students will dive deep into one of the following scientific concepts: electricity, inventions, sound, energy, physics, light, DNA, magnetism and more! Student will receive their very own Science Wiz™ kit to explore fundamental scientific ideas through hands-on play and activities and conduct experiments, many of which they will bring home to share with family and friends.

NEXPLORE

Nature Watch

Nature Watch: makes environmental science come alive with exclusive activity kits! Each activity is centered around a hands-on project designed to engage, enlighten and enliven the learning process. To further promote discovery, most of the kits include a craft so each of the students can “make and take” their project home. Each course covers one of the following topics: Animals, Earth and Space, Plants, Earth Systems, Ecosystems, Weather and Climates. Nature Watch Activity Kits are fully aligned to NGSS, advance 21st century science education and are mapped for STEM extensions

NEXPLORE

Survival Science

Survival Science: Emergencies can happen at any time! While the odds of being lost or stranded outdoors are low, knowing what to do in an emergency is important. As survivalists, students learn exactly what to do in an emergency through the team-based study of real-world survival skills.

From investigating the utility of tools to working through challenging situations, over this course, learners use ingenuity to gain crucial skills such as knot tying, water purification and compass navigation. Bringing STEM to the great outdoors, instructors

love the hands-on, interactive and collaborative curriculum. With each thrilling activity, students gather their senses, put their new skills to the test and conquer every challenge Mother Nature throws their way!

Blocksmith - 3DCoding and Design: Enter Virtual Reality in Style!

Offering a unique opportunity to learn and explore, Discover Blocksmith: 3D Coding & Design comes with 12 one-hour lessons in programming and video game design. Using the Blocksmith Builder software either in the classroom or at home during distance learning, learners create 3D games and scenarios, bringing them to life through an extensive logic system. These creations can be played immediately, or uploaded to Virtual – and Augmented Reality viewing devices. With the Blocksmith Group license, instructors have full domain control to create a secure and distraction-free environment to trade and share experiences. A fun and exciting journey for students and educators alike, Blocksmith allows learning environments of all sizes to create, share and experience the wide world of video game design and virtual reality.

Discover Blocksmith teaches students many skills with real-world applications, including programming concepts (ie. logic, variables, spawners), user interface and user experience design concepts (UI and UX design), video game development, VR and AR applications, 3D modeling and more computer science topics

CAD Camp: A Community Treehouse In The Making. Breathe life into creativity with the help of CAD (Computer-Aided Design), a cutting-edge software utilized in industries ranging from woodworking to aerospace engineering! Using the free-to-use software, SketchUp, CAD Camp enables instructors to easily setup and implement the day's activities with no previous experience required. Program leaders will love the detailed instructions, background info, prep tips, discussion questions, extensions and more, making this one of the most teachable programs ever! Each day, students work through step-by-step projects to gain new skills and attempt stimulating challenges.

These experiences culminate in the building of dream tree houses as learners work together to construct a tree house community! Computer-Aided Design Camp delivers the unforgettable experience of exploring the limitless potential of one of the most widely used engineering tools in the world!

Coding with Scratch: Demystifying Computer Programming

Explore the magic of computer programming with Scratch, a free-to-use software developed by MIT's best brains to encourage young learners to combine creativity with logic! With a cutting-edge application and a series of exciting projects, students uncover the sensational world of coding. Every day, participants expand their skills as they build their very own interactive storyboards and games with audio, video, animated characters and more.

Scratch Camp demystifies computer programming and gets students fired up about creating and coding – they love it!

Claymation: What do Wallace and Gromit, Rudolph the Red-Nosed Reindeer and James and the Giant Peach all have in common?

They're claymation characters who have captivated the world with the magical realities they bring to life! Tap into the incredible practice of stop-motion film production and learn the technique from the ground up. Claymation contains everything students need to create their own, individual movies, including top-quality clay, fun-to-use software, adorable cameras and amazing curriculum that turns anyone into a filmmaker.

Through cumulative daily projects, teamwork, technological literacy and a little bit of movie-making magic, you're sure to win awards at the film festival held the last day of class!

Web Design: This course will teach students the basics of building a website from scratch. They'll learn the two main languages for the web, HTML and CSS, using the CodeCademy platform and then go on to create an informative "How-To" website all on their own. Along the way, the instructor will challenge students with side projects and offline tasks to help them master these concepts.

NEXPLORE

Virtual Reality

Virtual Reality: Students will develop games and experiences in virtual reality with CoSpaces, a software that runs on the browser, smartphone, and Google Cardboard.

For example, they'll be able to make a 3D personal museum with their family history, then strap on VR goggles to walk through the museum.

VR is an emerging technology that may become a household form of entertainment and information this decade.

NEXPLORE

Video Production

Video Production: 1, 2, 3 Action!

Lights, camera, action! As the digital age continues to advance technology, making it more affordable and accessible to the public, it's never been easier to learn the art of filmmaking. Developed around tablets and free editing software to make filmmaking fun and approachable, Video Production empowers students with technical skills in video filming and editing while exploring the historical significance of film and the unique elements of storytelling.

From storyboarding and the rule of thirds to lighting and audio, each activity builds upon the previous day, culminating in a final film project that movie-makers proudly share at the festival held the last day of camp. Participants fuse art and technological literacy together as they bring STEM to the silver screen in this extraordinary introduction to filmmaking!
