RE: **Proposal for Hazardous Materials Consulting Services**
Early Childhood Education Center Fire Alarm System Upgrades
2660 East 16th Street, Oakland, CA
SCA Proposal No: SCA-17-023

Dear Toby:

SCA Environmental, Inc. (SCA) is pleased to provide this proposal for asbestos and lead-based paint consulting services as part of the Early Childhood Education Center Fire Alarm System Upgrade Project. SCA understands that the majority of work will involve surface-mounting devices; however, new cores will need to extend through the upper walls to extend the system into individual rooms and wetted sponge procedures may be necessary to mount conduit and new equipment to ACM and/or painted substrates. Work will involve controlled renovation procedures to minimize dust generated and mitigate impacts of coring or anchoring to asbestos or lead-based paint substrates. Coring activities will be consolidated to allow for monitoring of this portion of work only and to minimize SCA's time on-site monitoring. Based on SCA's experience, these control procedures can be completed within 3 shifts.

Scope of Work

SCA will provide its trained staff to complete the following tasks:

Task A: 100% CD Documents

1. Collect asbestos, lead-based paint and hazardous materials data from the District's files, where available.
2. Visit the site to familiarize ourselves with site conditions, and conducted supplemental bulk asbestos and XRF sampling.
3. Prepare detailed hazardous materials controlled renovation plans and specifications.

Task B: Other Services

1. Attend 1 bid walk and 1 pre-construction meeting.

Task C: Abatement Monitoring Phase

1. Provide the services of a Cal/OSHA "Certified Site Surveillance Technician" (CSST) or Certified Asbestos Consultant (CAC) under the direct supervision of a Certified Industrial Hygienist (CIH) to provide environmental quality assurance services including perimeter air quality monitoring and inspection of coring procedures during all asbestos-related work. Air samples will be collected in key locations and analyzed the same day that they were collected. Air samples will be analyzed at SCA's contract NVLAP-accredited laboratory, using phase contrast microscopy (PCM) in accordance with the National Institute for Occupational Safety and Health (NIOSH) method 7400. OUSD's Project Manager will be promptly notified (the following day) of any unacceptable results.
2. Provide the services of CDPH Certified Lead Inspector, Assessor or Monitor under the direct supervision of a Certified Industrial Hygienist (CIH) to provide environmental quality assurance services including

perimeter air quality monitoring and inspection of coring and anchoring procedures during all lead hazard work. Representative air samples will be collected in key locations and analyzed the same day that they were collected to illustrate that dust control procedures are adequate. Air samples will be analyzed at SCA's contract NELAP-accredited laboratory, McCampbell Analytical, Inc. in Pittsburg, CA, using ICP/MS analytical procedures. OUSD's Project Manager will be promptly notified of any unacceptable results.

3. Review the Contractor's pre-job submittals and preparation of the work area, prior to commencement of asbestos abatement procedures. The results of that review will be promptly reported to OUSD's Project Manager, along with SCA's recommendations on remedial actions needed prior to proceeding.
4. Perform periodic observations of the Contractor's work area, to document that work is being carried out safely and in compliance with the requirements of the specification, and to collect abatement progress data.
5. Provide the services of appropriate senior professional personnel to advise OUSD on technical matters arising during the course of the asbestos removal.
6. Maintain a record of all relevant observations and findings made during the abatement project. A copy of this record will be provided to OUSD at the completion of the project.
7. Provide OUSD with daily reports on the abatement project. A comprehensive final report will be presented to OUSD within one month of completion of the abatement project.
8. Provide final asbestos clearance inspections and testing as outlined in the Project Specifications. This will include a rigorous visual inspection of all work surfaces to ensure that visible debris is not left in the work area and final clearance wipe samples in representative areas showing proper cleanup of the site at the completion of site work.

Schedule

SCA's design documents will be completed within 2 weeks of the notice to proceed.

Additional Services Available But Not Within the Current Scope of Work

Additional services, not within this scope of work, which can be provided on a time and materials basis include:

1. Abatement monitoring services beyond the 3 full-time for coring operations.
2. Notification of, or negotiation with regulatory agencies on your office's behalf; these items are normally handle by the Abatement Contractor under the terms of the specifications.
3. Preparation of employee and/or tenant notifications of asbestos survey results as required under the Connelly Bill.
4. Asbestos awareness training of janitorial and maintenance staff as required under the OSHA and ASHARA regulations.
5. Survey and abatement monitoring scope outside the assumptions addressed herein due to schedule extensions, access delays, increase scope of renovations or demolition, etc.
