Frozen food shall maintain 0 degrees Fahrenheit during transport and immediately be placed in the freezer upon loading.

B.8 Inspection of Products

All items furnished to the District shall be subject to inspection and rejection by the District for defects or non-compliance with the specifications. The cost of inspection on deliveries or offers for delivery which do not meet specification(s) shall be deducted from the Contract price and payment(s).

B.9 Distribution Facilities

The District, at its discretion, reserves the right to inspect the warehouses, trucks, and distribution facilities of any Bidder prior to or after award of the Contract. If the District determines after such inspection that the Bidder is not determined capable of performance satisfactory to the District, that bid may not be further considered and/or the District may terminate all or any part of the resulting Contract.

B.10 Inability to Perform

In the event that the Bidder is prevented from making delivery or otherwise performing on time as specified in the Contract due to fire, flood, earthquake, labor or transportation problems, war, acts

allowances, bid pricing, and rebates, including non-profit and blanket school bid pricing and allowances.

For verification purposes, the District reserves the right to have available at the Vendor's place of business at a reasonable time, the right to inspect such documents as necessary to establish the "cost" portion of the Vendor's price. Notwithstanding cancellation notice requirements identified in the Proposal, if the Vendor refuses such inspection to the District, the District may immediately cancel the Contract.

The Vendor is responsible for automatically requesting to renew any expiring bid pricing or allowances on all items the District is purchasing at the time of expiration. The District shall supply the Vendor proper documentation authorizing them to do so the District's behalf.

Oakland Unified School District

1000 Broadway
Oakland, CA 94607

Invoices must show the delivery date, purchase orders and be submitted for each delivery to each destination. Invoices and order forms are to show OAKLAND UNIFIED SCHOOL DISTRICT item number. A separate computer code number for each item or another identification method acceptable to the District may also be used prior to authorization by the Director of Nutrition Services and the Contract Manager. Invoices are to show the contract rate and extension for each item furnished, with a subtotal for each destination, and grand total for all destinations.

The District may require delivery for a school site delivered to an alternate school site determined by the District. When this occurs, the Bidder will provide a separate invoice charging the account for the site placing the order. This will prevent the original receiving site from being charged. Items determined as for catering by the Nutrition Services Director are to be invoiced separately.

B.17 Fuel Surcharge

A fuel surcharge shall not be allowed for the duration of the resulting Contract or on any Contract renewal periods. However, in the event that extreme changes in fuel prices occur during the term of the Contract, the District and Bidder may meet to address contract language changes allowing fuel surcharges or concessions. However, the District is not and will not be obligated to agree to any changes allowing fuel surcharges or concessions related thereto.

B.23 Order Guides & Ordering Systems

Bidder will be required to produce District Order Guides. The Order Guides will consist of a complete list of all District authorized products, to include the bidder item number, the complete description (including manufacturer, if applicable), and the current contract price. The Bidder will work closely with the District Menu Planner or other District Nutrition Services designee to develop these guides to best meet the District's needs. The Vendor will only include items or make changes on the order guides as directed by the Menu Planner or Nutrition Services designee. Individual school sites should only be able to order items that are listed in the District order guide. All other items not listed in the order guide should be considered restricted. The District, nor any of its sites, shall be required to pay for any unauthorized orders.

In addition, the Bidder is encouraged to present or demonstrate new items or concepts to the District. Additionally, the District will require from time to time that a Distributor bring in a new item and purchase from non-stocking Suppliers or Manufacturers.

An on-line ordering system that is maintained and managed by the Bidder must be available to the District, and only District approved items will be available to order on said system.

SECTION C EVALUATION AND AWARD CRITERIA

This component will be evaluated based on the Vendor's demonstrated experience in and/or with: (i) providing past and existing services to the District; (ii) the anticipated capacity to provide timely and adequate services to the District; and (iii) reported and/or demonstrated provision of services by the Vendor to the District, as well as other school districts and entities. which include:

- Purging our inventory of all non-compliant food products, to alleviate schools concerns about their purchasing practices when conducting business with GSF.
- Creating an online database of Product Formulation Statements and photographs of original Child Nutrition (CN) Labels from the cases to assist customers in easily accessing the required documents to record meal pattern compliance.
- Improving our technology platform to provide reporting tools, data collection, trend analysis, and business metrics to improve transparency and traceability.

While these initiatives have significantly eased the administrative burden on school districts, this is not the only changes affecting school foodservice operations. The entire food supply has changed. School Districts need more than just compliant school meals. Parents, school boards, superintendents, food service directors, and students are requiring more; robust food safety programs, socially responsible local sourcing initiatives, and verification of employee and animal welfare programs are at the forefront of these conversations.

To meet these goals, GSF committed to a comprehensive strategy to ensure the foods we offer meet **OUR** core values and those outlined in the Los Angeles Food Policy Council's Good Food Procurement model. In early 2013, we developed a Vendor Code of Conduct to ensure that the foods we provide are the safest and healthiest available and sourced responsibly. In 2015, we challenged our supply partners to provide us with their commitment and submit measurable assurance that the foods they provide support local economies, provide environmental sustainability, value the workforce, provide humane and healthy care for livestock, and promote increasing nutrition composition. Included in this response is an example of this commitment provided to us by Foster Farms. We continue to gather and vet information from our vendor partners to increase the transparency in the supply chain.

Most recently we embarked on a mission to support our Districts by identifying the point of origin of the foods we provide with the ultimate goal of including this information on the district invoice. This project will further support Districts with complying with the federal Buy American requirements, identifying foods from California that Districts can promote as supporting "local" efforts, and providing easily accessible information for Districts participating

B.2 Deliveries

B.7 Delivery of Fresh Product

In order to ensure that GSF's fleet is the safest on the road, most of our equipment is on a long-term lease agreement that comes with a full-service maintenance program. The service agreement must comply with all Department of Transportation requirements. In addition, any company owned vehicles are also maintained to these standards. All fleet vehicles must be inspected every 90 days and receive subsequent repairs and/or service as applicable. Included in the 90 day inspections are:

- Safety checks (brakes, hoses, fluids, headlights, turn signals, etc.)
- Oil changes (by mileage)
- Tire replacement
- Lift gate service
- Reefer unit service (by service hours)
- Visual damage

These inspections are done to ensure compliance with the California Commercial Motor Vehicle Safety Act of 1988, which is commonly referred to as the Biennial Inspection of Terminals (BIT) Program. The BIT Program requires a comprehensive review of our fleet by the California Highway Patrol. Our last review resulted in a passing score for all vehicles.

Our current fleet consists of 126 vehicles, 55 bobtail trucks, 27 tractors, and 44 trailers. All 55 bobtails have a manufacture date of 2012 or newer and of our 27 tractors all but one has a manufacture date of 2012 or newer.

Our bobtails and trailers are all equipped with refrigerator units that are capable of maintaining both frozen and refrigerated temperatures. Some of the units are multi-temperature units that have the capability to run two separate temperature zones with wall portions. Attached you will find a spreadsheet outlining the above fleet information in more detail.

Our operations and transportation team has reviewed the requirements for QUSD deliveries and has visited the delivery sites to fully evaluate the needs of the District. Upon award of this contract GSF will dedicate a minimum of four trucks and drivers to QUSD to meet the delivery requirements.

GOLD STAR FOODS

Our warehouse is equipped with an automated warehouse management system that accurately tracks use-by dates, expiration dates, and pack dates to avoid aging product. We rotate all products using the first-in, first-out method. GSF requires that all vendors deliver foods with a minimum of 75 percent shelf-life remaining. With our inventory turning every 2-3 weeks aged product is kept to a minimum.

To ensure that the foods purchased meet the Federal Child Nutrition Program meal pattern requirements, we have added nutritional specifications, product formulation statements, and/or child nutrition (CN) labels to our on-line ordering system. For all products, you can easily select the link in the product description to access the nutrition information. Included in this response is an example of the Tony's Galaxy Cheese Pizza specification shown below.

B.6 Substitution of Products and Additional Items

Substitution

At GSF, we take a proactive approach for minimizing shortages and/or substitutions. First, we work closely with the District's designated menu planner to ensure that the foods served on the menu are procured in a manner to minimize shortages and/or substitutions. This process will also ensure that GSF can effectively comply with OUSD's requirements for a two-day lead time on ordering. In addition to the assigned Account Manager, every GSF customer has a dedicated Customer Service Representative (CSR). This CSR is responsible for communicating with District

GOLD STAR FOODS

B.9 Distribution Facilities

B.14 Processing Plant and/or Distribution Facility

GSF is headquartered in Ontario, CA. Our facility is 254,000 square feet with 83,000 square feet of freezer space, 40,000 square feet of cooler space, and an additional 80,000 square feet of temperature controlled dock space leaving 51,000 square feet of dry storage and office space. In total we have four temperature zones to ensure that all products are stored at the proper temperatures. We have also made significant infrastructure modifications to prevent us from situations where we would have diminished capacity. Our racking systems are designed to withstand a 9.0 earthquake and we have an emergency contract in place to have "trailer" generators delivered that connect directly to the building.

In August 2014, we acquired a Northern California facility in Fairfield, CA. This facility provides support services to the Ontario location, to expedite deliveries in Northern California. In June 2016, we will open a new state-of-the-art facility in Dixon, CA. This facility is 196,000 square feet with 55,000 square feet of freezer space, 16,000 square feet of cooler space, 27,000 additional square feet of temperature controlled dock space leaving 98,000 square feet of dry storage and office space. This facility will also have the same systems in place to continue operations even in the event of a natural and/or man-made disaster. We are very proud of our facilities and welcome the OUSD team to visit anytime.

B.11 Utilization Reports

GSF has a very robust on-line ordering system. While most broadline distributors have technology to manage customer orders, electronic payments, vendor requisitions, and account reconciliation, our Microsoft Window NAV-ERP System is designed specifically to support the additional needs of school districts. Since our on-line ordering system is only accessible to customers through a secure log-in process, we have attached the GSF Customer Web Portal document to provide you with an overview of our on-line ordering program. The ability to view and print reports is already in place and easily accessible through www.goldstarfoods.com, 24 hours per day, 7 days per week.

The reports available through the GSF On-line System include:

- District Usage by Vendor

go into effect until January 1 each school year. All price changes presented to Districts will include supporting documentation by the manufacturer. With the contract start date occurring in March 2016, we will review all prices prior to the start of the 2016-17 school year and discuss any potential increases or decreases in pricing at that time.

B.19 Price Change Audits

We welcome schools to review their invoices to ensure that pricing is correct according to the contract. We have staff on hand at any time the District feels an audit is warranted.

B.23 Order Guides & Ordering Systems

As mentioned previously, GSF's online ordering system is very robust. Our online system uses District order guides as the basis for online ordering. The system can be customized for each District and has extensive ordering features that can allow individual school sites to order independently should the FSD choose that option. Below is a screen shot from our on-line ordering system, showing how easy developing an order guide is. The order guide can include only items awarded on the bid, be site specific, and the FSD or other designated OUSD team member can modify the order guides to add or delete items as necessary. The GSF team can easily support the District by creating and/or modifying order guides for the District.

product we provided that item and price on the bid. In the event that the District prefers to utilize the "spec" item we can modify our response to include the pricing for that item.

- a. For Items the Distributor is invoiced by the Supplier by case price:

Delivery to School Site \$ 2.99 per case

- b. For Items the Distributor is invoiced by the Supplier by per pounds price:

Delivery to School Site \$ 2.99 per master case weight/pound

When calculating the delivery charges the fixed per case delivery cost is derived from the actual costs required to execute a successful delivery which includes:

- Warehouse Personnel
- Truck Driver(s)
- Mileage (accounts for fuel costs)
- Cost of the Vehicle (includes maintenance)

The \$2.99 per case ensures that the associated staff is paid a fair living wage and is provided benefits that allow team members to take care of themselves and their families.

D.6.4 Statement of Fill Rates

1. What is your current order fill rate percentage companywide?
2. What is your current order fill rate percentage for K-12 Schools Only?
3. What is your current order fill rate percentage for all contracted accounts?

As outlined above in section B.3 Delivery Guarantee, our answer will be the same for all three questions. As a school only distributor we do not have different fill rates for different sectors of our business because schools are our only business. We track our fill rate performance in two different ways, "fill rate" and "service rate".

Fill rate is defined as the quantity of cases delivered measured against the quantity ordered including district approved substitutes. This is measured in total cases ordered versus total cases delivered. Using this calculation our average fill rate is 99.5%.

information. Currently we are working with districts to prioritize their needs to ensure we are capturing the most important information first. Upon award of this contract we will work with the District to identify the needs and quickly provide the required information.

Currently, the only product line that is a Gold Star Foods private label is our Fresh Bread. We are proud of our Fresh Bread Program and what it offers schools. To begin, the wheat is a 100% certified, sustainably grown wheat from Robinson Ranch in Merced, CA. This family farm grows the wheat specifically for our bread needs. The wheat is milled in downtown Los Angeles and baked in Commerce, CA or Hayward, CA to ensure the freshest bread is offered to schools. For convenience, our bread program is offered in both fresh and frozen options to meet District needs.

Overall, we feel that we are in the best position and the most qualified to support OUSD in achieving its objectives and vision. We are confident in our ability to provide you the products and services you need to successfully operate your Child Nutrition Programs. We welcome you to contact any or all of the enclosed references for confirmation of our dedication to supporting our schools. Thank you for the opportunity to further expand our role as your Child Nutrition Partner.

Sincerely,

Sean C. Leer, CEO

We are incredibly proud of and dedicated to our employees, many of whom have worked at Foster Farms for decades. Each quarter, we celebrate employee anniversaries and it is not unusual to recognize individuals with 30-plus year careers within our company. Our employees enjoy some of the highest wages in the poultry industry and have access to one of the most attractive benefits packages in the industry. We strive to cultivate a nurturing working environment for all Foster Farms employees. We provide a safe and comfortable working environment. Additionally, out of all U.S. poultry companies, Foster Farms ranks within the top two percent for safety. Foster Farms' Livingston, Calif., poultry processing plant has been selected from 150 poultry processing plants throughout the nation by the U.S. Department of Labor and OSHA to serve as the model processing plant for other U.S. poultry producers.

Humanely Certified

The American Humane® Certified program provides third-party, independent verification that Foster Farms' care and handling of poultry meet the ethical, science-based standards established by the American Humane Association. To achieve certification, Foster Farms verified that humane conditions are maintained on our farms and ranches 24 hours a day, seven days a week, 365 days a year. The American Humane® Certified label on our products is your assurance that the fresh chicken you are buying was humanely raised. And because raising our chickens humanely has been our practice since the beginning, today we are pleased to be American Humane® Certified. We are committed to working with the American Humane Association to promote further advances in animal welfare.

Appendix:

As a testament to our commitment:

- In 2010, Foster Farms will complete a water recycling project at the company's Livingston Complex to reduce facility water usage by 500,000 to 1,000,000 gallons per day.
- In 2009, Foster Farms was named a winner of the prestigious Waste Reduction Awards Program (WRAP) award for its innovative, environmentally-friendly solid waste recycling programs and policies. The WRAP Awards are an annual program established in 1993 by the California Integrated Waste Management Board (CIWMB), part of the California Environmental Protection Agency (EPA), to recognize California businesses that have made outstanding efforts to reduce waste and send less garbage to state landfills.
- Ongoing efforts include a biodiesel initiative for delivery trucks aiming to increase use of environmentally-friendly, cleaner burning fuel sources, while reducing dependency on foreign oil.
- In 2005, Foster Farms won California's highest environmental honor, the Governor's Environmental and Economic Leadership Award for an innovative, successful organic waste disposal program which generates electricity for nearby communities.
- The company is a proud recipient of the POWER Award from Public Officials for Water and Environmental Reform.
- Foster Farms' solid waste recycling efforts in 2004 (which were evaluated in 2006) almost single-handedly allowed Merced County to achieve its goal of diverting solid waste tonnage from landfills.
- As part of our goal to continually improve our management practices, reduce pollutants, and comply with environmental policy, Foster Farms initiated a pollution prevention audit in 2007 (in coordination with third party experts) to evaluate how we can continue to make strides in our environmentally-conscious operations efforts.
- Foster Farms was honored in 2007 by Goodwill Industries' Tacoma, Washington Chapter as "Large Employer of the Year" for our partnership in providing training and career opportunities to Goodwill clients in the greater Tacoma area.
- Inspired by the Foster family's generosity, California employees established "Christmas Kids," a group that annually provides gifts and food baskets for local area families during the holidays. This group has expanded to provide assistance to Seniors' groups, and children's groups year-round.
- Every Foster Farms facility is devoted to local community outreach. Our Kelso, Washington office runs programs specifically for the Pacific Northwest. Our team in Demopolis, Alabama is involved in local community outreach. And the Livingston Corporate office oversees our California efforts, concentrated on Merced and Stanislaus Counties where the majority of Foster Farms' employees live and work.
- Foster Farms also has a donation-matching program with employees for contributions to the United Way in addition to unique situations such as the 2004 tsunami crisis, Hurricane Katrina, and more.
- Foster Farms actively supports furthering education and provides annual scholarships to qualified students at Fresno State, Cal Poly SLO, UC Davis, Stanislaus State and Modesto Junior College. Additionally, thirty \$1000 scholarships are awarded to children of Foster Farms employees each year.

All items shall be delivered in quantities specified in the Contract FOB Destination (no freight allowed), at points within the District as specified in the Contract.

Unless otherwise specified, if an item is not delivered as specified in the Contract, or if the Bidder delivers an item which does not conform to the specifications, the District may, at its option, annul

Frozen food shall maintain 0 degrees Fahrenheit during transport and immediately be placed in the freezer upon loading.

B.8 Inspection of Products

All items furnished to the District shall be subject to inspection and rejection by the District for defects or non-compliance with the specifications. The cost of inspection on deliveries or offers for delivery which do not meet specification(s) shall be deducted from the Contract price and payment(s).

B.9 Distribution Facilities

The District, at its discretion, reserves the right to inspect the warehouses, trucks, and distribution facilities of any Bidder prior to or after award of the Contract. If the District determines after such inspection that the Bidder is not determined capable of performance satisfactory to the District, that bid may not be further considered and/or the District may terminate all or any part of the resulting Contract.

B.10 Inability to Perform

In the event that the Bidder is prevented from making delivery or otherwise performing on time as specified in the Contract due to fire, flood, earthquake, labor or transportation problems, war, acts

allowances, bid pricing, and rebates, including non-profit and blanket school bid pricing and allowances.

For verification purposes, the District reserves the right to have available at the Vendor's place of business at a reasonable time, the right to inspect such documents as necessary to establish the "cost" portion of the Vendor's price. Notwithstanding cancellation notice requirements identified in the Proposal, if the Vendor refuses such inspection to the District, the District may immediately cancel the Contract.

The Vendor is responsible for automatically requesting to renew any expiring bid pricing or allowances on all items the District is purchasing at the time of expiration. The District shall supply the Vendor proper documentation authorizing them to do so the District's behalf.

B.14 Processing Plant and/or Distribution Facility

Oakland, CA 94607

Invoices must show the delivery date, purchase orders and be submitted for each delivery to each destination. Invoices and order forms are to show OAKLAND UNIFIED SCHOOL DISTRICT item number. A separate computer code number for each item or another identification method acceptable to the District may also be used prior to authorization by the Director of Nutrition Services and the Contract Manager. Invoices are to show the contract rate and extension for each item furnished, with a subtotal for each destination, and grand total for all destinations.

The District may require delivery for a school site delivered to an alternate school site determined by the District. When this occurs, the Bidder will provide a separate invoice charging the account for the site placing the order. This will prevent the original receiving site from being charged. Items determined as for catering by the Nutrition Services Director are to be invoiced separately.

B.17 Fuel Surcharge

A fuel surcharge shall not be allowed for the duration of the resulting Contract or on any Contract renewal periods. However, in the event that extreme changes in fuel prices occur during the term of the Contract, the District and Bidder may meet to address contract language changes allowing fuel surcharges or concessions. However, the District is not and will not be obligated to agree to any changes allowing fuel surcharges or concessions related thereto.

B.23 Order Guides & Ordering Systems

Bidder will be required to produce District Order Guides. The Order Guides will consist of a complete list of all District authorized products, to include the bidder item number, the complete description (including manufacturer, if applicable), and the current contract price. The Bidder will work closely with the District Menu Planner or other District Nutrition Services designee to develop these guides to best meet the District's needs. The Vendor will only include items or make changes on the order guides as directed by the Menu Planner or Nutrition Services designee. Individual school sites should only be able to order items that are listed in the District order guide. All other items not listed in the order guide should be considered restricted. The District, nor any of its sites, shall be required to pay for any unauthorized orders.

In addition, the Bidder is encouraged to present or demonstrate new items or concepts to the District. Additionally, the District will require from time to time that a Distributor bring in a new item and purchase from non-stocking Suppliers or Manufacturers.

An on-line ordering system that is maintained and managed by the Bidder must be available to the District, and only District approved items will be available to order on said system.
