**RE: EAST OAKLAND PRIDE  
8000 BIRCH STREET, OAKLAND, CA**

Dear Kenya,

Thank you for the opportunity to submit our proposal to provide surveying services for the above referenced project. Our proposal is based on the RFQ/P Site Survey Services for East Oakland PRIDE Campus received on April 28, 2023.

We propose to provide the following scope of services:

## **SURVEYING SERVICES**

### **RECORD BOUNDARY AND TOPOGRAPHIC SURVEY**

**\$24,800**

- Determine extent of existing property lines, right-of-way lines and easements as defined by and analysis of available record maps, deeds, title report, and physical evidence.
- Prepare a drawing showing boundary lines with length and bearing (including reference on basis) on each boundary course and plottable easements. Give area in square feet if less than one acre, and in acres (to .001 acre) if over one acre. Preliminary Title Reports with referenced documents for the properties in question to be provided by the District.
- Provide field work, office calculations and drafting to produce a topographic survey at 1"=20' scale to fit on a 24x36 or 30x42 sheet layout.
- Among other relevant site features, this survey will show the following:
  - Mapping of school properties shall extend out to the face of curbs for all streets surrounding the sites.
  - Building footprints of existing structures with building corner spot elevations.
  - Building entry spot elevations; each side of entry(ies) at exterior, finish floor at interior and corner spot elevations at a point 5 feet from face of building entry(ies).
  - Spot elevations at top and bottom landing of each side of exterior stairways and corner spot elevations at landing 5 feet from top and bottom nosing of stair (if applicable).
  - Surveys will be required to have accurate locations of all utilities above and below grade.
  - Identify locations of all utilities by type (i.e., power, gas, sanitary, storm, sewer, telephone, domestic water, irrigation, telecommunication, etc.).
  - Acquire the depth of all gravity utility systems.
  - Locate surface and underground utility manhole, vault, transformer, switchgear, cleanouts, etc.
  - Identify utility box locations and show all underground pull boxes.
  - Locate main point of entry for communication utilities.
- Mapping of school property will extend out to the face of curbs for all streets immediately adjacent to

 East Oakland PRIDE  
 Project No. 723TBD  
 Page 2

the school grounds, if any.

- Mechanical detection of existing utilities is included as a separate task item.
- Contours will be shown at one (1) foot intervals or as appropriate to clearly define the slopes. Spot elevations collected by ground surveys, including finish floor elevations, will be shown to an accuracy of 0.01' (one hundredth) of a foot. Heavily brushed areas will be defined at the perimeter. Brush clearing will be the responsibility of the client if ground elevations need to be collected in those areas.
- Sandis surveyors may utilize Aerial survey techniques if deemed appropriate for scope and site features. Aerial Survey will be supplemented with conventional survey for utility information and survey under trees or areas not visible from above. Aerial spot elevations for Aerial Survey will be shown to an accuracy of ±0.1 (one tenth) of a foot.

**UTILITY LOCATING**

**MECHANICAL LOCATING SERVICES (UNDERGROUND UTILITY LOCATING)**

**\$9,700**

- Provide utility designation to determine the horizontal position of existing subsurface utilities within the project scope limits. Utilities will be located using standard locating methods pursuant to California Government Code section 4216 through 4216.9. The horizontal location of utility data will be collected. Field conditions may affect the thoroughness of our survey and only excavation/potholing will reveal the locations of such utilities. If storm or sewer lines are clogged with debris, it is at the client's discretion and responsibility to have those lines flushed for utility locating to resume.
- Utility locations will be marked in the field using standard APWA color coded paint, stakes, or a combination thereof based on site conditions. Chalk paint can be substituted upon request. Removal of utility marking via power washing or other methods is not included but can be provided as an additional service.
- Horizontal location of utility data will be collected and incorporated into the topographic survey.

**ADDITIONAL SERVICES**

**\$3,450**

- 10% contingency fee used to cover potential additional services subject to District approval.

Regards

Such entities are responsible for ensuring full compliance with the law and should therefore review all applicable statutes and regulations. The following information is provided simply to assist such entities with compliance with the law:

3. Prior to performing any work or services under your contract with the District, and prior to being present on District property or being within the vicinity of District pupils, you shall certify in writing to the District under the penalty of perjury that neither the employer nor any of its employees who are required to submit fingerprints, and who may interact with pupils, have been convicted of a felony as defined in Education Code section 45122.1, and that you are in full compliance with Education Code section 45125.1.
