There shall be no extension of the Term without an amendment signed by all Parties and approved by the District’s governing board. Written notice by the District Superintendent or designee shall be sufficient to stop further performance of the Services by Contractor or the Contractor Parties. In the event of early termination, Contractor shall be paid for satisfactory Services performed to the date of termination. Upon payment by District, District shall be under no further obligation to Contractor, monetarily or otherwise, and District may proceed with the work in any manner District deems proper.

Project Team

Resumes and our Employee Certification chart are included as Additional Data in the Appendix.

2.3.1-2.3.5 Approach to Scope of Work

ACC agrees to provide all services as described under “Section E. Basic Services & Section F. Scope of Work”. We understand that the District is looking for a consultant to provide hazardous material abatement consulting services associated with the West Oakland Middle School Window Replacement Project. ACC will complete the

full scope of work detailed in “Section F. Scope of Services”. ACC understands and is fully qualified to provide the full Scope of Work detailed in this RFP/Q.

ACC’s dedicated project manager, Steve Jackson will work with the District’s team to develop a detailed approach and work plan for each site and it’s identified project scope of work outlined in the RFQ/P.

Below is an example narrative of ACC’s general approach, safety and quality control measures to Hazardous Material Abatement Consulting Projects.

Field Survey Work: ACC will review existing survey reports and sample results available for each building. If the site inspection confirms that existing sampling is adequate and the data will be included on ACC material data forms as having already been sampled previous and this information will be included in the final report.

Upon the commencement of a hazardous materials survey, ACC will proceed in the following manner; 1) conduct a walk-through of the building take an inventory of all suspect building materials and components that will require testing for asbestos and/or lead and note each suspect material on the ACC’s Material Information Form; 2) While taking inventory of all suspect asbestos and/or hazardous materials or components that will require sampling, ACC will also be filling out the Building Information Form, which provides all the details on the make up of the structure, age, length, width, type of construction, square footage, make up of both interior and exterior walls, floors, ceilings and mechanical systems. Typically this form is used on commercial and more complex structures. 3) Upon completing the inventory of all suspect materials that will require sampling, ACC will inspect the site and determine the presence and number of suspect materials to be sampled at the site. 4) ACC will obtain the appropriate number of samples in accordance with the related material using appropriate methods for sampling. 5) Lastly ACC will construct a floor plan sketch of the property showing all rooms, bathrooms, closets, etc. so that material and sample locations in the report can be located more easily by the reader.

The survey of each buildings’ MEP systems and building components will identify all impacted hazardous materials, including, but not limited to:

1. Asbestos
2. Lead
3. Mercury
4. Polychlorinated Biphenyls (PCBs)
5. Refrigerants
6. Chemicals
7. Solvents
8. Heating oils and hydraulic fluids that might be disturbed by the building project.
9. Mold (sampling and testing of mold found in areas including but not limited to crawl spaces and concealed ceiling spaces)

Preparation of Survey Reports

Data collected during the survey is documented on ACC's Survey Data Forms, including the Material Information Form, Building Information Form and Chain of Custody with Sample Location Form. Quantities of materials, description of material locations and any damaged conditions of materials will be entered into final report. Sample results are entered into the report as soon as they are received from the laboratory.

A draft report is prepared and reviewed by the project manager (CAC and or CIH) and upon completion of the review the final Draft report is generated and provided to OUSD for review and comment. Upon completion and if there are no unanswered questions after review of the report, a final report will be issued including five (5) hard copies as well

as an electronic version in PDF Format. **The report will contain all requirements listed in the RFQ/P and agreed upon with the District.**

Project Design: Design of Asbestos Containing Materials, Lead-Based Paint/Lead-Containing Materials and Other Hazardous Substances Methodologies and Specification and Monitoring Lead-Based Paint/Lead-Containing Materials, Asbestos and Other Hazardous Substances Abatement work will be prepared as needed based on our findings.

Abatement Design, Specification and Bidding Assistance: ACC provides cost effective and safe abatement methodologies incorporating the best project management principals in accordance with local, state and federal regulations. ACC will work with the District to develop comprehensive construction documents for the abatement and management process.

Laboratories

All outside laboratories used by ACC are fully accredited by DOHS and participate in NIOSH (PAT), AIHA, ELPAT, and NAVLAP. ACC selects outside laboratories based on accreditation, timeliness (contracted turn around time) and accuracy of samples submitted for analysis.

ACC works with these labs on a daily basis and is able to negotiate both best costs and services for all forms of sample analysis. All laboratories publish and follow approximately the same time frames for turn around of sample analysis. Ensuring the best service from the lab however requires the consultant to communicate properly with the labs as well as to execute best practices in obtaining samples and transmitting them to the laboratory.

Regulatory Compliance and Safety Observation

ACC project managers and technicians have all completed their asbestos and lead-based paint certification courses, as well as several other Hazardous Material certification courses (detailed in our Technical Certification chart in the attachments), which require them to possess and demonstrate a thorough knowledge of all applicable regulations. In addition, ACC holds semi-monthly staff meetings where any changes in regulations or enactment of new regulations are discussed.

ACC project management personnel have frequent contact with Air Quality Management District and Cal/OSHA inspectors who often visit our job sites. ACC's project managers always tour the site with the regulator and if requested make any suggested modifications. ACC has never had a project cited by a regulator.

Quality Assurance and Quality Control

ACC employs methods and tools that assure quality outcomes and quality controls for all of our work. ACC's staff will follow a comprehensive Quality Control Plan to guarantee that all required services are provided to OUSD as specified in this RFQ/P.

ACC has developed proprietary software programs for survey work to assist inspectors in the gathering and recording of information in standardized format. This certifies that our clients receive documentation that is consistent from project to project. Our Field Technicians use tablets in the field and upload project documentation to internal servers daily for review by project managers. Client access to daily documentation is available upon request.

This standardized format also acts as a built in quality assurance mechanism by requiring our staff to be thorough and accurate when gathering project data. Accuracy in data gathering allows for development of precise scopes of work that reflect the true requirements of projects, leading to the best opportunity for fair and accurate bids. This,

combined with our depth of experience helps us prepare clear and well-defined specifications that minimize the possibility for costly change orders.

2.4 *Litigation*

ACC has no litigation from any projects.
