Scope of Work Description

Task 1 - Initial Sampling Prior to Destructive Investigation

ACC proposes collect representative non-viable fungal spore air sample(s) from the interior of each classroom and hallway in Building B, prior to the destructive investigation. Three samples will be collected from the outside (for comparison purposes). Currently, there are no regulatory guidelines establishing safe levels of microorganisms inside buildings, with the exception that the presence of biological growth of these organisms generally should not be present in properly maintained facilities. Since there are no regulatory guidelines for the many species of microorganisms, industry standard is to compare indoor air samples to outdoor air samples, with the expectation that bio-aerosol concentrations indoors should be less than or equal to outdoor levels and similar fungal types.

Non-viable fungi spore air sampling will be performed using spore trap cassettes and high volume air sampling pumps. Samples will be collected at 15 liters per minute (LPM) of air for a period of 5 minutes to yield total volumes of 75 liters of air.

After completion of sampling, all collection media will be packaged and transported via courier using standard chain of custody protocols to an independent EMLAP accredited laboratory under standard chain-of-custody protocol. Samples will be analyzed on a two day laboratory turnaround.

Task 2 - Initial Sampling Prior to Destructive Investigation

ACC proposes collect representative non-viable fungal spore air sample(s) from the interior of each classroom and hallway in Building B, after the destructive investigation. Three samples will be collected from the outside (for comparison purposes). Samples will be collected and analyzed as described in Task 1.

Task 3 - Final Project Report

ACC will prepare a written report of findings with conclusions regarding the quality of the indoor air with respect to appropriate ambient air quality and regulatory guidelines for commercial buildings. This report of findings will contain a discussion of procedures and results obtained during the study with recommendations for additional investigation(s), test(s), and/or repair(s) if warranted.

All services subject to the Terms & Conditions between ACC and Client as of the date indicated above. Where no specific Terms & Conditions between ACC and Client exist, ACC's 2017 Standard Terms & Conditions apply to all services.
