## PROJECT DESCRIPTION

Parker Elementary School students and staff have access to a new multi-use synthetic turf field and play structure. The existing basketball courts were relocated with new striping, and a new accessible path of travel will be paved. In addition, a concrete seatwall outdoor assembly area was constructed. Three portables were demolished.

Both students and staff are very excited to have a year round field and new play structure to practice and play on. The field is complete.

## UPDATE

Project is 100% complete.

Construction

Complete

## Quick Facts

\$1.73M Budget, funded by  
Measure J Bond

Synthetic turf fields, versus natural grass, save many gallons of water each year and require low maintenance

The new field will accommodate various sports such as football, soccer, softball, and kickball.

The outdoor seating area will be used for assemblies, classes, and daily line-ups. The back wall of the structure available for murals and/or mosaics.
