ACC Project No. 70966

Date Prepared Tuesday, December 20, 2016

Scope of Work Description

Task 1 - Asbestos and Lead Survey

ACC will conduct an asbestos survey per EPA's NESHAPS/AHERA protocol for the Fire and Intrusion Alarm Installation Project at Burbank School in Oakland, California.

ACC estimates up to 80 asbestos bulk samples will be collected and delivered to an independent laboratory for analysis. PLM samples include up to 3 layers within each sample; additional layers are \$7.00 per sample. Multi-layered materials include floor tile and adhesives, gypsum wallboard, taping compound, texturing compounds, etc. ACC has designed the work using a team comprised of Cal/OSHA certified personnel to perform the asbestos survey work.

ACC will conduct a limited lead bulk sampling screening of representative major paint colors. Samples will be collected by ACC's California Department of Public Health (CDPH) Certified Lead Inspector Assessors and Sampling Technicians. One to three samples of each homogenous suspect lead-containing materials will be collected. Visible color and texture of suspect materials will determine homogeneity. Analysis of lead samples will be by NIOSH 7082 Flame Atomic Absorption (Flame AA). Samples will be delivered to an American Industrial Hygiene Association (AIHA ELLAP) and California Department of Public Health certified laboratory for metals analysis using NIOSH 7082 under a 48- hour turn-around time.

ACC will prepare a report of findings, which will include material descriptions, sample locations, descriptions of locations of materials tested, and quantities of asbestos-containing and lead-containing materials at the subject site.

ACC expects the survey will be completed in one working day and a final report will be issued within 10 days of receipt of the laboratory reports.

Additional conditions and/or exceptions to the proposed scope of services:

- 1) The above pricing is based on ACC performing all tasks in one mobilization and reflects conducting all activities between 7 AM and 6 PM Monday through Friday.
- 2) Costs include all labor, insurance, overhead, transportation, equipment and materials required to perform the work with the exception of a man-lift capable of reaching materials and/or surfaces greater than 12 feet in height. Equipment required to reach these surfaces will be provide by the client or designated client representatives.
- 3) ACC will not be responsible for identifying and/or sampling suspect materials concealed within walls, columns, beneath flooring, above solid ceilings, underground or in any other concealed areas, unless written direction is provided to ACC to perform intrusive and/or destructive sampling on specific building systems, the subject area(s) were unoccupied at the time of the survey, and performing destructive/intrusive sampling does not create unsafe conditions.
- 4) The survey does not include sampling of roof or other exterior materials for asbestos.
- 5) The analyzing laboratory quantifies asbestos concentrations by calibrated visual estimation using standard PLM methodology, with detection of asbestos is material/matrix dependent. Detection of trace asbestos (<1%) may not be reliable or reproducible by PLM and percentage of asbestos weight can not be determined with standard PLM methodology. Confirmation of asbestos concentrations within complex matrices (i.e. plaster, gypsum wallboard/taping/joint compounds, stucco, resilient flooring, roofing) or when asbestos concentrations are 1% or less may warrant additional analysis by PLM point counting, gravimetric reduction or Transmission Electron Microscopy for proper characterization of asbestos-containing materials and/or waste-stream analysis.

Task 2 - Asbestos and Lead Specifications

ACC will prepare technical specifications for asbestos and lead removal and management during the project. Specifications will be developed with coordination from the project team.

Exclusions: ACC has excluded abatement oversight monitoring at this time. A proposal for oversight services can be provided once the scope of hazardous materials has been determined and a project schedule has been published.

All services subject to the Terms & Conditions between ACC and Client as of the date indicated above. Where no specific Terms & Conditions between ACC and Client exist, ACC's 2016 Standard Terms & Conditions apply to all services.
