Discussion:

Among the key purposes of the District's Facilities Master Plan is to provide an academic environment for the Oakland community that will give every student, educator, and community member using our facilities the best possible opportunity for learning.

Through implementation of the Facilities Master Plan, the District intends to improve the District's facilities in terms of structural integrity, safety, reliability of operating (mechanical) systems, access to modern resources, number and type of appropriate laboratories and specialized instruction rooms, opportunities for physical education, and attractiveness, such that the Oakland Public Schools are second to none. Operation of the District schools under the planned approach is intended to ensure safety, cleanliness, and orderliness for all individuals participating in the learning process.

The basic facility needs of students such as proper lighting, functional roofs, noise control and well maintained buildings, not only convey the message that we value our students and teachers but may foster a sense of school pride and community ownership which may improve attitudes towards learning. The implementation of the Facilities Master Plan is our first step in that direction.

Recommendation:

The Board of Education is requested to approve the Facilities Planning and Management to OUSD school sites.

The attached agreement request form is related to a project that was started last year by a project manager who is no longer employed with OUSD. Due to the change in project management staff the this invoice was misplaced and payment was delayed until now.

The serve smart invoice is for moving and reinstalling vending machines at Oakland High School. This service was associated with and part of a modification project (project number 05016) that made it necessary to move the vending machine due to the construction process and is being paid from this modification project's budget.
