## SCANNING

ViaTRON has a very strict "No Page Left Behind" rule in regard to Document Scanning. Every page will be scanned and checked by our QC dept.

- All Scanning employees are trained and tested prior to start of project. Some employees are used throughout the project.
- Documents are provided by the ViaTRON Doc Prep Department free of any staples, paperclips, etc.... It is the Scanning operator's sole responsibility to be 100% focused on scanning pages in real time. Staff monitors each page as it is scanned and verified for image enhancement and image quality.
- Scanning is done by operator physically watching each image in real time. The operator physically touches and watches every page being processed.
- Scanning is done on an average of 200 pages per batch.
- Every batch of pages are scanned twice to insure page counts match.
- Any error messages (example: double feed) are recorded and checked for false-positive.
- All pages are scanned in both Color and Black & White simultaneously.
- All raw images are saved (No image-enhancements done) in case QC department has an issue they need to look back at.
- Scanners are cleaned and calibrated twice a day.
- All scanning employees are supervised in real-time.
- No pages are automatically deleted.
- ViaTRON does not use auto-deletion features in software as its not 100% accurate. Any blank page deletion is done manually and QC for accuracy afterwards.

## INDEXING

ViaTRON uses **ApplicationXtender** as well as Kofax and Kodak Capture Pro for indexing and separation of this project.

The process is simple,

1. Software identifies the barcode pages.
2. Automatically separates the batches.
3. The index value is presented to Data Entry employee for key entry.
4. Double-Key Entry: Another employee will read the same image and key in the index value. This is to insure by 99.9% accuracy there are no typos.

## **Document Conversion and Secure Cloud Imaging Solution**

5. Technical department runs report queries reviewing batches, batch sizes, index values compared to existing database.
6. Batches are then passed to our QC department to review for final errors.

## **QUALITY CONTROL**

### **Pickup and Delivery**

We use ViaTRON's vans/trucks to pick up and deliver boxes from/to the District offices. We have in-house employees (truck drivers) to perform all the pickup and delivery tasks. ViaTRON does not outsource this work. We do not allow third party companies to touch any of our clients' documents. It is very important to maintain the "chain of custody" for all documents/boxes picked up or delivered to the District.

### **Box Tracking**

In addition to the City's box number, ViaTRON creates an internal bar code control number and label for each box picked up. Any damaged boxes are photographed and tagged. The control numbers are entered into a central Project Management Tracking System. From this point forward the Project Management Tracking System will track the location, status and progress of that individual box. The City can check the condition or status of the box from the moment the box is picked up.

### **Double Check System**

Every task performed on the District project will be checked two times using a manual and an electronic control system. Employees' work will be checked by our Quality Assurance Department. The QA Employees' work will be checked by the department supervisor. The Supervisor's tasks will be checked by the project manager. Every Employee's work will be double checked.

### **Employee Control**

Each employee working on the District project will undergo a full review. Employees who have any connection (present or past) to the District will not be allowed to work on the project. An Employee will also not be allowed to work on the District project if they have an immediate family member working at City. ViaTRON performs a complete background check on all employees. Employees who have criminal records are not allowed to work at ViaTRON. All client boxes/documents are monitored very closely at three levels. It is impossible for any one person to have full access. Employees are trained for 40 hours specifically on the District documents before they are allowed to begin working on the project. All work performed by the employee is tracked and monitored by the Project Management Tracking System.

### **Box Control**

ViaTRON Production Center handles each box in a unique manner. The box is analyzed by content. A detailed log is prepared to identify the box contents: pages, folder, document size, condition of documents, condition of box, and index variations. This information is kept separately and later used to crosscheck the finished product. Any discrepancy will result in the full audit of the box.

### **Document Tracking**

ViaTRON's Central Project Management Tracking System tracks every employee who has come into contact of each document. For control purposes, we will be able to trace the individual tasks, date and time the file was accessed or worked on.

### **Document/Folder Control**

## **Document Conversion and Secure Cloud Imaging Solution**

Every document/folder in a box is checked twice. The first is performed by the Document Preparation Employee who does a physical count of the documents and creates a batch count report. This report is later crosschecked with the Final QA Report. We will need to get a 100% match, or the entire box is audited.

### **Image Control**

ViaTRON uses several types of sophisticated image enhancement software to improve the quality of the images during the scan process. ViaTRON sends each image through three electronic levels of image enhancement. Each of these levels is meant to improve the quality of the original image. In addition to electronic enhancements, ViaTRON also manually checks (QC) every image for accuracy.

### **Error Corrections**

ViaTRON corrects all image quality tasks within 24 hours. In most cases, image quality and enhancement are corrected in real-time. ViaTRON creates a Raw Image file of all documents as an automatic backup. In addition, the index fields are stored in a SQL database. This system was designed internally for auditing purposes. Any errors can be repaired immediately. Only in a few cases we may need to go back to the original paper to rescan. This can be done within a 24-hour period. Image repair, file separation and index correction can be done in real time and forwarded to City within 1 – 24 hours.

### **STAFF AND COMPANY EXPERIENCE - REFERENCES**

## Project Planning

The information provided has been prepared specifically for the Oakland Unified School District by the ViaTRON Data Conversion team. This information covers several important areas. The step-by-step procedures explain the manner in which ViaTRON would handle the Document Scanning Project in reference to the scope of work provided in the RFP.

## Project Meeting

ViaTRON will meet with the assigned key staff of each City department to develop a plan for the project including, but not limited to:

- Performing a page count (est. of pages, large format, etc....)
- Designing Scope of Work that includes items such as,
  - o If ViaTRON is required to pack the boxes.
  - o Document Prep rules
  - o Indexes
  - o QC measures
- Create draft timeline and milestones for completion.
- Sample boxes completed and reviewed by City Department for approval.
- Updated timeline and milestones based off Sample competition.

## Logistics - Document Transmittal

Prior to picking up boxes, ViaTRON will send a Project Manager to the Oakland Unified School District's locations to do the following task.

- Estimate the number of boxes
- Create barcode labels for the boxes

ViaTRON uses computerized tracking software to track the boxes before they leave the District. A unique barcode is attached to each box. The barcode tracks several pieces of key information. An automatic tracking report is generated that includes the following information:

- Box unique ID code
- Date of pickup
- Location of pickup
- All persons involved in the pickup transaction and travel log number.
- Work order must be signed outlining box count and manifest.

## File Packing/Box Sealing

- ViaTRON will send a team of employees to pick up the boxes for the Oakland Unified School District. All employees will go through a certified background check when handling court documents.
- Once all boxes are packed for delivery, ViaTRON will then seal all the boxes

## Pickup – ViaTRON Certified Employees

ViaTRON only uses ViaTRON employees to pick up boxes. ViaTRON has strict rules regarding the chain-of-custody regarding client documents.

## Document Conversion and Secure Cloud Imaging Solution

### OAKLAND UNIFIED SCHOOL DISTRICT - WAREHOUSE

900 High Street

Oakland, CA 94601

- ViaTRON does not outsource any freight services
- All pickup and deliveries are performed by ViaTRON trained employees
- The trucks are scheduled to only make one pickup at a time to prevent cross contamination of documents
- Drivers keep a detailed security log for each trip. The security log keeps track of departure time, pickup/delivery start, pickup/delivery end, and return to ViaTRON Storage Center
- A standby driver/team are in place to immediately assist in case of mechanical problems

### ViaTRON – Receiving

ViaTRON uses a double check system to verify all data. This procedure is used in receiving boxes from the District.

- When the truck arrives at ViaTRON facility, the boxes are moved to a holding area
- A barcode reader is used to verify the barcodes
- The verification is done by two managers
- The separate information is uploaded into the tracking software
- The software verifies the original data with the two manager scanned data
- The managers also check the boxes for damage and report it
- Any discrepancy is logged into the master quality control report
- Security issues if any will be resolved within 1 hour and City will be notified
- Box Tracking & Audit Report
- Every employee enters project work progress into the tracking report
- Every employee also enters quality control and monitoring info in quality control report
- The tracking report and quality control report are reviewed by the project manager several times throughout the day

### Document Preparation

- ViaTRON has a team of dedicated employees to perform the Document Prep work.
- ViaTRON will test 5 boxes for each class/category of documents to establish the PSR (Project Specific Rules). The test is to determine the most accurate and efficient method to prepare the folder to be scanned.
- All Document Prep employees will be trained on the PSR.
- Each Document Prep employee will be assigned one box at a time and tested for PSR accuracy.
- Removing paperclips and staples.
- Unfolding documents, repairing tears and dog-ears.
- Smoothing pages for clean feed.
- Unbinding books.
- Taping sticky notes onto blank page for scanning.
- Barcode templates provided to the District.
- Any non-paper items will be recorded down in the exemption report and returned.

### Document Preparation – Quality Assurance

- The Document Prep supervisor checks all boxes prepared by the Document Prep employees.
- The quality control report is updated if problems are found. Problems are resolved within 1 hour.
- The supervisor either accepts or send the work back for reprocessing.
- The tracking report is updated releasing the boxes to move to the next steps.

### Scanning

## Document Conversion and Secure Cloud Imaging Solution

- All scanning is done with an operator standing next to the scanner to make sure all pages are scanned accurately and to check for double feed errors.
- Special image enhancement software shall be used: de-speckling, de-skewing, image rotation, background suppression, adaptive threshold, edge enhancement, and gray tone filtering
- ViaTRON's scanner technicians will monitor the size, resolution and format of each document scanned using the tags/markers placed by the Document Prep team.
- The files will always be kept together. This will ensure the documents are always in the same order
- Recommend all documents will be scanned at 300 dpi for best quality. Additional DPI of 400 can also be achieved if required.
- Documents will be processed in single or Multi Page TIFF as per requested in RFP.
- ViaTRON will work with City departments during the test phase to develop the optimum results.
- All images can be processed with Searchable OCR at no extra charge.

## Document Scanning – Quality Control

- Each Image will be reviewed and if needed compared with the originals to ensure the best quality was obtained.
- Quality Control is done throughout the project life cycle,
  - During Document Prep. Staff will be able to identify pages that the scanners will have problems with or need to be taped to another blank sheet to process.
  - During scanning. Scan operators are able to locate/flag images that are not acceptable quality.
  - During Indexing. Index staff are looking for clarity of fonts and images.
  - During QC. Staff will be reviewing images for readability, orientation, and overall quality. Referring to the originals if needed.
- ViaTRON QC team will flag any image that isn't of accepted standards, for re-scanning.
- Quality is guaranteed, and re-scans are of no extra charge.

## Indexing

- ViaTRON software will automatically detect every target page that has a barcode separation page.
- ViaTRON's employee will manually index one document from one box at a time

## Double Key Indexing

ViaTRON performs double key ensure the highest quality of work.

- ViaTRON utilizes a blind key verification process, meaning that the verifier is unaware of the entries made by the other encoder. This process ensure that the indexed date is 100% accurate at the character level.

## Indexing Quality Assurance

- The system engineer performs data validation through character mix, date ranges, quantity ranges, including database lookup

## Scan on Demand

- ViaTRON Systems understands that the files are live, and the client may need access to files before the project is completed.
- If City has a request for a document, ViaTRON will locate the file and provide client with the scanned digital copy through our secured FTP site, email, or any other means preferred.

## Data Delivery

File Sharing Via Cloud Storage. ViaTRON has multiple approaches to data delivery. The typical method of delivery is through a password encrypted hard drive or DVD. Some clients choose the option to download via secured FTP site. ViaTRON is a SOC2 Compliant facility.

ViaTRON recommends delivering the data via Secure FTP using our File Share Cloud Storage utility.

## **EXHIBIT A - SCOPE OF BASIC SERVICES – BREAKDOWN BY DEPARTMENT – DISTRICT OFFICE AT 1000 BROADWAY & WAREHOUSE AT 900 HIGH STREET**

ViaTRON staff visited Oakland Unified School District for the Mandatory onsite walk through on April 20<sup>th</sup>, 2022. Based on the walk through ViaTRON shown files in cabinets as well as in Boxes for the OUSD District office located at 1000 Broadway Street and the offsite Warehouse located at 900 High Street. District office was multiple depts including – HR Active (Talent Files), HR ADSS, Payroll, Budget, Risk Management, Charter Schools, General Counsel, and Basement – Accounting Files. There are also 840 Cassette tapes that need to be converted.

**ViaTRON has estimated there are a total of 8,619,200 Pages from all sites.**

ViaTRON has proposed option for us to Box the files – provide empty banker Boxes and Staff to pack and Label Files for Transport.

At the **Warehouse location, located at 900 High Street**, there are HR Inactive fields. Most of the files are in Cabinets, and 20% of those are in boxes. ViaTRON has offered as an option to provide Boxes and Staff to Pack and Label the boxes for transport.

At THE district Office ViaTRON has included the **Boxes in the Basement of 1000 Broadway**. These consist of archive Vendor files, and Business Office records.

ViaTRON's plan is to pack boxes and load a big Truck (400-500 Boxes at a time). This will be the most efficient way to transport documents to **ViaTRON's secure SOC2 complaint facility for scanning**.

After scanning ViaTRON will **deliver a Hard drive for each dept with there files in PDF/A format**. ViaTRON also has a **Cloud Document Imaging System called ApplicationXtender**. The system is based on concurrent Users. ViaTRON has proposed as an option 10 Concurrent Users that the depts can share to access their secure images with a log on and User Name and Password.

Option: ViaTRON can provide option to upload to Scribble – however this would be an option due to extra technical work needed. This system is a 3<sup>rd</sup> party vendor and is a box-by-box upload – slow manual technical process.

Below is a detailed breakdown per dept that ViaTRON was shown during the walk through. ViaTRON created this breakdown by dept just in case you want to remove any depts as a phase 2.

**After scanning is 100% Complete ViaTRON can store the boxes for free for 2-3 months and then provide FREE document destruction as a service to Oakland Unified School District.**

## IMAGING SOLUTION BROCHURE – OPENTEXT APPLICATIONXTENDER

Solution overview

# OpenText ApplicationXtender

A single, integrated content services platform to help organizations quickly and easily manage content from capture to use in lead applications

Robust capture capabilities, including keyword extraction and automated metadata, with no need for additional modules

Flexible mechanism to connect content to the applications in which users work

Easy metadata management with documents linked to existing metadata libraries

Process-focused organization designed to mirror how users work

**OpenText™ ApplicationXtender has all the components to support an organization's content management needs. Combining a document repository with a full workflow engine and a full forms manager, ApplicationXtender gives organizations a way to approve everything from purchases to contracts without additional systems.**

ApplicationXtender is a low-touch system requiring minimal IT overhead. For users who live in Financial, Human Resources or Electronic Medical Records systems, it can provide a never-seen, back-end service that simplifies their work day. The REST services allow for full two-way connection between system of interaction and the content service.

For smaller organizations, ApplicationXtender provides a single solution for content management, business process management and forms automation. The user interface shows users only what they need to see and allows them to quickly get back to in-progress tasks. They can also kick off approval or notify users that tasks are ready from a single interface.

### Capture documents from any source

Whether it is an image from a file folder, a newly scanned invoice or coming directly from a Microsoft® Office product, ApplicationXtender provides multiple ways to ensure that all content brought into the organization is connected to the right business process. In addition to integrated web scanning, ApplicationXtender has a connector for Office Online Server (OOS) to directly edit and save Office documents.

# opentext

ApplicationXtender's ability to fit into a variety of processes and use cases makes it a unique product in the mid-market content services space. The inclusion of a full BPM engine and forms manager, in addition to a network of connectors to OpenText products, provides even more value to customers.

For organizations looking to leave paper behind, the Office Workflow Manager has a complete forms automation package for building, managing and storing information, without having to scan PDF forms.

### Put content to work

ApplicationXtender extends the reach of content into an organization's core systems. The web services, connectors and REST services ensure that users can access information both in the system or in a document by simply clicking on a link. ApplicationXtender uses standard REST service packages and web service languages so that content can be connected to any system.

### Easy metadata management

ApplicationXtender makes it straightforward to define documents so they can be properly stored and found by users. In addition to a full-text search of the extracted text from the integrated capture, users can design their own metadata lists that can be automatically filled based on completing a single drop-down linking metadata fields. For organizations with metadata databases, ApplicationXtender has a full range of database compatibilities for connecting to existing libraries, whether it is a purchase order list from the ERP, an ICD-10 code or a list of employees, and can ensure that the documents are linked to the appropriate business processes and compliance fields. For organizations with complicated metadata terms, ApplicationXtender has type-ahead for long lists that allows users to choose the right term, no matter how technical the word or phrase requirements.

### Process-focused organization of documents

Unlike many Content Services platforms, which are designed to mirror departments, ApplicationXtender is designed to mirror processes. From the granular permissions to the document-level security, ApplicationXtender provides a platform for getting work done. The granular search and saved search options that auto-update with new related documents enables users with a single method to track documents across all of the processes they work in during the day. The robust rendering engine provides a quick view of multiple pages so that users can look through large documents before opening the whole document to make sure it is the right one for their next task. Designed to mirror how users work, document folders can be based on a business process and not tied to departmental structures.

**BUSINESS LIABILITY COVERAGE FORM**

**(6) When You Are Added As An Additional Insured To Other Insurance**

That is other insurance available to you covering liability for damages arising out of the premises or operations, or products and completed operations, for which you have been added as an additional insured by that insurance; or

**(7) When You Add Others As An Additional Insured To This Insurance**

That is other insurance available to an additional insured.

However, the following provisions apply to other insurance available to any person or organization who is an additional insured under this Coverage Part:

**(a) Primary Insurance When Required By Contract**

This insurance is primary if you have agreed in a written contract, written agreement or permit that this insurance be primary. If other insurance is also primary, we will share with all that other insurance by the method described in c. below.

**(b) Primary And Non-Contributory To Other Insurance When Required By Contract**

If you have agreed in a written contract, written agreement or permit that this insurance is primary and non-contributory with the additional insured's own insurance, this insurance is primary and we will not seek contribution from that other insurance.

Paragraphs (a) and (b) do not apply to other insurance to which the additional insured has been added as an additional insured.

When this insurance is excess, we will have no duty under this Coverage Part to defend the insured against any "suit" if any other insurer has a duty to defend the insured against that "suit". If no other insurer defends, we will undertake to do so, but we will be entitled to the insured's rights against all those other insurers.

When this insurance is excess over other insurance, we will pay only our share of the amount of the loss, if any, that exceeds the sum of:

- (1) The total amount that all such other insurance would pay for the loss in the absence of this insurance; and
- (2) The total of all deductible and self-insured amounts under all that other insurance.

We will share the remaining loss, if any, with any other insurance that is not described in this Excess Insurance provision and was not bought specifically to apply in excess of the Limits of Insurance shown in the Declarations of this Coverage Part.

**c. Method Of Sharing**

If all the other insurance permits contribution by equal shares, we will follow this method also. Under this approach, each insurer contributes equal amounts until it has paid its applicable limit of insurance or none of the loss remains, whichever comes first.

If any of the other insurance does not permit contribution by equal shares, we will contribute by limits. Under this method, each insurer's share is based on the ratio of its applicable limit of insurance to the total applicable limits of insurance of all insurers.

**8. Transfer Of Rights Of Recovery Against Others To Us**

**a. Transfer Of Rights Of Recovery**

If the insured has rights to recover all or part of any payment, including Supplementary Payments, we have made under this Coverage Part, those rights are transferred to us. The insured must do nothing after loss to impair them. At our request, the insured will bring "suit" or transfer those rights to us and help us enforce them. This condition does not apply to Medical Expenses Coverage.

**b. Waiver Of Rights Of Recovery (Waiver Of Subrogation)**

If the insured has waived any rights of recovery against any person or organization for all or part of any payment, including Supplementary Payments, we have made under this Coverage Part, we also waive that right, provided the insured waived their rights of recovery against such person or organization in a contract, agreement or permit that was executed prior to the injury or damage.

**BUSINESS LIABILITY COVERAGE FORM**
