Contractor agrees to perform such Services as expeditiously as is consistent with professional skill and care and the orderly progress of the Services and the Project. All services performed by the Contractor under this Agreement shall be conducted in a manner consistent with the level of care and skill ordinarily exercised by type of consultants specially qualified to provide the services required by the District.

2. **Contractor Qualifications.** Contractor represents and warrants to District that Contractor, and all of Contractor’s employees, agents or volunteers (the “Contractor Parties”), have in effect and shall maintain in full force throughout the Term of this Agreement all licenses, credentials, permits and any other qualifications required by law to perform the Services and to fully and faithfully satisfy all of the terms set forth in this Agreement. 5. **Payment of Fees for Services.** District agrees to pay Contractor based on the hourly and unit rates listed in *Exhibit B* for Services satisfactorily performed. Contractor shall not increase these hourly or unit rates over the course of this Agreement. Total fees paid by District to Contractor for Services under the Agreement shall not exceed **TWENTY-TWO THOUSAND FOUR HUNDRED FORTY-TWO DOLLARS AND TWENTY CENTS (\$22,442.20)**, which consists of a not-to-exceed amount of **TWENTY THOUSAND FOUR HUNDRED-TWO DOLLARS (\$20,402.00)** for performance of the Basic Services, and a not-to-exceed contingency amount OF **TWO THOUSAND FORTY AND TWENTY CENTS (\$2,040.20)** for performance of any Additional Services. Contractor acknowledges that the not-to-exceed fee for Basic Services, above, includes contingency compensation in the foreseeable event that more time and costs may be necessary to complete the Basic Services. Contractor shall not submit its invoices to District more frequently than monthly. Contractor will not be compensated for any Basic or Additional Services required as a result of wrongful acts or omissions.

Such obligation shall not be construed to negate, abridge, or reduce other

rights or obligations of indemnity, which would otherwise exist as to a party, person, or entity described in this paragraph. The indemnification provided for in this Section 6 includes, without limitation to the foregoing, claims that may be made against District by any taxing authority asserting that an employer-employee relationship exists by reason of this Agreement, and any claims made against District alleging civil rights violations by Contractor or Contractor Parties under the California Fair Employment and Housing Act (“FEHA”).

Furthermore, District may reject any Equipment or workmanship that does not conform to the requirements of this Agreement and Contractor must then promptly remedy or replace it at no additional cost to District and subject to District’s reasonable satisfaction.

All insurance policies shall include an endorsement stating that District and District Parties are named additional insureds. All of the policies shall be amended to provide that the insurance shall not be suspended, voided, canceled, reduced in coverage or in limits except after thirty (30) days’ prior written notice has been given to District. If such a notice is not given or even if District receives a notice, District may, at its sole option, terminate this Agreement. All insurance policies shall include an endorsement stating that it is primary to any insurance or self-insurance maintained by District and shall waive all rights of subrogation against District and/or the District Parties. A copy of the declarations page of Contractor’s insurance policies shall be attached to this Agreement as proof of insurance.

### 2.3 Scope of Work

ACC has surveyed thousands of buildings, including managing and designing over 20,000 hazardous material abatement projects. Our approach to surveys, project design and project management is quality focused, aimed at taking risk out of the equation while providing comprehensive and accurate reporting, design and oversight.

**ACC has provided as-needed environmental consulting services to the OUSD since 1993 and we look forward to being considered for the East Oakland Pride Site Improvement Project.** Past example projects include: hazardous material abatement consulting, asbestos surveys, lead-paint surveys, hazardous material surveys, mold and biological investigations, modernization projects, AHERA reinspections, final clearances and soil sampling.

ACC’s Project Managers and field staff members are Certified Asbestos Consultants, Certified Industrial Hygienists, Site Surveillance Technicians, and California Department of Public Health Lead Inspector/Risk Assessors/ Supervisors/Monitors. Our team is National Institute of Occupational Safety and Health (NIOSH) 583 trained and ACC participates in the American Industrial Hygiene Association’s (AIHA) Proficiency Analytical Testing (PAT) Program. ACC maintains all the necessary equipment and the facility required to provide Phase Contrast Microscopy on-site or in our laboratory. Our qualified team has extensive experience with the Office of Public School Construction, the California Building Code, the California Green Building Standards Code, and other applicable California Code of Regulations.

**Resumes and our Employee Certification chart are included as Additional Data in the Appendix.**

#### 2.3.1-2.3.5 Approach to Scope of Work

ACC agrees to provide all services as described under “Section B. Basic Services”. We understand that the primary role of the selected hazardous material abatement consultant will be to identify all hazardous material for the demolition of nine (9) portables manufactured between 1997 to 1998, to produce construction documents for its abatement, removal and management of these materials associated with the construction project. And, that the

consultant shall provide monitoring services during the construction phase of the project to insure activities comply with the contract documents and applicable laws and regulations. ACC will complete the full scope of work detailed in “**Section C. Statement of Work**”. ACC understands and is fully qualified to provide the full Scope of Work detailed in this RFP/Q.

**ACC’s dedicated project manager, Steve Jackson will work with the District’s team to develop a detailed approach and work plan for each site and it’s identified project scope of work outlined in the RFQ/P.**

Below is an example narrative of ACC’s general approach, safety and quality control measures to Hazardous Material Abatement Consulting Projects.

**Field Survey Work:** ACC will review existing survey reports and sample results available for each building. If the site inspection confirms that existing sampling is adequate and the data will be included on ACC material data forms as having already been sampled previous and this information will be included in the final report.

Upon the commencement of a hazardous materials survey, ACC will proceed in the following manner; 1) conduct a walk-through of the building take an inventory of all suspect building materials and components that will require testing for asbestos and/or lead and note each suspect material on the ACC’s Material Information Form; 2) While taking inventory of all suspect asbestos and/or hazardous materials or components that will require sampling, ACC will also be filling out the Building Information Form, which provides all the details on the make up of the structure, age, length, width, type of construction, square footage, make up of both interior and exterior walls, floors, ceilings and mechanical systems. Typically this form is used on commercial and more complex structures. 3) Upon completing the inventory of all suspect materials that will require sampling, ACC will inspect the site and determine the presence and number of suspect materials to be sampled at the site. 4) ACC will obtain the appropriate number of samples in accordance with the related material using appropriate methods for sampling. 5) Lastly ACC will construct a floor plan sketch of the property showing all rooms, bathrooms, closets, etc. so that material and sample locations in the report can be located more easily by the reader.

The survey of each buildings’ MEP systems and building components will identify all impacted hazardous materials, including, but not limited to:

1. Asbestos
2. Lead
3. Mercury
4. Polychlorinated Biphenyls (PCBs)
5. Refrigerants
6. Chemicals
7. Solvents
8. Heating oils and hydraulic fluids that might be disturbed by the building project.
9. Mold (sampling and testing of mold found in areas including but not limited to crawl spaces and concealed ceiling spaces)

### **Preparation of Survey Reports**

Data collected during the survey is documented on ACC's Survey Data Forms, including the Material Information Form, Building Information Form and Chain of Custody with Sample Location Form. Quantities of materials, description of material locations and any damaged conditions of materials will be entered into final report. Sample results are entered into the report as soon as they are received from the laboratory.

A draft report is prepared and reviewed by the project manager (CAC and or CIH) and upon completion of the review the final Draft report is generated and provided to OUSD for review and comment. Upon completion and if there are Response to RFQ/P for Hazardous Material Abatement Consulting Services for East Oakland Pride

no unanswered questions after review of the report, a final report will be issued including five (5) hard copies as well as an electronic version in PDF Format. **The report will contain all requirements listed in the RFQ/P and agreed upon with the District.**

**Project Design:** Design of Asbestos Containing Materials, Lead-Based Paint/Lead-Containing Materials and Other Hazardous Substances Methodologies and Specification and Monitoring Lead-Based Paint/Lead-Containing Materials, Asbestos and Other Hazardous Substances Abatement work will be prepared as needed based on our findings.

**Abatement Design, Specification and Bidding Assistance:** ACC provides cost effective and safe abatement methodologies incorporating the best project management principals in accordance with local, state and federal regulations. ACC will work with the District to develop comprehensive construction documents for the abatement and management process.

### **Laboratories**

All outside laboratories used by ACC are fully accredited by DOHS and participate in NIOSH (PAT), AIHA, ELPAT, and NAVLAP. ACC selects outside laboratories based on accreditation, timeliness (contracted turn around time) and accuracy of samples submitted for analysis.

ACC works with these labs on a daily basis and is able to negotiate both best costs and services for all forms of sample analysis. All laboratories publish and follow approximately the same time frames for turn around of sample analysis. Ensuring the best service from the lab however requires the consultant to communicate properly with the labs as well as to execute best practices in obtaining samples and transmitting them to the laboratory.

### **Regulatory Compliance and Safety Observation**

ACC project managers and technicians have all completed their asbestos and lead-based paint certification courses, as well as several other Hazardous Material certification courses (detailed in our Technical Certification chart in the attachments), which require them to possess and demonstrate a thorough knowledge of all applicable regulations. In addition, ACC holds semi-monthly staff meetings where any changes in regulations or enactment of new regulations are discussed.

ACC project management personnel have frequent contact with Air Quality Management District and Cal/OSHA inspectors who often visit our job sites. ACC's project managers always tour the site with the regulator and if requested make any suggested modifications. ACC has never had a project cited by a regulator.

### **Quality Assurance and Quality Control**

ACC employs methods and tools that assure quality outcomes and quality controls for all of our work. ACC's staff will follow a comprehensive Quality Control Plan to guarantee that all required services are provided to OUSD as specified in this RFQ/P.

ACC has developed proprietary software programs for survey work to assist inspectors in the gathering and recording of information in standardized format. This certifies that our clients receive documentation that is consistent from project to project. Our Field Technicians use tablets in the field and upload project documentation to internal servers daily for review by project managers. Client access to daily documentation is available upon request.

This standardized format also acts as a built in quality assurance mechanism by requiring our staff to be thorough and accurate when gathering project data. Accuracy in data gathering allows for development of precise scopes of work that reflect the true requirements of projects, leading to the best opportunity for fair and accurate bids. This, Response to RFQ/P for Hazardous Material Abatement Consulting Services for East Oakland Pride

combined with our depth of experience helps us prepare clear and well-defined specifications that minimize the possibility for costly change orders.
