Background:
 (A one paragraph explanation of why the consultant's services are needed.)

ERS would work with the HS Network Superintendent team for the SY16-17 school year to support the alignment with the typical district school improvement planning documents and the subsequent use of School Designer for all high schools as part of the SY17-18 planning cycle.

Discussion:
 (QUANTIFY what is being purchased.)

ERS design cohort process organizes around the core objective of creating transformational designs in a subset of schools that better organize resources to improve student learning, thereby leading the way for greater strategy improvement at all schools. Specifically, ERS would support schools in ensuring rigorous credit accumulation through pathways supported by job-embedded professional development for common core implementation.
 ERS will start with a focus on high schools and is structured to be scaled across the other school levels over time. ERS would start with deep support for a cohort of 4-5 high schools – the three large comprehensives, Fremont and potentially one other pending OUSD follow up. ERS would supplement that deep support with training and do-it-yourself tools to build ongoing capacity within OUSD to apply to support at all traditional high schools, and follow it up with implementation support to ensure that the school designs come to fruition as imagined and are scalable across the entire district. Their proposal to focus on high schools initially stems from their work this year, the strength of relationship of high school network leadership and the clear need for support in connecting visions with actual resource use at the high school level. That said, in the following year ERS would expand outside of HS to scale an additional cohort as well as the tools and capacity-building efforts either to MS or across all levels, depending on district preference and capacity.
