## Statement of Qualification

ConnectEd: The California Center for College and Career is dedicated to advancing practice, policy, and research aimed at helping young people prepare for both college and career through Linked Learning—a high school improvement approach. ConnectEd's mission is to support the development of Linked Learning pathways by which California's young people can complete high school, enroll in postsecondary education, attain a formal credential, and embark on lasting success in the world of work, civic affairs, and family life.

In 2008, ConnectEd launched the California Linked Learning District Initiative to actively effect change at the district-systems level in nine school districts throughout the state of California. Through coaching, professional development, and technical assistance provided by ConnectEd, districts modify and create policies, structures, and practices that support implementation of high-quality pathways; build capacity among district and pathway leadership; and, most importantly, transform the nature of teaching and learning within pathways to substantially improve student outcomes.

ConnectEd's Linked Learning Coaches are experienced practitioners who provide support for Linked Learning at two levels: district-level systems development, and pathway design and development. Their primary goal of coaching is to build capacity of district, school-site, and pathway leadership to implement and sustain of a system of high-quality Linked Learning pathways.

ConnectEd's Coaching Community of Practice is comprised of a cadre of skilled district- and pathway-level coaches who were selected because of the specific strengths they bring to this work. The Coaching Community of Practice works cooperatively to serve the needs of all Linked Learning districts and pathways. District and pathway coaches are assigned to complement the unique needs of a district and its pathways. Usually assigned as a district and pathway coaching team, coaches employ a set of proven tools to assist staff in assessing current status, determining gaps, and designing and implementing viable action plans.
