Exploring College, Career & Community Options (ECCCO) – 12th Annual

Approximately 550 high school students interned at nearly 100 internship host sites across Oakland and beyond. Thanks to Measure N and a grant from the City of Oakland's Fund for Children and Youth, as well as some direct payment from industry partners, all internships were stipended. More than 30 teachers and staff from our high schools provided direct instructional and case management support to student interns.

Nearly 100 students participated in the Peralta Institute, exploring careers and earning college credit toward CTE certificates, in fields as diverse as Game Design, Cosmetology, and Diesel Mechanics. Teachers and staff from our high schools provided direct support in Peralta classrooms and case management to ensure student success.

ECCCO Demonstration of Mastery

Nearly 400 students from across OUSD took part in 2023 ECCCO Demonstration of Mastery. Students presented to guests what they learned in their internships. Hundreds of educators, families, business leaders, and community members attended the event to see the students in action. And they were treated to an amazing range of summer activities experienced, and knowledge gained, by students.

“Our goal is to get to the point where all students are having these types of immersive learning experiences,” said Rebecca Lacocque, OUSD’s Director of Linked Learning. “During their internships, they’ve had very intentional support from pathway staff who are helping them make meaning of all that they’ve been learning. Everything from technical skills to the complex, nuanced professionalism skills that they’re learning in the workplace. The Demonstration of Mastery is momentous because it’s such a milestone for students, as an experience that brings together college, career and community in a unique way. It’s the application of what students have learned in their pathway classes and these internships, and connecting to and informing their post-secondary plans.”

High School Educator Professional Development: Project Based Learning Institute

- Participation from 7 high schools and 15 pathways.
- 11 coaches and facilitators (from central and sites)
- 32 projects being revised or newly created
- 4-day institute outcomes:
 - Develop a pathway-themed project that aligns to pathway student outcomes and/or OUSD graduate profile and reflects at least 2 OUSD PBL framework elements: key knowledge/skills + one other (Consider Authenticity for new projects and Critique & Revision for revised projects)
 - Design a final performance assessment (task) with clear success criteria (rubric) aligned to the learning outcomes of a project

High School Educator Professional Development: History Among Us Externship

The 2-week externship guided 7 Arts, Media & Entertainment teachers from Skyline and Fremont HS through all phases of the story development process from research, to “scripting with the landscape,” to audio production, to AR development, to testing. Teachers used Adobe Suite for audio and augmented reality production. Through hands-on experience with the media tools, teachers developed curriculum for use in their CTE media courses during the 2023-2024 school year. Teachers also received coaching from CTE Arts, Media and Entertainment coach Jamie Treacy during project implementation.
