Discussion:

Among the key purposes of the District’s Facilities Master Plan is to provide an academic environment for the Oakland community that will give every student, educator, and community member using our facilities the best possible opportunity for learning.

Through implementation of the Facilities Master Plan, the District intends to improve the District’s facilities in terms of structural integrity, safety, reliability of operating (mechanical) systems, access to modern resources, number and type of appropriate laboratories and specialized instruction rooms, opportunities for physical education, and attractiveness, such that the Oakland Public Schools are second to none. Operation of the District schools under the planned approach is intended to ensure safety, cleanliness, and orderliness for all individuals participating in the learning process.

The basic facility needs of students such as proper lighting, functional roofs, noise control and well maintained buildings, not only convey the message that we value our students and teachers but may foster a sense of school pride and community ownership which may improve attitudes towards learning. The implementation of the Facilities Master Plan is our first step in that direction.

Fiscal Impact:

Various

Recommendation:

The Board of Education is requested to approve the Facilities Planning and Management contracts and Purchase Order for the OUSD school sites.

Eric,

Glad you and Steve were able to get together and things are moving on that front.

In order for us to place orders with the various manufacturers of the materials to be used in the audio system at Highland School, we will need an official purchase order showing Net 30 Day Terms from the date that all materials on the order have arrived at Leo's Warehouse and you are notified of same.

Please note that we are not involved in the installation and you are sourcing the equipment-only from Leo's Professional Audio, Inc.

The remittance within the Net 30 Day Terms is not tied to the completion of the installation, but from the date the materials are here for will-call by your installer, and that should be made clear on the PO.

I expect that will be approximately 3 weeks after receiving your purchase order.

I hope this addresses your questions clearly.

Best regards,

Mark Haynes, VP

Subject: FW: HIGHLAND School Audio Proposal

Mark,

I just got the ok and going forward with your revised quote for Highland Elementary dated 2/22/12 for \$19,143 (tax, shipping, everything included FOB to Leo's Pro) furnishing the material only for the MPR. We met with Steve (Reed Electric – Leo's Pro Installer) on 2/27/12 10:00am. We have the rough in dimensions and understand a little more about the speaker mounts and have a game plan for installation with Steve.

I want to check with you if any terms that I need to meet before I place the order and also I like to know if we have the district agreement form when we can have the material for Steve pick up and installation the earliest? Please advise. I will get the revised paper work going on my end today. I am going to a meeting on Highland this morning and will be available to talk about it after 1:00pm if you need, otherwise, please email me back to give me the lead time on the material listed (estimate time of arrival to your shop)? And we go from there. Any questions, please feel free to call me. Thank you very much for working with the school district and I look forward to complete this project successfully with your company.

Subject: HIGHLAND School Audio Proposal

Eric,

Also attached is the requote of our proposal, as requested. I will also compile some representative items to email you later that will show a bit of how the rack will appear, etc. and send it to you later.

Several Attachments here, the Lucasey Mounts are shown (basically an arm) to which the UPJ-1P Mounting Yoke is attached to, for the Left/Right speakers.

The MUB-UPJ will be used for the Center speaker above the stage and is a simple U-bracket.
