All prepared produce products must be prepared without the use of sulfating agents. In accordance with "Buy America" and "Buy California", every effort will be made to provide first Locally grown (within 250 miles), then California grown, then American grown produce. If Local, California or American grown produce is unavailable in sufficient quantities to provide affordability, then only produce inspected and approved by USDA is acceptable. Preference will be given to vendors subscribing to the Produce Marketing Association Code of Ethics. Produce certified free from pesticide residues is preferred when available and competitively priced.

Packaging: Packages shall be so construed as to ensure safe and sanitary transportation to the point of delivery. Damaged containers may be rejected and returned for credit or immediate replacement to the original site at no cost to the District for product or delivery. All packaging materials shall be FDA approved and meet all pertinent state and federal regulations for safe use with foods. Packaging materials shall impart no odor, flavor, or color to the product. All costs for containers shall be borne by the vendor. **Whole, ready to eat fruits shall be delivered without stickers on individual pieces of fruit.**

Pricing: Pre-cut value added produce and whole fresh fruits account for the majority of Nutrition Services produce purchases; because of market fluctuations and budget uncertainties, the selected vendor must give fixed year round firm pricing of these products: Broccoli Florets, Celery Sticks, Baby Carrots, Chopped Romaine, Sliced Apples. All other fresh produce price quotations will be based on a cost plus formula. The cost plus formula will consist of actual costs plus a percentage figure mark up, which represents the percentage that will be charged above the actual costs. Contract prices awarded as a result of this price request shall remain firm for the contract period. **Any changes (up or down) in price must be announced to school district officials 30 days preceding the effective price change.** This District reserves the right to request verification of any change in prices, the price per unit percentage markup must remain firm for the full contract period. In the event of a price change effective between the opening date of this price request and the inception date of the contract, the successful vendor shall reflect any decrease and may reflect any increase at the beginning of the contract.

Ordering: The District prefers to place orders online and receive an email confirmation, however, in the event that a school site needs to place orders manually with the delivery driver or over the telephone, a written copy of the order must be left with the person in charge at the site or a follow up email confirmation must be received. The District reserves the right to add, remove or delete product based on school needs. Only vendors with no minimum order requirements will be considered for award.

Substitutions: Substitutions in quality or quantity must receive prior approval from the Nutrition Services Department in order to qualify for payment.

Delivery: The District reserves the right to make additions to, or deletions from, the lists of school sites to be served at any time during the period of the contract, and revise delivery times as required. Awarded vendor(s) will be required to make direct deliveries to approximately 70 sites. Sites require between 1-3 day(s) per week deliveries due to storage limitations or volume purchases. Deliveries shall be made utilizing refrigerated trucks. All deliveries shall occur between the hours of 7:00 a.m. and 12:00 noon. Dark drops will not be accepted. If a scheduled delivery day is a holiday, deliveries will occur on the next business day after the holiday. For emergency orders, the vendor will be required to make direct deliveries to various cafeterias/kitchens or other locations as requested by the District. Delivery vehicles are to be cleaned on a regular basis, free of excessive dirt and debris and clearly labeled with the name of the vendor.

7. Delivery shall not be made so close to service time as to create concern by the school site. Delivery schedule is to be pre-scheduled to coincide with school and existing route flow for responder's best reduction of expenses, mileage, and time.
8. All deliveries must be accompanied by a computerized invoice. Invoice is to include, for each item: item identification, unit price, price extension and total price of delivery. Sufficient time must be allowed at time of delivery for adequate inspection of product, not only for quantity, but also quality of product. Invoice will be signed only after inspection of product. Very high exposure risk jobs are those with high potential for exposure to known or suspected sources of COVID-19 during specific medical, postmortem, or laboratory procedures. Workers in this category include:

- Healthcare workers (e.g., doctors, nurses, dentists, paramedics, emergency medical technicians) performing aerosol-generating procedures (e.g., intubation, cough induction procedures, bronchoscopies, some dental procedures and exams, or invasive specimen collection) on known or suspected COVID-19 patients.
- Healthcare or laboratory personnel collecting or handling specimens from known or suspected COVID-19 patients (e.g., manipulating cultures from known or suspected COVID-19 patients).
- Morgue workers performing autopsies, which generally involve aerosol-generating procedures, on the bodies of people who are known to have, or suspected of having, COVID-19 at the time of their death.

High Exposure Risk

High exposure risk jobs are those with high potential for exposure to known or suspected sources of COVID-19. Workers in this category include:

- Healthcare delivery and support staff (e.g., doctors, nurses, and other hospital staff who must enter patients' rooms) exposed to known or suspected COVID-19 patients. (Note: when such workers perform aerosol-generating procedures, their exposure risk level becomes very high).
- Medical transport workers (e.g., ambulance vehicle operators) moving known or suspected COVID-19 patients in enclosed vehicles.
- Mortuary workers involved in preparing (e.g., for burial or cremation) the bodies of people who are known to have, or suspected of having, COVID-19 at the time of their death.

Medium Exposure Risk

Medium exposure risk jobs include those that require frequent and/or close contact with (i.e., within 6 feet of) people who may be infected with COVID-19, but who are not known or suspected COVID-19 patients.

In areas without ongoing community transmission, workers in this risk group may have frequent contact with travelers who may return from international locations with widespread COVID-19 transmission. In areas where there is ongoing community transmission, workers in this category may have contact with the general public (e.g., in schools, high-population-density work environments, and some high-volume retail settings).

Low Exposure Risk (Caution)

Lower exposure risk (caution) jobs are those that do not require contact with people known to be, or suspected of being, infected with COVID-19 nor frequent close contact with (i.e. within 6 feet of) the general public. Workers in this category have minimal occupational contact with the public and other coworkers.

FOOD SAFETY PROGRAM - HACCP

BACKGROUND INFORMATION

Plant Description and Background

Daylight Foods, Inc. has conducted a hazard analysis to determine food safety hazards reasonably likely to occur in the warehousing process, at

1. Produce wash: Receiving raw produce may have microbial contamination, needs to be wash with Sodium Hypochlorite solution- Critical Control Point (CCP-1)
2. Metal Detection: Metal chips broken from machinery handling the food processing may cause physical contamination, each tray needs to be screened through metal detection- (CCP-2)

The above identified points are critical hazards and requires preventive measures to control those hazards. The HACCP plan developed on the processing steps implement chlorine wash and metal screening which covers each item procured and processed. A single HACCP plan encompasses multiple products within the produce category.

PRODUCT RECALL/TRACEBACK PROCEDURE

Definitions:

A **product recall** is the removal or correction from the channels of distribution and consumption of any product deemed to be potentially hazardous or defective.

A true recall of a food product occurs only when the product violates the law and is likely candidate for seizure, condemnation, or legal action by the government.

A food product may violate the law if it is "adulterated" or "misbranded".

Mock recall: It is an internal exercise to test company's ability to trace and recall product. Mock recall exercises should be scheduled on an annual basis (at least) using different scenarios to ensure mock recalls run smoothly

As an advance preparation for unexpected events (e.g. positive *Listeria monocytogenes* or salmonella sample, a food borne outbreak, natural disaster, product tampering or bomb threat) a Crisis Management team and an emergency management communication strategy shall be in place

Recall Classification categories:

There are three FDA recall classification categories:

Class I: There is a **reasonable probability** that consuming the product will cause death or serious health problems. (e.g. *Listeria*, *Clostridium botulinum*, *E.coli* O157:H7, *Salmonella*, undeclared allergens like peanuts)

Class II: There is a **remote probability** that consuming the product will cause serious health problems: products that could cause temporary or medically reversible health consequences.

Class III: Consuming the product is **not likely** to cause serious health problems. Adulterated or misbranded products that do not involve a health hazard would be given this classification.

The depth of recall is situation specific. There are **three depth levels:** Consumer or user level; retail level and wholesale level.

- A class I Recall shall be made to the consumer or user levels including retailers; food service suppliers; brokers or distributors
- A class II Recall shall be made at the retail level and or the food service supplier level; including any intermediate brokers or distributors
- A class III Recall shall be made at the retail or food service supplier level

RECALL /TRACE BACK PROCEDURE:

NOTIFICATION:

The initial notification of a potential health hazard can come from a variety of sources including

- The FDA, State Health Departments,
- Daylight Foods, Inc customers or employees,
- Suppliers (Packaging, ingredients, raw materials etc.,

1. Regardless of the source, all food safety or health hazard inquiries should be routed immediately to the Trace back/product recall coordinator without exception
2. In those instances when the trace back/product recall coordinator is unavailable, the alternate trace back/product recall coordinator will assume responsibility for addressing the initial notification

FACTS AND DATA ACQUISITION:

Recall coordinator will ascertain available facts associated with the potential health hazard. Facts and related information include: Product type (name); Label; product codes (if any); type of defect or health effects; location(s) involved; Dates of production or distribution;

Purchasing department will verify and confirm with the supplier(s) whether any affected product was shipped to Daylight Foods. If the vendor confirms that recalled product was shipped to Daylight Foods crisis management team should assemble.

(If the potential health hazard is a physical or chemical rather than biological contamination i.e. pieces of glass, metal, wood, contamination with petroleum products or other chemical agents, the recall coordinator should attempt to get a sample of the physical hazard to assist the internal investigation)

ASSEMBLE TRACE BACK/PRODUCT RECALL TEAM:

Recall Coordinator will immediately review facts and notify top management of the potential health hazard.

Coordinator will assemble the crisis management team. He/she will inform them of the potential health hazard and to initiate the product trace and accumulate pertinent product purchases, cooling, processing, quality, shipping and sales information.

Coordinator will keep a log of all actions taken during the trace back/product recall.

It is understood that each representative on the crisis team will use all personnel and other resources available to them to carry out their responsibilities.

Product procurement manager will inform the crisis team regarding the affected PO # and the period of purchase.

All important documentation will be collected from purchases including invoices, PO's, BOL, Pick tickets, transfers and receiving tags

Trace back team will trace the product back from the origin to customer or from customer back to origin (as applicable).

An immediate hold will be placed on all suspect products in Daylight Foods, Inc control by the warehouse manager on duty or his/her designate. Quantity of product on hold shall be noted on the incident report.

All important and necessary documentation shall be assembled by the recall coordinator and the other crisis team members.

Crisis team members representing purchasing; quality control; Sales department will consolidate the amounts purchased, sold and on hold.

If the product in question is a value added product (Processed) then raw product quality control documents, Lot #, receiving information, HACCP Verification logs (Produce wash concentration and metal detector calibration logs) and other process control documentation, finished product quality control logs shall be assembled and evaluated.

Recall coordinator will consider the need for external advice and services e.g. consultants, laboratories, lawyers, public relations/crisis management personnel etc.,

Trace Back Review:

Recall coordinator will reassemble the crisis team for a review which includes results of trace back, a summation of safety related documents. Team will discuss issues that include

- Should current product sales be halted
- Is a recall, market withdrawal or stock recovery warranted?
- If a recall is necessary, what classification and what is the appropriate depth of recall?
- If the FDA is not involved at this point, do they need to be notified?
- Should corporate insurance carrier be notified?
- What is the message Daylight Foods, Inc wishes to convey to the media, customers and employees?

Communications with the media, customers and employees is always a critical issue during a food safety or potential health hazard situation.

It is important that the message be clear, concise and factual. It is equally important that the company uses a single spokesperson so that the message stays consistent

Company Executive shall be the designated spokesperson to the media.

Throughout the Recall process, Crisis Team will:

- Update relevant information pertaining to the trace back and recall
- Analyze incoming information and update the management of Daylight Foods, Inc
- Communicate with customers and Daylight Foods, Inc business partners regarding the recall activities
- Develop messages and strategy for dealing with public/media concerns
- Assist in product recovery/disposal activities
- Assist FDA or other appropriate public health agencies in the outbreak investigation

Once the product recall has been concluded and the product in question disposed off, the Recall team coordinator will prepare a report summarizing the events of the trace back and recall activities.

Sales and Customer service:

Based on the Purchase orders and date provided by the recall coordinator the customer service staff will contact all clients/customers who received the affected product(s).

Customer service representatives shall inform the customers of the recall effort in progress first by telephone and confirms by the facsimile transmission (or email) of a recall letter and follow up with telephone calls verifying the receipt of the recall letter

- 3) Do not call customers or suppliers when carrying out mock recall unless they have offered this service. Usually take the mock recall as far as proving that the contact details are on file**
- 4) Choose mock scenarios that are realistic, challenging and vary the mock scenario so that over time the range of products, sources and issues covered test the system in as many ways as possible.**

ORDERING SYSTEMS & REPORTS

On-line Ordering Capabilities

Oakland USD will be issued a fully customizable order guide and access to our online ordering system. The user can manipulate the view according to their preference and desired product sequence. Daylight is happy to train your FNS staff on how to operate our online ordering system. Depending on your preference, we can customize order guides for each specific site, allow sites the flexibility to arrange and add items to their own order guide, or maintain a more rigid order guide where approval to add new items that are not on the bid is required prior to ordering. In the event that our online order system is down, or your district's computers are down, orders may always be placed over the phone. We have also included an online ordering overview so you can also have a sense of how our portal works. Supervisors can have their own master login and place orders on behalf of any of their approved sites. Supervisors can also be emailed a copy of all orders that are placed by their staff. Please see attached:

- a. Online ordering guide

Monthly Reporting

Daylight Foods is currently working on a program to provide monthly sourcing report showing the farm of origin for all produce purchases. We have piloted this project over the past year in partnership with the CAFF, the Community Alliance for Family Farms and Project Waste Not to build an online platform for customers to access their sustainability reports, with real-time updates, whenever they need. These reports allow each customer to customize their definition of local and sustainable (i.e. within 50 or 250 miles of your district) as well as download your purchasing data as desired. Please see the attached sheet with a demo of our new upcoming sustainability reporting platform, before the Sustainable platform we provided customers with excel monthly sourcing reports and velocity reports. Attached is the sourcing report, velocity report, and a demo of our new Sustainable platform that is available to our customers starting late 2020.

Packing Slips, Invoicing, and Order Confirmation

Daylight Foods has a system of measures in place to guarantee accuracy in invoicing and billing our customers. The process is as follows:

- South San Francisco USD places an order online or through email.
- Order will be entered in our software program which downloads the produce order into our database.
- Our warehouse team will then print a pick ticket and begin selecting the order.
- After this order is completed, the order selector will mark down on the pick ticket which items are unavailable.
- Warehouse will short the item or sub item similar based on approval from school site lead.
- New Invoice is printed to reflect these changes and customer receives accurate delivery with correct invoice.
- Once delivery is made, site lead will inspect product and accept or return. We require our drivers to have all their invoices signed.
- If product is returned Invoice will be adjusted and credit given by next billing cycle. Please see our attached Return and Credit Policy.

DAYLIGHT FOODS

Oakland USD /RFP #20-02 Fresh Produce

LOCAL SOURCING

Here at Daylight Foods, we work hard to support small, sustainable farmers who steward our local farm land. We employ two procurement models that help us offer local and sustainable produce that best fit the needs of our customers. Through our conventional distributor model, we are able to work directly with mid-to-large scale local farms that grow at a volume that helps us offer local produce at an affordable price. We are able to focus our procurement on small scale, diversified farmers within 250 miles of San Francisco Bay Area. By working directly with these small farmers who are often excluded from the wholesale market due to their size, we are able to support beginning farmers, farmers who grow specialty varieties and farmers who practice regenerative agriculture. Daylight Foods started the **Daylight 150** program in 2016, focusing on providing our customers with food that is grown in our backyard. The goals of the **Daylight 150** program are as follows:

- Emphasis on local sourcing- within a 150-mile radius of Daylight Foods.
- Supporting local family farms and investing in our local market
- Focus Organic and Seasonal Produce
- Ensuring Highest Freshness and Quality
- Focus on farms using sustainable growing and harvesting methods

In addition, Daylight Foods has assisted Universities and Institutions, help identify and partner with small farms through our Farm Accelerator Program, We facilitated relationships that directly supported local growers and seamlessly integrated with our customer operations. From invoicing to delivering, Daylight Foods has helped develop the logistics of local sourcing. This program supports small businesses, the preservation of local farmland and promotes sourcing tracibility. Daylight Foods has expanded the pool of small farmers that have access to large in-stitutions enabling more growers to become self reliant and participate in shaping the future of our food system. We plan on using this pool of small, local farmers to source the fruits and vegetables to feed the students at Alum Rock Union Elementary School District:

- Coke Farms – Fresh Fruit & Vegetables
- Chelan Fresh – Apples
- Bolthouse Farms – Carrots
- Boskovitch - Celery
- Clover Dairy Farms – Butter, & Dairy
- Field Fresh Farms - Broccoli
- Producers Dairy Farm - Dairy

- Andy Boy Farms – Lettuce, Leafy Greens
- Duran Farms - Berries
- Beesweet - Citrus
- Fruition - Citrus
- Scattaglia Farms – Stonefruit
- Taylor Farms – Lettuce, Leafy Greens
- Pacific Tomato Growers – Tomatoes

At Daylight we understand that improving working conditions on farms is both a challenge and a necessity and aim to leverage our buying power whenever possible. We currently work with several growers who utilize different fair labor certification schemes on some or all of their products. Three of the fair labor standards that we recognize at Daylight are Equitable Food Initiative, Food Justice Certification and Fair-Trade Certification.
