RE: SWPPP Consultant Proposal for Demolition and Construction of Admin and Classroom Buildings at Fremont High School

Dear Ms. Chatman:

This proposal is divided into three parts—(1) pre-bid coordination to assist OUSD with preparation of contract specifications; (2) to prepare a Storm Water Pollution Prevention Plan (SWPPP) and (3) to act as the Qualified SWPPP Practitioner for the referenced project in compliance with the Construction General Permit, Order No. 2009-0009-DWQ, hereinafter referred to as “Permit”.

Project Understandings and Basis for this Proposal

- The project is located at Fremont High School, 4610 Foothill Blvd in the City of Oakland, Alameda County.
- The project consists of demolition and sitework for the construction of a proposed classroom building and administration building.
- It is understood that this project will be developed in three (3) increments. This SWPPP will be developed to include all three (3) increments.
- It is our understanding that the District wishes to have HERTZ act on behalf of Oakland Unified School District (OUSD) to maintain full compliance of the Permit.
- The SWPPP shall be designed to be amendable to incorporate subsequent construction phases following completion of Phase I. This saves time and prevents unnecessary spending in preparing new SWPPPs applying for new permits for each construction phase.

Scope of Work

I Pre-Bid Planning and Coordination

The following list of activities is recommended prior to preparation of the SWPPP and obtaining coverage under the Permit:

Fremont High School

1. Meet with OUSD project management to discuss project including construction schedule, erosion and sediment control recommendations, and Permit requirements.
2. (Optional upon request) Prepare draft Water Pollution Control Section in the bid/contract specifications that describes Contractor's responsibilities to implement SWPPP and maintain compliance with the Permit.

II Preparation of SWPPP

Prepare a Storm Water Pollution Prevention Plan for the referenced project that includes the following components, pursuant to the requirements of the Permit.

1. Conduct a risk assessment to determine what Risk Level (1-3) the project is by determining the potential rate of erosion (using the Revised Universal Soil Loss Equation (RUSLE)) and risk of discharge to a beneficially-impaired water body per Appendix 1 of the Permit.
2. Provide description of existing soils and determine hydrologic soil group (HSG) and determine runoff coefficients between pre- and post construction, as needed.
3. Perform a preliminary hydrologic analysis of the project site including calculating the change in runoff rate and volume between pre- and post construction (Δq), as needed.
4. Identify onsite pollutant sources and recommend Best Management Practices (BMPs) that address the following:
 - a. Erosion control;
 - b. Tracking control;
 - c. Sediment control;
 - d. Wind erosion control;
 - e. Non-storm water control;
 - f. Waste management and materials pollution control;
 - g. Management of discharges to ground surface and watersheds;
 - h. Protection of natural waterways and municipal storm drains.
5. Prepare a Water Pollution Control Drawing (WPCD) and a typical BMP construction sheet. Please note that if no erosion control plan is available, Client's topographic survey or improvement plans will serve as a base map.
6. Prepare a Rain Event Action Plan (REAP) as required.
7. Prepare a Construction Site Monitoring Program (CSMP) as required.
8. Include templates for training logs, monitoring programs, sampling data and inspection reports.¹

¹ To be completed by Contractor's Qualified SWPPP Practitioner (QSP) in addition to any required annual compliance reporting. QSP or LRP must also submit an Annual Report to SWRCB via SMARTS each year before September 1.

Fremont High School

9. Provide recommended BMPs and their locations on the WPCDs.
10. Provide SWPPP in electronic format and one (1) hardcopy. *Per the newly adopted CGP (effective July 1, 2010), the SWPPP must also be uploaded directly to SWRCB by the Legally Responsible Party (LRP) or via the assigned Data Submitter (DS).*
11. Provide post-construction water balance calculations for projects outside a Phase II permitted area, as required.
12. Be available for questions by the site superintendent and make appropriate revisions to the SWPPP throughout the construction/demolition process, as needed.
13. Provide additional compliance support to the site superintendent to provide to agency inspectors in the event that a Notice to Comply (NTC) or Notice of Violation (NOV) is issued. (Site Superintendent is strongly encouraged to keep a camera phone or digital camera readily available).
14. Groundwater: provide a schedule of Pollutants of Concern (POC) and instructions for the sampling consultant in the event that groundwater is encountered. Groundwater plan will be incorporated into the SWPPP for review by the lead agency² and will be prepared according to the guidelines of the Permit.
15. Prepare a Sampling, Analysis, and Monitoring Plan.
16. If groundwater is encountered and if the Contractor (with Lead Agency approval) choose not to allow water to recharge, either:
 - a. Assist District to submit an application for a dewatering discharge permit with the San Francisco Regional Water Quality Control Board (SFRWQCB) to allow discharges to surface, or
 - b. Assist Contractor with obtaining a permit with the County of Alameda to discharge to sanitary sewer, or
 - c. Coordinate with outside party to pump water to baker truck to be delivered to a State-certified off-site water treatment facility.

III QSP Site Inspection, Reporting and Permit Compliance (SMARTS Management)

The following services shall be provided on a weekly or bi-weekly basis, at the discretion of the QSP and District:³

1. Prepare and submit (on behalf of District) Notice of Intent (NOI) including upload of all project review documents to SMARTS.

² Lead agency is the government entity that requires a SWPPP (e.g., city, county, Caltrans, federal or combination of government agencies).

³ The QSP shall determine, based on field observations, Permit requirements and ability of Contractor to independently implement SWPPP, what frequency of visits are necessary. This is offered to the Client in an effort to reduce expenses for implementing the SWPPP.

Fremont High School

2. Coordinate with SWRCB to expedite obtaining coverage under the Permit and issuance of a waste discharge identification (WDID) number.
3. Provide SWPPP and Permit compliance training to Contractor and subcontractors at tailgate meetings.
4. Conduct weekly or bi-weekly site inspections to
 - a. Audit Contractor's performance in implementing SWPPP,
 - b. Provide ongoing education to Contractor and subcontractors to maintain compliance with Permit, and
 - c. Complete required BMP Inspection Reports for weekly and pre-/ post-storm events.
5. Collect water samples during qualifying rain events, as required for Risk Level 2 and 3 projects.
6. Coordinate with outside laboratory for analysis of water samples to test levels of pH and turbidity, as required for Risk Level 2 and 3 projects.
7. Submit lab results (ad hoc reporting) and submit corrective action reports, if necessary, to SWRCB via SMARTS.
8. Follow up with Contractor in performing required corrective actions per SOW Items 6 and 7.
9. Complete required reports including rain event action plans (REAPs), training logs, quarterly construction site monitoring reports for non-visible pollutants, and compile weekly, pre-/post-storm BMP inspection checklists into Annual Report.
10. Prepare and submit (on behalf of District) Annual Report on or before September 1 of each reporting year.
11. Provide additional compliance support to Contractor in the event that a Notice to Comply (NTC) or Notice of Violation (NOV) is issued. Coordinate necessary corrective actions directly with SFRWQCB.
12. Coordinate with erosion/sediment control BMP supplier for proper installation and maintenance of devices.
13. Determine time to terminate coverage under the Permit and submit a Notice of Termination (NOT) upon completion of the project, which includes either (1) providing demonstrable evidence to SWRCB that the site has achieved final stabilization and construction is complete or (2) meet with SFRWQCB inspector at the site to perform a field reconnaissance.
