ACC Project No: 1151 1151

Date Prepared: 10/9/2025

Prepared by: Ian Sutherland

ACC Environmental Consultants, Inc. (ACC) is proposing to characterize soils to be disturbed during planned installation of micropiles for purposes of soil waste characterization and for worker/community safety during soil disturbance.

Scope of Services

The proposed scope of services includes the advancement of eight (8) soil borings to 20 ft bgs, native soil, groundwater, and/or refusal for collection of soil samples. Two samples will be analyzed from each soil boring based on field observations including indications of potential contamination, observed fill material, changes in lithology, and/or other potential observations. One of the two analyzed samples will be from shallow soils. Samples will be collected a minimum of every four feet bgs (ft bgs). Samples not submitted for lab analyses will be stored at 6 degrees celsius or less. Groundwater sampling is not included in the proposed scope of work.

Samples will be analyzed by a California Department of Health (DPH)-certified laboratory. A California-licensed Professional Geologist will oversee all stages of the proposed work. The Client will be responsible for providing site access during regular business hours.

Project Set Up

ACC will obtain a drilling permit from Alameda County Public Works Agency (ACPWA). Permit approval can take up to 10 business days. ACC will subcontract a C-57 licensed driller with limited space drill rig and will provide additional tools and labor needed to complete the proposed work.

Proposed boring locations will be marked by ACC and subsequently cleared for subsurface utilities. ACC will contact underground services alert (USA) to notify public utility companies of the proposed soil boring locations.

Subsurface Sampling

Soil borings will be advanced using a limited-space, direct-push hydraulic rig equipped with 2.25-inch diameter drill rods. Recovered soil cores will be logged in the field and screened for presence of volatile organic compounds (VOCs) using a photoionization detector (PID). Exploratory soil borings will be backfilled to surface grade with neat cement slurry. Proposed costs include removal of investigation derived waste (IDW). Proposed costs are based on the assumption IDW is non-hazardous per state and federal regulations.

Soil samples will be collected by cutting off the ends of the recovered acetate soil liners and subsequently capping the ends with plastic sheeting and tight fitting plastic caps. Soils to be submitted for VOC analyses will be collected via EPA collection method 5035. Additional soil samples may be collected in laboratory-supplied wide-mouth glass jars.

Laboratory Analyses

Soil samples will be analyzed per typical California landfill/industry standards for soil waste characterization for: VOCs by method 5035/8260; total petroleum hydrocarbons as gasoline (TPH-g), diesel (TPH-d), and motor oil (TPH-mo) by 8015; CAM 17 Metals by 6020/7471; PCBs on dry weight basis (8082); organochlorine pesticides (8082); SVOCs (8270); asbestos by CARB 435; Chromium VI, and STLC/TCLP analyses as warranted per CA Title 22 and Federal RCRA hazardous waste criteria.

The proposed standard laboratory turn-around time for analytical results is 7 business days starting the day after sampling is completed. ACC cannot guarantee laboratory turn-around times.

Reporting

Analytical results will be compared to applicable Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs) and State of California and Federal hazardous waste criteria. ACC will prepare a digital report signed by an ACC California-licensed Professional Geologist that documents sampling methodologies, sampling locations, analytical results, conclusions, and recommendations. The report will include analytical results tables and a scaled site map depicting approximate sample locations.

Work will be scheduled upon receipt of a signed copy of this proposal. Scheduling is pending availability of subcontractors. In some cases laboratory turn around times can be decreased for additional costs not included in this proposal. ACC anticipates that the proposed work will take approximately four weeks from receipt of authorization to proceed. Work is subject to the attached T&Cs or existing T&Cs between ACC and OUSD.

EXCLUSIONS & LIMITATIONS

Proposed costs do not include work during nights and/or weekends. Proposed costs do not include costs associated with a public right-of-way encroachment permits, hazardous waste disposal, and additional sample cleanup costs occasionally required by the laboratory in order to achieve requested laboratory reporting limits. In the event that these conditions or circumstances are encountered, Client will be contacted prior to incurring additional costs.

Site conditions that could limit the findings of the pre-drilling subsurface utility clearance or subsurface geophysical survey include steel-reinforced concrete, parked cars, other metallic objects, limited access due to large objects and/or debris, and other potential unforeseen subsurface conditions, objects, or soil types. Soil borings will be backfilled with fast setting concrete flush with the adjacent ground surface, ACC shall not be responsible for damages to asphalt, concrete, or other ground surfaces at the soil boring locations.

No express or implied warranty or guarantee is included in or intended by the Agreement. No statements contained in any report, opinion, document or otherwise, whether prepared prior to, at the same time as, or subsequent to the Agreement constitute any warranty or guarantee by ACC as to the Work.

In the performance of Phase I Environmental Site Assessments ("Phase I ESA"), ACC shall conduct the investigation in conformance to industry standards and current professional practice and will be limited to visual observation of surface conditions at the site, interviews with public agency personnel and knowledgeable persons, and a review of readily available reports and literature. The likelihood of hazardous substance contamination resulting from past and current known uses of the site and immediately adjacent properties will be the focus of the Phase I ESA investigation. As a result, certain conditions

may not be identified in the report. These include contaminant plumes below the ground surface from a remote source; contamination incurred following the site reconnaissance by ACC; levels of contamination that are below current regulatory standards but exceed possible future standards; and naturally occurring chemical, biological or other toxics in the surface or subsurface environment.

It is possible that materials currently existing, or that may exist in the future, at the site may be considered hazardous. Regulatory evaluation criteria are constantly changing, and concentrations of contaminants presently considered low may, in the future, fall under more stringent regulatory standards that require remediation. Judgments and opinions expressed by ACC, which are based on our understanding and interpretation of current regulatory standards, should not be construed as legal opinions.

Unless otherwise noted in the proposal or scope of work, the following conditions apply to all Work:

1. **Contractor Services.** Contractor agrees to provide the following services to District (collectively, the “Basic Services”) for the **Roosevelt Middle School Modernization Project** (“Project”): To provide environmental services which consist of soil sampling, hazardous material testing, preparing a hazardous material survey and conducting data review, report writing and consulting services. The Basic Services include all work described in the October 12, 2021 proposal, which is attached to this Agreement as **Exhibit A**. 2. **Contractor Qualifications.** Contractor represents and warrants to District that Contractor, and all of Contractor’s employees, agents or volunteers (the “Contractor Parties”), have in effect and shall maintain in full force throughout the Term of this Agreement all licenses, credentials, permits and any other qualifications required by law to perform the Services and to fully and faithfully satisfy all of the terms set forth in this Agreement. Contractor and any Contractor Parties performing services shall be competent to perform those services.

3. **Term.** The term for performance of the Services shall begin on **October 27, 2022**, and shall end on **November 10, 2023** (“Term”), except as otherwise stated in Section 4 below, and Contractor shall complete the Services within the Term. There shall be no extension of the Term without an amendment signed by all Parties and approved by the District’s governing board. Written notice by the District Superintendent or designee shall be sufficient to stop further performance of the Services by Contractor or the Contractor Parties. In the event of early termination, Contractor shall be paid for satisfactory Services performed to the date of termination. Upon payment by District, District shall be under no further obligation to Contractor, monetarily or otherwise, and District may proceed with the work in any manner District deems proper.

4. **Termination.** Either party may terminate this Agreement at any time by giving thirty (30) days advance written notice to the other party. Notwithstanding the foregoing, District may terminate this Agreement at any time by giving written notice to Contractor if Contractor materially breaches any of the terms of this Agreement, any act or omission of Contractor or the Contractor Parties exposes District to potential liability or may cause an increase in District’s insurance premiums, Contractor is adjudged a bankrupt, Contractor makes a general assignment for the benefit of creditors or a receiver is appointed because of Contractor’s insolvency. Such termination shall be effective immediately upon Contractor’s receipt of the notice.

5. **Payment of Fees for Services.** District agrees to pay Contractor based on the hourly rates listed in **Exhibit B** for Services satisfactorily performed. Contractor shall not increase these hourly rates over the course of this Agreement. Contractor acknowledges that the not-to-exceed amount for Basic Services, above, includes contingency compensation in the event that more time and costs than originally anticipated may be necessary to complete the Basic Services. District agrees to make payment within thirty (30) days of receipt of a detailed invoice from Contractor based on worked and rates, including any additional supporting documentation that District reasonably requests. Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations of indemnity, which would otherwise exist as to a party, person, or entity described in this paragraph.

7. **Equipment and Materials.** Contractor at its sole cost and expense shall provide and furnish all tools, labor, materials, equipment, transportation services and any other items (collectively, "Equipment") which are required or necessary to perform the Services in a manner which is consistent with generally accepted standards of the profession for similar services.
