Subject: LBU Recommendation - Scope Specific - Geotechnical/Geohazard Consultant Services

Greetings Ms. Chatman and Mr. Jang,

As per the Oakland Unified School District's Local Business Policy Program Requirements Section of AR 7115: There is a fifty (50) % minimum participation requirement for all formally bid public works construction contracts over \$45,000 and formally solicited construction related professional services contracts, including, but not limited to, architects, construction managers, inspectors, testing labs and geotechnical engineers, over \$84,100.

Prior to the issuance of a formal invitation for bid, the District shall ensure that there are at least three certified businesses listed in the industry, trade or profession that constitutes a major category of work. If at least three L/SL/SLRBEs are not certified, then the requirement may, subject to the discretion of the District, be waived, or the 50% requirement may be reset from 50% all the way to 0%, depending on the particular circumstances at time of bid.

Scope: Geotechnical/Geohazard Consulting Services

Analysis:

An availability analysis has been conducted for NAICS code: 541620 - Environmental Consulting Services and NAICS code: 541360 - Geophysical Surveying and Mapping Services, to determine the availability of certified firms to meet local business utilization on projects. Upon investigation and outreach, at least five confirmed, certified, and interested Oakland-based firms were identified as eligible to meet the District's local business requirements. Based on the current availability of small and local firms, it is our recommendation that the 50% LBU Requirement be reduced to 25% - inclusive of SLBE and/or LBE participation.

LBU Recommendation:

[LBU Modification - Reduced Requirement](#)

For the above referenced scope, wherein the project value is anticipated to exceed \$84.1K, the LBU Requirement may be met with a modified 25% Cumulative Local Business Participation - inclusive of Small Local Business Enterprise (SLBE) and/or Local Business Enterprise (LBE) Participation. Projects anticipated to fall under the \$84.1K threshold for this scope remain exempt from the Local Business Requirement, at this time.

If any questions, please feel free to contact our team at any time.

Sincerely,

Tiffany Knuckles

17. **Governing Law.** This Agreement shall be governed by and construed in accordance with the laws of the State of California, excluding its choice of law rules. Any action or proceeding seeking any relief under or with respect to this Agreement shall be brought solely in the Superior Court of the State of California for the County of Alameda, subject to transfer of venue under applicable State law, provided that nothing in this Agreement shall constitute a waiver of immunity to suit by the District.

18. **Written Notice.** Written notice shall be deemed to have been duly served if delivered in person to Contractor at the address located next to the party signatures below, or if delivered at or sent by registered or certified or overnight mail to the last business address known to the person who sends the notice.

Scope of Services

{SR801406}9

Atlas received information in the RFQ/P and understands the proposed project consists primarily of replacing the synthetic turf above the existing E-layer with possible optional upgrade to install synthetic turf and E-layer for the Multi-Use Field and Baseball/Softball Field at three school sites. The requested scope for geotechnical engineering services as outlined in the RFQ/P were based on the recommendations made by Verde Design in their July 2024 Field Assessment reports for Oakland High School (HS), and ICS and TCN Elementary School (ES), and by Cupples Keller in their June 28, 2024, field assessment report for McClymonds HS. The tasks for the services requested in the RFQ/P scope of work in items 2.3.1 through 2.3.6 are referenced in our scope of work as **Phase A** tasks. In addition, the RFQ/P scope of work in item 2.3.7 requested geotechnical engineering services during construction and is referenced in our scope of work as **Phase B** tasks. The proposed tasks for the requested scope of work for Phase A and B as generally described in this section are applicable for the three school sites unless stated otherwise.

2.3.1 Preliminary Field Activities

1. Coordinate and arrange site access for site reconnaissance.
2. Obtain site access, mark the location of the subsurface explorations at the site and contact Underground Service Alert.
3. Utilize an underground utility locating subcontractor to define/clear the boring locations of existing buried utilities, as appropriate and contact Underground Service Alert-North (USA).
4. Obtain a drilling permit from Alameda County Public Works for the soil borings.

2.3.2 Field Exploration

1. As requested, the field exploration program will consist of drilling nine (9) borings (1x30', 4x10' and 4x5') at Oakland High School site, six (6) borings (2x50', 2x10' and 2x5') at ICS/TCN site, and seven (7) borings (2x30', 2x10', 3x5') at McClymonds High School site. Borings deeper than 10 feet would be drilled by a truck-mounted drill rig equipped with solid stem augers. The borings will be drilled at the locations shown the field assessment reports (Verde Design 2024, Cupples Keller 2024). We note that the mobilization of the drilling equipment at the desired boring locations may adversely impact the existing E-layer and should be assessed prior to the commencement of Phase A tasks.
2. Sampling will occur in roughly five-foot intervals in the borings, with more frequent sampling within the uppermost 10 feet. The soil will be sampled with a Modified California sampler fitted with six-inch long inner brass liners or a Standard Penetration Test (SPT) split spoon sampler. The relatively undisturbed liner samples will be sealed and the SPT samples will be placed in plastic bags. The samplers will be driven 18 inches with a 140-pound hammer with an approximate 30-inch drop. Blow counts for the last foot will be logged as the penetration resistance. The blow counts from the SPT sampler will be utilized to determine subsurface soil characteristics for correlation with USCS soil types. Bulk soil samples may be obtained from the upper few feet of auger cuttings in the borings.
3. If encountered, groundwater level at the completion of drilling will be recorded for each boring.
4. The boreholes will be backfilled with Portland cement grout.
5. Conduct up to eight (8) in-situ infiltration rate tests.

2.3.3 Laboratory Testing

1. Specific gravity, ASTM D854.
2. Moisture/Density, ASTM D2216/D2937.
3. Atterberg limits ASTM D4318 (ICS/TCN and McClymonds).
4. Sieve Analysis, ASTM D6913.
5. Soil Compaction, ASTM D1557.
6. Falling Head Permeability, ASTM D5084.
7. Durability index, ASTM D3744 | CTM 229.
8. Abrasion of coarse aggregate by LA Rattler, ASTM C131 | CTM 211.

2.3.4 Geology and Geologic Hazards Study

The geotechnical engineering study will also include geology and geologic hazard study to meet Title 24 requirements for site investigation, including the most recent Note 48 CGS requirements for geohazard studies, as enforced by DSA. The geotechnical investigation procedure shall be conducted in general accordance with the requirements in the CBC 2022 Sections 1803A.3 and 1803A.5.

2.3.5 Report Preparation

A Geotechnical and Geohazard Study report will be prepared and will contain a site plan showing the actual boring and percolation test locations, logs of test borings, laboratory test data, and a summary of site soil and groundwater conditions. The report will contain but not necessarily be limited to, the following information:

- General site grading, including site preparation, drainage and subdrainage, excavation, allowable engineered fill materials, including reuse of onsite soil materials as engineered fill; grading and fill compaction.
- Synthetic turf subgrade preparation recommendations.
- General site geology and seismicity discussion.
- Discussion of relative permeability of the existing native field subgrade based on percolation test results.
- Feasible foundation support options (e.g., footing foundations, drilled pier foundations) for minor structures.
- Specific design recommendations for project foundations for site features, including bearing or axial support capacities, minimum dimensions and embedment, and lateral load resistance (friction coefficient and passive pressures).
- Retaining wall recommendations, including foundation design, lateral pressures, and subdrainage.
- Flatwork subgrade preparation.
- Flexible asphalt and rigid pavement designs and pavement subgrade preparation recommendations.

2.3.6 Supplemental Engineering Review/Consultations/meetings

Consultation during design may be required to provide information to other engineers or architects on the design team. We will review geotechnical aspects of the project plans and calculations, as appropriate. We will also coordinate with the design team if we have any comments that need to be incorporated into the plans. We will prepare a letter confirming our review if such is required for Building Permit purposes. We will participate in client and design team meetings per your request. These services would be provided on a Time and Materials (T&M) basis in accordance with our attached Schedule of Fees. For budgeting purposes, we established a minimum T&M budget as proposed in the cost estimate.

2.3.7 Construction Phase Geotechnical Services

- Pre-construction testing of permeable rock and other aggregates.
- In-situ and rock sampling at quarry (sampling every 500 tons).
- Submittal reviews and response to geotechnical-related RFIs.
- Project Manager attendance at construction site meetings and site visits for geotechnical consultations, as needed.
- Site visit to collect a sample of backfill material, and subsequent transport to our Oakland testing laboratory.
- Maximum density/optimum moisture (Modified Proctor compaction) testing (ASTM Test Method D1557) will be performed on bulk soil samples as needed.
- Foundation review for piers excavations.
- Observation and compaction testing during demolition backfill, site grading, and underground utility trenches backfill using a nuclear gauge (ASTM Test Method D7759) during construction to confirm the project minimum compaction requirements are met.

- Observation for footings and drilled piers excavation and construction.
- Review of concrete mixes for conformance with specifications.
- Sample, tag and test reinforcing steel in accordance with ASTM A615.
- Batch plant inspection and concrete sampling.
- Concrete compression testing in accordance with ASTM requirements.
- Structural steel shop and field inspections.
- Project coordination and engineer's review of Daily Field Reports (DFRs) prepared to document field observations and test results during construction.
- Submit reviewed final version DFRs to the DSA Project Inspector and other Client-authorized field representatives on a regular basis.
- Prepare DSA interim and final certifications (DSA 293) as project GEOR and other reports of our observations and testing at the completion of construction of the project, as needed.

2.3.8 Schedule

The preliminary field activities and the field exploration proposed in Phase A is anticipated to occur within one and two weeks after the receipt of your NTP followed by the transmittal of preliminary geotechnical recommendations to the design team. We will deliver the geotechnical and geohazard investigation reports before July 4, 2025. Additionally, we will make every effort to accommodate other adjustments to the proposed schedule to more closely meet the needs of the design team, if possible, subject to constraints regarding completion of field exploration and subsequent laboratory testing. The schedule for Phase B will be coordinated based on the request of your field representative for our services during construction.

Subject: LBU Recommendation - Scope Specific - Geotechnical/Geohazard Consultant Services

Greetings Ms. Chatman and Mr. Jang,

As per the Oakland Unified School District's Local Business Policy Program Requirements Section of AR 7115: There is a fifty (50) % minimum participation requirement for all formally bid public works construction contracts over \$45,000 and formally solicited construction related professional services contracts, including, but not limited to, architects, construction managers, inspectors, testing labs and geotechnical engineers, over \$84,100.

Prior to the issuance of a formal invitation for bid, the District shall ensure that there are at least three certified businesses listed in the industry, trade or profession that constitutes a major category of work. If at least three L/SL/SLRBEs are not certified, then the requirement may, subject to the discretion of the District, be waived, or the 50% requirement may be reset from 50% all the way to 0%, depending on the particular circumstances at time of bid.

Scope: Geotechnical/Geohazard Consulting Services

Analysis:

An availability analysis has been conducted for NAICS code: 541620 - Environmental Consulting Services and NAICS code: 541360 - Geophysical Surveying and Mapping Services, to determine the availability of certified firms to meet local business utilization on projects. Upon investigation and outreach, at least five confirmed, certified, and interested Oakland-based firms were identified as eligible to meet the District's local business requirements. Based on the current availability of small and local firms, it is our recommendation that the 50% LBU Requirement be reduced to 25% - inclusive of SLBE and/or LBE participation.

LBU Recommendation:

[LBU Modification - Reduced Requirement](#)

For the above referenced scope, wherein the project value is anticipated to exceed \$84.1K, the LBU Requirement may be met with a modified 25% Cumulative Local Business Participation - inclusive of Small Local Business Enterprise (SLBE) and/or Local Business Enterprise (LBE) Participation. Projects anticipated to fall under the \$84.1K threshold for this scope remain exempt from the Local Business Requirement, at this time.

If any questions, please feel free to contact our team at any time.

Sincerely,

Tiffany Knuckles
