01

Executive Summary

1.1 What is a Facilities Master Plan?

1.2 Guiding Principles

1.3 Facility Portfolio

1.4 District Trends and Enrollment

1.5 Facility Needs

1.6 Projects to Address Needs

WHAT IS A FACILITIES MASTER PLAN?

A school-district’s Facilities Master Plan describes a set of building and renovation projects that a district will pursue to support its educational mission.

A complete Facilities Master Plan will provide a road map for school district investment and enable a district to secure independent funding through a general obligation bond.

01

Modernizations & Improvements

Modernizing aging campuses and improving deficient buildings

02

Physical Alignment of Spaces

Constructing or modifying buildings and grounds to align with changing demographics

03

Optimize Operations

Investing in facilities to improve operations, such as food systems, energy efficiency, or transportation

GUIDING PRINCIPLES

The Facilities Master Plan’s Guiding Principles are rooted in the OUSD Mission and the OUSD Facilities Department goals.

FACILITY PORTFOLIO

Types of Campuses

76

Sites/ campuses with In-District TK-12 and Alternative Ed Schools

32

Sites with other uses:

- Administration
- Charters
- Early Childhood Education
- Adult Ed
- Warehouse
- Vacant

= 108 Total Sites

Building Square Footage

6M Sq Ft

Equal to approximately 6.5 Oracle Arenas

Athletic Facilities

12+ new turf fields built in the last seven years

Living Schoolyards

Five schools chosen as pilot sites for living schoolyards (2018)

Community Schools

34 Community Schools with health centers, family centers, and other resources

DISTRICT TRENDS AND ENROLLMENT

Historical Enrollment

In-District, OUSD & County Authorized Charter Enrollment (2000-2019) against Oakland Student-Age Population (5-19 yrs)

Enrollment at Oakland schools has changed over the past 20 years, both in terms of total students enrolled, and in the makeup of that enrollment. The number of students attending Charter schools has grown, while enrollment at OUSD In-District schools has been stable in the past ten years.

Over this 20 year period, the District has had to wrestle with issues that have come as a result of changing

enrollment trends. Today and in the future, the District will need to continue to respond and adapt to changing enrollment.

The Facilities Master Plan sets forth guiding principles that will allow OUSD to address needs of existing facilities while also providing the ability for the district to adapt to changing conditions across the city.

FACILITY NEEDS

Building Systems Improvements

- Heating Ventilation and Air Conditioning (HVAC)
- Electrical and Plumbing
- Roofing
- Thermal comfort

Sites & Grounds

- Sports Fields and Bleachers
- Play Structures
- Play Matting
- Trees and landscaping
- Stormwater management
- Outdoor learning environments

Accessibility

- Accessibility Improvements
- Ramps

Seismic

- Seismic Safety Projects

FACILITY NEEDS

Educational Adequacy, Equity & Operational Efficiency

- 21st Century Learning Environments
- Career Tech
- Technology Infrastructure
- Finishing Kitchens
- School Site Reconfiguration

Energy & Resiliency & Sustainability

- Solar Projects
- Energy Efficiency and Storage
- Living Schoolyards
- Heat mitigation and passive cooling

PROJECTS TO ADDRESS NEEDS

Project needs were identified through site evaluations, board input, and community engagement.

Project Need Category	Amount (\$)	Example Projects
Building Systems	\$1,369,000,000	Site modernizations, HVAC/electrical, plumbing upgrades, thermal comfort, etc...
Educational Adequacy, Equity & Operational Efficiency	\$863,000,000	Science classroom & lab upgrades, technology infrastructure, finishing kitchens, cafeterias
Seismic	\$641,000,000	Structural reinforcements & improvements
Sites and Grounds	\$112,000,000	New fields, bleachers, & lighting projects, play matting projects
Energy / Resiliency / Sustainability	\$110,000,000	Solar installation, energy storage, Living Schoolyards, heat abatement
Accessibility	\$81,000,000	Improved wheelchair ramps
Fire and Security	\$46,000,000	Fire Alarm Master Plan projects
Coordination & Planning	\$80,000,000	2025 Master Plan, Program Coordination Costs
Total	\$3,300,000,000	

02

Goals & Guiding Principles

2.1 Success Factors

2.2 Alignment

2.3 Guiding Principles

2.4 Community Engagement

SUCCESS FACTORS

Alignment

Ensure that investment in schools supports the District’s strategic Citywide Plan and associated initiatives.

Transparency

Inform the public as to what projects are being prioritized and share data and methodology that informs decisions.

Support Capital Funding

Enable the District to raise capital funds from a diverse range of sources

Smart Asset Management

Integrate board resolutions around smart Asset Management (BP 7350 and 6006) into systematic decision making in the District.

ALIGNMENT

OUSD & Facilities Master Plan Related Work

All work occurring for the Facilities Master Plan falls under the Citywide Plan. The below diagram illustrates the relationships and related work occurring in the District.

ALIGNMENT (CONT'D)

Coordinated Strategic Initiatives: Facilities Master Plan Process

The 2020 Facilities Master Plan process involved gathering data and inputs from both previous and concurrent work streams, and validating and analyzing that data to inform future work.

The process drew upon the wealth of strategic work performed as part of the Citywide Plan and other associated initiatives. Most significantly, the plan’s Guiding Principles have been crafted to align with the strategic planning efforts of the District. Input from Citywide Plan-related community engagements was also used in an effort to incorporate community feedback as much as possible. Building condition and site-related data was also collected from previous sources.

Data from all sources has been cross-referenced and validated in a rigorous process to ensure that accurate information is driving the plan. Only after facility information was validated and updated did it get incorporated into the plan.

The first two phases of work - data collection and assessment - helped define the District’s facilities needs which provided the groundwork for the more tactical planning initiatives defined in the Facilities Master Plan. These initiatives will enable the District to secure interdependent capital funding through local and state grants and public financing, including a general obligation bond.

GUIDING PRINCIPLES

The Guiding Principles below were developed by the Facilities Department Steering Committee and through engagement with OUSD executive leadership. More than just a set of goals, the Guiding Principles have been used dynamically throughout the process to assess the fitness of certain facility initiatives and define priority projects.

Engage OUSD Community

- Be trusted partners by developing plans in consultation with students, principals, teachers, parents and neighborhood communities

Support the Community of Schools Citywide Plan

- Ensure that all Oakland students have access to high-quality, publicly-funded schools
- Ensure that schools are located where high-quality options are needed most
- Provide a fiscally sound number of schools in proportion with OUSD's student population
- Leverage vacant, underutilized, and surplus properties and employ facility use agreements with aligned partners

Pursue a System-Wide Approach

- Manage district assets as a network of schools across the entire OUSD system
- Develop facility strategies that meet the needs of OUSD and its partners, including the Charter Office and other educational program providers

Cultivate Data-Driven Decision Making

- Maintain accurate and comprehensive data regarding facilities and site use
- Apply metrics uniformly across the whole OUSD system
- Be transparent with how data is used and how it informs decision making

GUIDING PRINCIPLES (CONT'D)

Pursue Financially Sustainable Facilities

- Employ efficient and effective spending practices that meet both short- and long- term district goals

Foster Environmental Sustainability

- Reduce energy consumption and waste wherever possible
- Incorporate energy generation and storage into planning efforts
- Follow nationally recognized design guidelines for sustainable and healthy buildings and grounds such as the Collaboration for High Performing Schools (CHPS)
- Develop child-friendly green infrastructure on school grounds to strengthen environmental resilience:
 - Plant shade trees to improve school ground microclimate and air quality
 - Reduce pavement to capture, infiltrate, and treat stormwater onsite
 - Create wildlife habitats using native plants

GUIDING PRINCIPLES (CONT'D)

Community Meetings

In January and February 2020, the Facilities Master Plan team conducted three community engagements to provide information on the plan, and receive feedback from the community on their priorities for the District. At each meeting information was shared with the public and small groups conducted workshops.

In all meetings, community members spoke of their hope for a clear, achievable plan. They hoped for a plan that engages individual voices and addresses a set of core issues, from deferred maintenance to thermal comfort. Individuals feared that the plan would become politicized, and that money would not be allocated properly.

In addition to these community wide engagements, several Board Members attended PTSA meetings at sites in their districts to present the Master Plan and encourage feedback. The questions and concerns from those meetings has also been incorporated into the plan.

Community members prioritized equitable investment across the district to fund all schools, especially those that have the most need, while also prioritizing revenue generation for the district. They spoke of their desire to incorporate solar and net-zero energy projects into the pipeline, to generate energy and reduce ongoing operational costs.

COMMUNITY ENGAGEMENT SURVEY

SURVEY INTENT

A 8-question survey was presented to the Oakland Community beginning on January 28th, 2020 to provide the Facilities Master Plan team with a better understanding of community priorities and facility needs. The survey was shared via in-person workshops, e-mail blasts, and via a Facilities Master Plan website. The survey provided insight into the Oakland Community's perspectives and priority ranking relating to the OUSD Facility Master Plan.

View all survey responses online at

<http://tiny.cc/ykuilz>

SURVEY QUESTIONS

- Q1.** In what role are you completing this survey?
- Q2.** What are your hopes about the Facilities Master Plan?
- Q3.** What are your fears about the Facilities Master Plan?
- Q4.** Which priorities in the Facilities Master Plan are most important to you?
- Q5.** Other priorities you'd like to see?
- Q6.** What are your responses to the list of proposed site-specific and districtwide projects?
- Q7.** What issues and opportunities do you want planners to know about at specific sites? (Please specify site)
- Q8.** What other comments do you have about the Facilities Master Plan?

EMERGING THEMES

1. Equitable Investments

2. Administrative Management & Project Completion Concerns

3. Classroom Environmental Quality & Educational Adequacy

4. School Infrastructure (Kitchen, Cafeteria, Restroom, etc.)

5. Issues Related to Specific Sites

Q1. ROLE OF RESPONDENTS

NUMBER OF SURVEYS SUBMITTED BY ROLE

A total of 366 online survey submissions were received during the January and February 2020 period.

Q2. HOPES FOR THE FACILITIES MASTER PLAN

“I hope all campuses will attract both students and teachers.”

“I hope it would improve Oakland education and improve some of the public education.”

“I hope this will help ensure all kids get a quality education. Safe place for the kids to learn, healthy place for the kids to learn”

QUESTION 2 SUMMARY BY CATEGORY

“What are your hopes about the Facilities Master Plan?”

Q3. FEARS ABOUT THE FACILITIES MASTER PLAN

“Bogged down in bureaucracy. Not enough community participation in the process of prioritization.”

“I fear that the money will be reallocated and it won’t be built.”

“That it won’t include moving central office from Broadway.”

“That we get “in over our head” around projects -where it takes too long to move forward or it is too ambitious/expensive.”

“That the wrong priorities will be made”

QUESTION 3 SUMMARY BY CATEGORY

“What are your fears about the Facilities Master Plan?”

Q4. PRIORITIES FOR THE FACILITIES MASTER PLAN

Which priorities in the Facilities Master Plan are most important to you?

*Average Ranking
1 (most important)
to
5 (least important)*

Ensure there are high quality school sites in every community (focus investment in communities without quality schools) **2.0**

Promote projects in every region and district of Oakland (equitable investment across Oakland) **2.8**

Complete deferred Measure J projects **3.1**

Pursue projects that enable OUSD to generate revenue or reduce ongoing costs **3.3**

Support Citywide Plan initiatives with facility investment **3.4**

Q5. OTHER PRIORITIES FOR THE FACILITIES MASTER PLAN

"I would like to see priorities based on foundational pathways..."

"Retrofitting of classrooms to address new weather patterns."

"Early Childhood hubs would be an amazing investment in our district's future."

"I would like to see all "temporary classrooms" that have been in use for decades to be replaced by permanent structures."

*"Green buildings & save money by going greener.
ADA accessibility compliance."*

"Pedagogically oriented design for new facilities (arts focused & career focused)"

QUESTION 5 SUMMARY BY CATEGORY

"[What] Other priorities [would] you like to see?"

Q6. SITE SPECIFIC AND DISTRICT-WIDE PROJECT LIST FEEDBACK

“I would like to see it reflect current needs”

“If we are still doing projects from 2017 when will we get to the new stuff”

*“Too much money to be spent on central admin,
move some offices to school sites with extra capacity.”*

*“I think many of the choices aren’t that important. There needs to be a
priority that is making sure expanding schools can actually do this.”*

*“Yes, in total support. Should be equitable. Yes, thinking about specific needs
at individual sites, but district should also ensure equity”*

QUESTION 6 SUMMARY BY RESPONSE TYPE

“What are your responses to the list of proposed site-specific and districtwide projects?”

Q7. ISSUES AND OPPORTUNITIES AT SPECIFIC SITES

“What issues and opportunities do you want planners to know about at specific sites? (Please specify site)”

QUESTION 7 SUMMARY BY FOCUS

QUESTION 7 SUMMARY BY SITE

Q8. ADDITIONAL COMMENTS

“Hillcrest- You are sticking an industrial facility in a small, quiet neighborhood, not acceptable. There are much more urgent needs district-wide.”

“CCPA needs a new building by fall 2021 as it is expanding. Also climate controlled classrooms and an athletic field for CCPA.”

“Allow McClymonds High School to thrive. Invest money into great facility, so our students learn in a safe, and modern environment.”

*“Please fix and maintain all of your schools.
Fix Lincoln’s air conditioning in the old building.”*

QUESTION 8 SUMMARY BY CATEGORY

“What other comments do you have about the Facilities Master Plan?”

03

District-Wide Trends

3.1 Enrollment Trends

3.2 OUSD Program Trends

3.3 Oakland Socioeconomic Snapshot

3.4 Futures Analysis

ENROLLMENT TRENDS

Enrollment at Oakland schools has shifted in the past 20 years. In the years preceding 2020, In-District enrollment has remained stable at about 37,000 students. Charter enrollment, has grown, particularly for OUSD Authorized charter schools. Including both in-district and charters, enrollment levels are similar to those of early 2000's.

In addition to changes in enrollment within Oakland schools, the student-age population has dropped significantly over the past 20 years. The City has seen substantial demographic change, such as development, immigration,

gentrification, and increased cost of living. Demographic change throughout the city will continue to impact the school district in the future.

Enrollment in Oakland schools in the future is difficult to predict. The District is tracking various factors, many outside its control, that may impact enrollment levels in order to be prepared as enrollment grows or declines.

OUSD PROGRAM TRENDS

Early Childhood Education

OUSD Early Childhood Enrollment (2013-19)

Early Childhood Education (ECE) needs to be in position to take advantage of State and City initiatives to support increased funding for early childhood programming. ECE is planning to create two additional service sites to provide comprehensive care (i.e. SpED, Gen. Ed., T-K, Play Spaces, Family Areas, Community Child Services to students from birth to age 5). The City and County would provide programming for birth to year 3 and the District would provide programming for years 3-5.

Currently, there is one center located at Burbank. A total of 9 to 12 classrooms at a single site would be needed to replicate the successful model at Burbank. The use of a discrete site would facilitate licensing and better support outside agency

collaboration. The ECE programs shared with elementary schools are not looking to expand, as these programs are already extensive throughout the city. The old CDC spaces vacated and recently considered in the 7-11 process are not suitable for the planned comprehensive care programming.

Early Childhood Education facilities must also be considered in terms of their outdoor environments. Cool microclimates (out of the harsh sun) and nature are vital components of environments for young children. Green spaces help to protect and nurture the youngest children in the district, who are most vulnerable to heat due to their age.

OUSD PROGRAM TRENDS

Diverse Learners

Special Education (SDC) Enrollment (2013-19)

Students with distinct learning and support needs in OUSD are growing in numbers. Facilities must support these students and the programs that serve them.

For example, Special Education (SDC) students need accessible facilities in all parts of the district. Spaces for support staff and rooms to accommodate smaller classes are essential, including those with additional technology and tools.

Newcomer Enrollment (2013-19)

Additionally, Newcomer students need to be considered in facilities decisions. These students transition from special programs into other sites.

OUSD must ensure capacity for the support services provided through the community schools model as it is essential for the success of this population.

OUSD PROGRAM TRENDS

Adult Education

Adult Education programs seek to expand to better serve the learning adult population. Additional facility capacity is needed in the following four strategic regions: Central, East, Northeast, and West. The ideal expansion would be 4 small hubs of up to 8 classrooms each distributed throughout Oakland with one of them housing the Adult Education administration.

In addition to co-locations at workforce development sites and social services, agencies like Mandela and the Lao Family would ensure effective service where it is needed most. Particular focus in East Oakland would support expansion of

programming to the most underserved community. The expansion would also enable increased offerings from Peralta Community Colleges to the adult education community.

OUSD PROGRAM TRENDS

Community Schools

Afterschool - OUSD’s extensive after-school programming will continue and requires additional storage space and flex rooms to serve fully utilized facilities without disrupting core educational functions.

Living Schoolyards - OUSD’s partnership with Trust for Public Land and Green Schoolyards America, as well as its commitment to “greening” school grounds, requires both facilities infrastructure improvements and operational support for long term success.

Oakland Athletic League - OUSD must continue to install, maintain and replace artificial turf fields to better facilitate access to play and sports activities in support of improved student achievement. Provision of competition level facilities will enable schools to host regional events and generate revenue.

OAKLAND SOCIOECONOMIC SNAPSHOT

Deloitte, Collective Learning (MIT Media Lab), and Datawheel have collaborated to compile and visualize public US Government data. This resulted in Data USA, which provides snapshots of the socioeconomic trends of different US regions. These data and visualizations were used as the sources for this section.

In 2017, Oakland had a population of 425,000 people, ranking it as the 45th largest city in the United States. The median age was 36.7, with a median household income of \$70,577. The city also had a workforce of approximately 225,000 people who are primarily in the Professional, Scientific and Technical Services, Health Care and Social Assistance, and Educational Service fields.

Oakland Workforce Top Sectors (2017)

Source: Data USA, 2019

In addition, the ethnic composition of the population of Oakland can be seen below:

Percentage of Population by Race or Ethnicity (2017)

Furthermore, in 2017, 41.1% of Oakland citizens are speakers of a non-English language, compared to the national average of 21.8%.

The 2017 median property value in Oakland climbed by 5.69% from the previous year and reached \$686,700. That's over three times higher than the national average of \$217,600. Meanwhile, the 2017 home ownership rate in Oakland was 39.3%.

In regard to higher education, Oakland universities awarded 4,028 degrees in 2016. The three largest universities in Oakland by number of degrees awarded are Merritt College (916 and 22.7%), Laney College (858 and 21.3%), and Samuel Merritt University (662 and 16.4%).

FUTURES ANALYSIS

ASSESSING CHANGE OVER TIME

School districts are impacted by outside trends, both anticipated and unforeseen. Socioeconomic shifts, technological advancements, market trends, and political change all impact operations and conditions at the District level. With an awareness of external factors and a strategy for adaptation, OUSD can be a more resilient organization.

The Futures Analysis scans nationwide trends and attempts to understand how these trends may impact OUSD’s facilities program over time. Insights from the Future Analysis can be translated into strategies to ensure OUSD and its facility portfolio remain flexible amidst future changes.

FOUR FOCUS AREAS

Four focus areas were established as relevant to OUSD’s mission and its geographic context. Trends were assessed across two time scales – ‘emerging’ and ‘future’.

The following pages breakdown trends by focus area and time scale while attempting to translate the impact of the trends into tactical facility implications.

CHANGE OVER TIME
 Understanding key drivers that might impact the institution over time will increase the district’s resiliency to change.

PEDAGOGY & GOVERNANCE

ECONOMY & DEMOGRAPHICS

ENVIRONMENT & ENERGY

INFRASTRUCTURE & MOBILITY

FUTURES ANALYSIS (CONT'D)

Future Trends - Pedagogical & Governance

The education sector is increasingly leveraging technology as a teaching platform and a tool to communicate. The rise of digital technology is also driving a need for more flexible and personalized educational programs.

Key Trends

Facilities Implications

- As more students learn with personalized, online environments, the need for large classrooms diminishes and tech-enabled simulated learning environment increases.
- Develop policies that incorporate distributed governance and emphasize both citizen and private sector involvement.
- Collaborate with programs and facilities across Districts to leverage shared and specialized resources, like flex spaces and specialized simulation spaces.

Sources: Stanford Report of the 2015 Study Panel, 2016; Brookings, 2015; Gartner, 2014; Arnett, 2018; Rudgers and Peterson, 2018; NMC Horizon Report, 2016; Lake, 2018; Sellingo, 2017

FUTURES ANALYSIS (CONT'D)

Future Trends - Economy ● & Demographics ●

With Oakland’s population becoming increasingly diverse and public funding under increasing pressure, some school districts are shifting their financial and operational models to maintain stability and relevance.

Key Trends

EMERGING 5-10 YEARS

FUTURE 10+ YEARS

- Push for changes to state funding systems
- Rise of options for increased local funding from different sales taxes
- Increasing digital comfort among students
- Faculty wage demands increase with inflation
- Rise of automation and shifts in labor markets
- Shift towards more flexible, individualized learning models
- On-campus community oriented more around interests rather than grade cohorts

Facilities Implications

- Develop new programs to account for increased demographic diversity and skills-based training for new labor markets.
- Consider long-term space agreements with community education partners and charter schools.
- Evaluate new revenue opportunities and outside grants such as leasing disposable space, joint use fees, taxes, and partnerships.

Sources: Stanford Business School, 2018; Chatlani, 2018; Douglas-Gabriel, 2016; Kak, 2018; Wang and Schragar, 2017; US Dept of Education, 2017; Kim and Pomerantz, 2015; Altbach, Reisberg and Rubley, 2009; Fain, 2017

FUTURES ANALYSIS (CONT'D)

Future Trends - Environmental ● & Energy ●

Higher temperatures, poor air quality, and sea-level rise due to climate change will impact existing infrastructure and drive innovation in less-carbon intensive power generation, grid management, and power storage.

Key Trends

EMERGING 5-10 YEARS

- Droughts and heavy rains induce more extreme flooding events
- Temperatures increase
- Rising fire risk along East Bay Hills areas
- Use of batteries and hydrogen cells for vehicles
- Offshore wind power more prevalent
- Natural gas a competitor to renewable energy sources due to cost-effectiveness

FUTURE 10+ YEARS

- Extreme weather events become more frequent
- Sea level rises 1-2 feet, coastal developments increasingly damaged
- Global demand for energy grows by more than 100%

Facilities Implications

- Apply heat abatement, passive cooling and air filtration measures.
- Adopt active and/or passive air quality management systems.
- Evaluate on-site renewable energy co-generation and storage potential.
- Assess, retrofit, and/or repurpose sites for environmental vulnerabilities.
- Implement long-term emergency preparedness plan.

Sources: Abercrombie and Thiel, 2013; Ainsworth and Loh, 2009; Cristini et al, 2013; Parker, 2018; Dunn and Fitzpatrick, 2019; Fast Company, 2011; Washington Post, 2016; Forbes, 2018; ScienceDaily, 2018; Energy.MIT, 2018; Energy.MIT, 2011; Greentech Media, 2018

FUTURES ANALYSIS (CONT'D)

Future Trends - Infrastructure & Mobility

Private car ownership is decreasing with the advent of ride share alternatives, bike share, and mobility-as-a service options emerge. In parallel, infrastructure systems are evolving to be more efficient, flexible and decentralized.

Key Trends

EMERGING 5-10 YEARS

- Improvements in rainwater harvesting and small sanitary sewer "batch plants"
- Wider use of smaller electric cars reduces parking demand and open up space

FUTURE 10+ YEARS

- Drone usage common for delivery and information gathering
- Management of air space becomes typical part of urban infrastructure
- Automated transit is the norm
- Rise of remote learning decreases number of students and staff on school sites

Facilities Implications

- Decreased dependency on private cars and parking infrastructure creates new site availability for other building use types.
- Create spaces with versatile use-types that adapt to future infrastructure needs.
- Introduce smart monitoring technologies to energy use and occupant comfort.
- Plan for new on-site energy generation storage systems for electric vehicles.

Sources: Behrens, Schlender and Fehring, 2018; Bernotat et al, 2016; Pobiner, 2017; Brookings Institute, 2015; Lyte, 2017; Seagram et al., 2015; Muolo, 2015

FUTURES ANALYSIS (CONT'D)

Summary

- PEDAGOGY**
How do students learn?
 - Online / distance learning increases requiring smaller, tech-enabled environments
 - Learning tools modernize to include AI, AR, & haptic technologies, decreasing impact on physical facilities
 - Project-based learning emphasizing collaboration and simulation
 - Analog and web-based simulation environments refined
 - Personalized learning grows

- GOVERNANCE**
How do the governing institutions work?
 - Increasing digitization of processes and systems
 - Public-private partnership models increase
 - Mobile citizen engagement is on the rise; districts increasingly held to account for transparency

- ECONOMY**
How is the district sustained?
 - District collaborations with community and charters increase
 - Increased demand for skills and trade-based learning.
 - Rise of corporate recruiting programs seeding job pipelines straight out of high school
 - Private financing in public education is growing
 - Community school model grows as schools seek out alternative program delivery models and financing

- DEMOGRAPHICS**
Who are the students?
 - Number of distance learners increases
 - Population size grows, as do more educational choices
 - Diversity of population increases
 - District enrollment grows, comprised of more diverse, older student body. Less physical footprint required due to distance learning.

- ENVIRONMENT**
What is the climate like?
 - East Bay region will shift towards hotter and more volatile climate patterns
 - Renewable energy generation scaled at site-based microgrids
 - Rise of air quality issues due to environmental and weather events

- ENERGY**
How is energy generated, used and maintained?
 - States pass more stringent efficiency targets
 - Increased reliance on renewable energy and microgrids
 - Digitization and decentralization of grids
 - Innovations in back-up battery storage and solar cells occur

- INFRASTRUCTURE**
How are the buildings built and operated?
 - 'Smart Homes' trend moves to schools, calling for more responsive buildings that adapt to users
 - Increased use of information technology to regulate indoor and outdoor environments
 - More decentralization of energy grids into microgrids
 - Greater levels of mixed use buildings and properties as density rises

- MOBILITY**
How do people get around?
 - Growth in alternative forms of transit and mobility as a service
 - Driverless, automated cars and buses decrease traffic and minimize the need for on-site parking
 - Electric charging stations deployed

	Total Bulding Area (SF)	301,928	266,082	229,726	239,706	399,410

NEEDS

Sources of Data on Need

OUSD's facility conditions assessment was conducted as part of earlier work in the district that aimed to evaluate site performance.

OUSD's 2017 Blueprint for Quality Schools, a specialized study aimed to measure the degree to which OUSD facilities support the District's instructional mission and modern instruction methods. The work resulted in an inventory of deficiencies and projects for OUSD facilities. Project categories include the following:

Deficiencies

- Building Systems
- Site & Grounds
- Accessibility
- Seismic Safety
- Educational Adequacy & Equity
- Energy & Resiliency & Sustainability
- Fire & Security

NEEDS (CONT'D)

Project Needs

Building Systems

Category Types and Examples

Roofing - Decking on concrete ceiling, roof drains, roof covering

Exterior - Glass panes, wall veneer, entrance doors, operating windows

Interior - Doors, stairs, acoustical ceiling tiles, concrete flooring

Mechanical - HVAC, heat generation, exhaust air

Electrical - Abandoned equipment, lighting fixtures, power distribution

Plumbing - Gas water heater, plumbing fixtures, sanitary sewage piping

Sites & Grounds - Projects on site will include the following: Bleachers, pathways, grease traps, sanitary sewer pipes, paving, irrigation systems, playfields, tennis courts and equipment.

Projects can also address needs related to access to green space and nature as well as the quality and character of those spaces.

NEEDS (CONT'D)

Accessibility - Access and support spaces for differently-abled individuals with regards to mobility, vision, and hearing, and in other needs. Projects may include ramps, lifts, braille signage, and assistive listening systems.

Seismic Safety - Enhancements to improve life safety and provide safe buildings for a community during and in the wake of earthquakes.

Educational Adequacy, Equity, and Operational Efficiency - Ensuring up to date and functional rooms and buildings to support our educational mission, provide efficient support to schools, increase security, and reduce our maintenance and operational burdens by focusing on life cycle costs.

NEEDS (CONT'D)

Energy & Resiliency & Sustainability

- Solar projects, as well as heat mitigation, energy efficiency and energy storage projects.
- Living schoolyards that incorporate child-friendly blue-green infrastructure designed to strengthen ecological and climate resilience. (For example, plant trees for shade; remove pavement to create green spaces and allow stormwater to infiltrate.)

- ### **Fire & Security**
- Includes addressing and improving security systems, fire detection and alarms.

05

Projects

5.1 Project Priorities

5.2 Previous Capital Projects

5.3 Projects to Address Needs

PROJECT PRIORITIES

- 01 Complete **deferred Measure J** projects
- 02 Promote projects in **every region** and district of Oakland
- 03 Ensure there are high quality school sites in **every community**
- 04 Support **Citywide Plan** initiatives with facility investment
- 05 Pursue projects that enable OUSD to generate revenue or **reduce ongoing costs**

Projects will occur within the District over the next several years to directly address deficiencies and facility needs at school sites. For the purposes of the Master Plan, projects are defined at both the District-wide level and at individual schools.

All projects will address the deficiencies and life cycle costs identified in the condition assessments previously defined. The articulation of specific projects to address needs follows a prioritization framework aligned with OUSD strategic objectives.

The project priorities shown above, show how projects will be prioritized across the District. Emphasis is placed on completing deferred Measure J projects.

The data collected through community engagements also helps inform how facility projects are prioritized at sites based on what issues are raised as areas of concerns.

PREVIOUS CAPITAL PROJECTS

Measure B

Major Projects at:

- New classroom buildings at Jefferson Elementary, Markham Elementary, Montclair Elementary, Cox Elementary
- New construction at Woodland Elementary, La Escuelita
- Modernization at Prescott Elementary
- Chabot Elementary Portable Removal
- Restoring the Performing Arts Center at Castlemont High School
- Gym/Classrooms at Urban Promise Academy

Measure J

Major Projects at:

- Fremont HS
- Glenview ES
- Madison Park Academy
- Whittier ES
- The Center
- Restroom Upgrades at 12 sites
- Field and Paving Improvements at 13 sites
- Play Matting and Play Structures at 19 sites

PREVIOUS CAPITAL PROJECTS (CONT'D)

Proposition 39 Energy Efficiency Projects

Leveraging funds from The California Clean Energy Jobs Act (Proposition 39) has enabled OUSD to pursue energy efficiency projects at 15+ school sites. Upgrades include lighting and boiler replacements.

California Solar Initiative

Energy-Producing Solar Panels at 17 Sites

STRATEGIES

The Center (New Central Commissary)

OUSD’s new central kitchen supports healthy school meals. The District will now be delivering healthier and tastier food to support school nutrition programs. This includes lunch at all sites and breakfast and dinner at some sites. The new facility has the capacity for OUSD to expand meal selections that will attract more student eaters. Minor modifications to existing site kitchens will enable the distribution of food from the central kitchen to as many students as possible.

Living Schoolyards

OUSD’s Living Schoolyards policy (BP 7110.1) states that “OUSD’s school grounds will have living schoolyards that support 21st Century education, promote children’s health, well-being and joy and function as ecologically rich community schools that connect children and their neighborhoods to the natural world right outside their classroom door, every day.”

As the steward of 505 acres of land in Oakland, OUSD will build on its thriving Living Schoolyard initiative across the district. Incorporating the Center as a new hub for garden, environmental education, and health-related work. Investment in Living Schoolyards will

STRATEGIES

Living Schoolyards

Photo credit: Green Schoolyards America

Photo credit: Green Schoolyards America

support food education, reduce urban heat islands, and reduce stormwater runoff. The program has already kicked off with pilot projects at the Melrose Leadership Academy, Markham and other sites.

Supporting this policy means working with OUSD staff to maintain an inventory of features such as tree canopy cover, gardens, outdoor classrooms, and nature play areas. The conditions of schoolyards will also be evaluated in terms of lack of trees and lack of shade, amount of paved impervious surfaces, general state of disrepair of outdoor spaces, and lack of amenities to support outdoor learning, play, health and wellbeing.

Projects supporting Living Schoolyards shall support the overall guiding principles of the Master Plan as well as:

- Equity shall be a guiding principle to ensure that students from disadvantaged communities have priority access to the benefits of living schoolyards.
- Readiness. This criterion shall take into account the school community's current commitment to outdoor

STRATEGIES

learning and maintenance /
stewardship of their green spaces.

- Alignment with other planned improvements. This criterion shall include coupling living schoolyards projects with other major renovations or improvements in order to maximize efficiency and minimize costs.

New Central Administration Facility

The main central administrative functions of the District do not have permanent offices and must have a functional long term solution to avoid the repeated disruption of moving and the inefficiency of multiple satellite offices. The Board has approved a project to rehouse the Central Administration functions, which are currently housed at 1000 Broadway, at a new facility at the Cole school site.

Portable Replacement

The District's long-term goal is to use permanent facilities to accommodate district enrollment goals and provide students with healthier learning environments.

PROJECTS TO ADDRESS NEEDS

Project needs were identified through site evaluations, board input, and community engagement.

Project Need Category	Amount (\$)	Example Projects
Building Systems	\$1,369,000,000	Site modernizations, HVAC/electrical, plumbing upgrades, thermal comfort, etc..
Educational Adequacy, Equity & Operational Efficiency	\$863,000,000	Science classroom & lab upgrades, technology infrastructure, finishing kitchens, cafeterias
Seismic	\$641,000,000	Structural reinforcements & improvements
Sites and Grounds	\$112,000,000	New fields, bleachers, & lighting projects, play matting projects
Energy / Resiliency / Sustainability	\$110,000,000	Solar installation, energy storage, Living Schoolyards, heat abatement
Accessibility	\$81,000,000	Improved wheelchair ramps
Fire and Security	\$46,000,000	Fire Alarm Master Plan projects
Coordination & Planning	\$80,000,000	2025 Master Plan, Program Coordination Costs
Total	\$3,300,000,000	

PROJECTS TO ADDRESS NEEDS

Building Systems

Roofing - Low slope and sloped roofing, drains, flashing systems

Exterior - Plaster, Concrete, glazing systems, rain screens, entries

Interior - Flooring, ceilings, walls, stairs, doors, accessories

Mechanical - HVAC, Boilers, package units, exhaust fans

Electrical - Power and lighting, low voltage (alarms, data, sensors)

Plumbing - Rough and finish plumbing, water heaters, sanitary and storm systems

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites	46	\$587,010,709	
Middle School Sites	13	\$302,277,115	
High School Sites	7	\$259,364,530	
Other Sites (CDCs, Charter Schools, Admin, Etc...)	23	\$219,701,245	
Non-site specific			
Total	89	\$1,368,353,600	

Educational Adequacy, Equity & Operational Efficiency

Refers to items that are directly related to the instructional environment and support the educational mission at the school including but not limited to, instructional aids, technology, supervision and security concerns. Also refers to items related to administrative operations of the District.

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites	46	\$252,626,139	Includes: <ul style="list-style-type: none"> • Blueprint support projects: <ul style="list-style-type: none"> • Havenscourt MS (CCPA): \$35,526,800 • Elmhurst MS: \$19,671,000 • Frick MS: \$18,456,000 • Metwest High: \$11,135,400 • Maxwell Park ES (MLA): \$15,905,800 • Washington ES (Sankofa): \$8,980,600 • Sherman ES: \$5,000,000 • \$40M for 7 future undefined Blueprint support projects • \$36M for future undefined Alt Ed, Early Childhood and Adult Ed Blueprint support projects • \$38.5M for finishing kitchens.
Middle School Sites	13	\$240,001,525	
High School Sites	8	\$147,053,375	
Other Sites (CDCs, Charter Schools, Admin, Etc...)	24	\$108,568,321	
Non-site specific		\$114,500,000	
Total	91	\$862,749,359	

Seismic

Enhancements to improve safety and provide safe buildings for a community during and in the wake of earthquakes.

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites	24	\$213,618,448	
Middle School Sites	12	\$183,700,381	
High School Sites	5	\$203,284,852	
Other Sites (CDCs, Charter Schools, Admin, Etc...)	14	\$40,213,977	
Non-site specific			
Total	54	\$640,817,658	

Site and Grounds

Projects on site will include the following: Bleachers, pathways, grease traps, sanitary sewer pipes, paving, irrigation systems, playfields, tennis courts and equipment, trees and landscaping stormwater management, outdoor learning environments.

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites	46	\$60,261,960	Includes Safety Matting Master Plan
Middle School Sites	13	\$16,867,896	
High School Sites	7	\$18,869,211	
Other Sites (CDCs, Charter Schools, Admin, Etc...)	23	\$16,009,670	
Non-site specific			
Total	89	\$112,008,737	

Energy / Resiliency / Sustainability

Projects include solar projects, as well as energy efficiency and energy storage projects. Includes Living Schoolyard related work.

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites			Includes solar projects, energy storage projects, and Living Schoolyards
Middle School Sites			
High School Sites			
Other Sites (CDCs, Charter Schools, Admin, Etc...)			
Non-site specific		\$110,000,000	
Total		\$110,000,000	

Accessibility

Accessibility for physical, but also support spaces for differently abled individuals with regards to vision, hearing, and in other ways.

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites	45	\$35,594,967	
Middle School Sites	13	\$19,297,496	
High School Sites	6	\$14,797,653	
Other Sites (CDCs, Charter Schools, Admin, Etc...)	23	\$10,832,062	
Non-site specific			
Total	87	\$80,522,178	

Fire and Security

Includes addressing and improving security systems, fire detection and alarms.

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites	45	\$19,332,425	Includes Fire Alarm Master Plan
Middle School Sites	13	\$11,104,351	
High School Sites	7	\$10,336,690	
Other Sites (CDCs, Charter Schools, Admin, Etc...)	23	\$5,108,650	
Non-site specific			
Total	88	\$45,882,116	

Coordination and Planning

Includes 2025 Facilities Master Plan and capital program coordination.

Site Type	# of sites	Projected Need (\$)	Notes
Elementary School Sites			
Middle School Sites			
High School Sites			
Other Sites (CDCs, Charter Schools, Admin, Etc...)			
Non-site specific		\$79,500,000	
Total		\$79,500,000	

PROJECTS TO ADDRESS NEEDS BY SITE

How Needs are Estimated

1. On Site Evaluation

- A team of engineers visited school sites across the district to evaluate conditions and document deficiencies.

2. Estimate Deficiency Costs and Lifecycle Costs

- Based on observed deficiencies, engineers estimated project costs to bring facilities up to a quality standard. (Deficiency costs)
- Based on the type and age of each facility, engineers estimated costs that are anticipated over the next 10 years. (Lifecycle costs)

3. Validate Estimates and Incorporate Other Needs

- Cross-referencing with previously conducted studies, data was adjusted to eliminate errors and maximize accuracy.
- Needs from other sources were incorporated, such as: Accessibility Study, Living Schoolyards, and Blueprint for Community Schools
- For sites that were not evaluated by engineers (e.g. CDCs, Adult Ed), needs were estimated based on costs from other district facilities.

4. Revise Estimates at the Site Level Based on Synthesized Data

- Combine deficiency costs, lifecycle costs, and needs from other sources to generate site-level summaries by need category.
- Omit projected need costs from sites where long term charter leases articulate that OUSD is not responsible for facility costs
- Revise costs for sites where Board Policy has defined a change in use

PROJECTS TO ADDRESS NEEDS BY SITE

Data Explanation

Site Name:
The site names for specific campuses may remain the same even programs using the site change over time.

Educational Adequacy, Equity, and Operational Efficiency: see page 60

Accessibility: see page 62

Building Systems: see page 60

2020 Facilities Condition Index (FCI): A ratio of the total of

- Building System deficiencies,
- Priority Seismic deficiencies,
- Accessibility deficiencies
- projected 5-year Lifecycle Costs ... divided by Replacement Value.

An FCI close to 0 means a building has less needs. An FCI close to or above 1 means that a site has a lot of need.

The 2020 FCI is an updated of the FCI originally shared in 2018 as part of the Blueprint process. The 2020 update incorporates Accessibility needs and other updated data.

OUSD sites on the following pages are listed in descending order by 2020 FCI: Sites with the FCIs closest to 1 (greatest needs) are listed first and lowest FCIs at the end.

Sites were sorted by their rank into quartiles:

- 25% -- Red
- 25-50% -- Yellow
- 50-75% -- Light Green
- 75-100% -- Dark Green

Replacement Value:
A rough estimate of the cost of the building based on square footage and an average building cost for Oakland.

Site Name/Programs	Site Needs	Facilities Condition Index & Educational Adequacy Score
King Estates	Educ. Adequacy, Equity, & Ops	\$8,751,182
	Accessibility	\$1,532,681
	Building Systems	\$23,815,833
	Seismic	\$12,325,624
	Site & Grounds	\$1,901,438
	Fire & Security	\$747,304
	Total	\$49,074,062
		2020 FCI/Rank/Quartile 0.33 / 38 / 2
		Replacement Value \$56,010,731
Bay Area Technology, Independent Study, Sojourner Truth, Rudsdale Continuation		2018 EAS/Rank/Quartile 52.2 / 26 / 2

Program Names:
These are the names of school programs using each site. There may be multiple programs using a single site.

Seismic: see page 61

Site and Grounds: see page 61

Fire & Security: see page 63

2018 EAS Score:
From the Blueprint for Community Schools (2018).

A site's EAS is intended only as a rough means of rating adequacy using a universal rubric. It does not incorporate any details about how a program actually uses its facility and is not used for guiding or directing projects.

EAS measures facilities adequacy with regards to:

- Educational Programs
- Healthy Environments, Relationships & Collaboration
- Safety & Security
- Instructional Technology
- Furnishings and Equipment
- Location
- Operational Efficiency

Smart Asset Management

6.1 Smart Asset Management, Board Policy 7350

SMART ASSET MANAGEMENT, BOARD POLICY 7350

The Smart Asset Management process is designed to help the district better manage its physical assets and prioritize funds and projects over time. The process is directly born out of Board Policy 7350 Facilities: Physical Assets Management and involves more

intentional alignment and knowledge sharing with all of the concurrent District processes that have facility implications to determine the highest and best use of all school sites with the goal of better aligning all District programs and services.

Smart Asset Management Process

Board Policy 7350 defines and prioritizes the criteria by which space and facilities should be allocated for OUSD programs if excess site capacity is discovered.

Board Policy 7350 Facilities: Physical Assets Management includes a prioritized assessment of an OUSD site’s ability to meet the following criteria:

Once the District has thoroughly evaluated the feasibility of using properties according to the criteria set forth in Board Policy 7350, the District may begin evaluating the site for revenue generating opportunities via either long-term-lease, rental, or property sale.

In-District School Fit

The district can use this site to provide technologically advanced learning and recreation space for general education and special education students and families enrolled in schools operated by the District.

SMART ASSET MANAGEMENT, BOARD POLICY 7350 (CONT'D)

Revenue Generation Options

In-District School Fit	No		
Swing Space	No		
Charters	No		
Administration	No		
Revenue Generation	A	Workforce / Affordable Housing	No
	B	Property Swap	No
	C	Joint Use	No
	D	Joint Development	No
	E	Long Term Lease	Yes
	F	Sale	Yes

Swing Space

The district can provide for temporary relocation of schools for major construction and modernization projects.

Charters

Per Proposition 39 (2000), the district can provide learning and recreation space for students enrolled in charter schools operating in the District, including the consideration of lease terms for charter schools that align with the term of charters and, at equitable rates, for those charters providing high quality options for Oakland children.

Administration

Provide quality operations and administration facilities to enable high performance by District staff.

Revenue Generation

To the extent that the District has excess capacity, the District shall make this space available at fair market value or otherwise reasonably negotiated rates in order to generate unrestricted general fund revenues to support programs and services, and cash reserves for long-term maintenance, equipment and capital facilities needs.

7.1 Fire Alarm Master Plan

7.2 Play Matting Master Plan

7.3 Site Inventory

APPENDIX 7.1: FIRE ALARM MASTER PLAN

OAKLAND UNIFIED SCHOOL DISTRICT DEPARTMENT OF FACILITIES PLANNING & MANAGEMENT

Fire Alarm Master Plan
October 18, 2019

This Fire Alarm Master Plan provides a primary input to the Facilities Master Plan and resulting Capital Building Programs. The selection, design, and installation of the Fire Alarms throughout the District also have a direct relationship to maintenance and repair loads and the capacity of Buildings & Grounds to support safe facilities Districtwide.

The primary purpose of a fire alarm system is the support health and safety by providing notice of fire events to allow safe evacuation of fire areas, information to first responders on fire status and property protection by providing remote notification of fire events and triggering of local alarms.

HISTORY

Prior to the mid 1990's OUSD had not addressed fire alarm deficiencies in a major way since the Marcus Foster Capital Improvement Program in the 1970's. The Marcus Foster Capital Improvement Program was focused on seismic safety improvements and included fire alarm work when required by the State Architect.

In the 1990's OUSD passed a local Bond (Measure C). Measure C was the first local bond in almost 20 years and passage allowed OUSD to participate in the Leroy Green State School Construction program and leverage State funds with local dollars to modernize many schools. The fire alarm work associated with this construction program was limited to the areas of each campus being modernized.

A second round of modernizations followed in the early 2000's funded in part by Measure A. The fire alarm work was similarly piecemealed resulting in campuses with multiple fire alarm systems of various makes and models. The fire alarm work completed in these first two rounds of modernization was completed in the most economical way possible to comply with State Architect requirements and Fire Code.

During this same period Buildings & Grounds (B&G) went through multiple downsizings. This combination of loss of experienced service electricians and increase in complexity and variety of fire alarm systems required some new solutions.

Following these first two rounds of modernizations, Facilities worked closely with Buildings & Grounds to develop Fire Alarm design and installation standards to ensure that future fire alarm systems could be monitored and maintained by B&G.

In order to support improved fire alarm maintenance and repair we have standardized on a single manufacturer (Simplex - recently renamed Johnson Controls) to enable B&G to train and retain qualified staff to repair and maintain increasingly complex and technical systems.

We have also undertaken a design and construction oversight protocol to ensure that new systems are designed and installed correctly. For each fire alarm project or larger project that involves fire alarms we also contract with the Fire Alarm design reviewer and the construction installation monitor for this specialized technical installation.

ISSUES

One of the repeated concerns we have heard is regarding the number of fire alarm related contracts, sometimes repeated on the same site. Over the last twenty five years or so, we may have undertaken multiple fire alarm projects at some sites. A sample scenario would be:

1. First round Mod - New Fire Alarm on Bldg A
2. Second Round Mod - New Fire Alarm on Gym and Bld B
3. Fire Alarm upgrade project - Changing out a complete site to a single manufacturer current code system
4. Portable replacement project (at the same site) - redesign and construction of fire alarm modifications required due to portable replacement.

Each of the projects (1-4) will have multiple contracts including:

1. Architect or Engineer to design the system or modification
2. Inspector of Record as required by DSA
3. Fire Alarm special Design and Construction oversight consultants
4. Installation contractor

Other drivers of multiple projects on some sites in a 20 year cycle are:

1. Fire Alarm Code is upgraded every 3 years. At each adoption cycle new features and protocols are required. For example the last code adoption now requires a voice notification in addition to alarm horns to better assist sight impaired in evacuation.
2. Fire Alarm manufacturers are constantly upgrading their products to meet the code requirements and to provide additional features to improve monitoring and safety.
3. All School Fire Alarm components must be listed with the State Fire Marshal. Listing requires regular retesting of the listed product with UL or similar and as a consequence manufactures regularly lapse the listing of older products once it is no longer viable to produce spare parts for repair.

As we only have a limited amount of funding in relation to our overall need fire alarm work must be prioritized against other critical work and the need to provide improvements to support improved educational performance combined with the code upgrades, listing requirements, and

manufacturers improvements we must budget a reasonable amount of funding for fire alarm capital replacement year over year.

THE FUTURE

We have been focused on providing Buildings & Grounds a solid foundation of systems that are standardized and reduce maintenance expenses and time through remote notification of equipment malfunctions and remote diagnostics. These systems allow B&G electricians to know what part or component needs replacement or service before they leave the shop so they can have the right part on the truck. These systems also support remote monitoring so B&G can help respond to alarms and cancel false alarms on off hours. These efficiencies are offset in higher costs for increasingly complex technology. Our overall costs are up over time.

OUSD has prioritized fire alarm needs based on replacement of outdated systems as spare parts become unavailable. More of our buildings are protected by more up to date and reliable systems. Our future needs can now be planned for based on expected end of life dates rather than urgent projects to replace failed systems.

It is important to remember that a fire alarm is a piece of technology and has an expected life significantly shorter than a building system like windows, doors, or ventilation. Appended to this report is a summary of the fire alarm work at our sites with costs to date, expected life, and recommended budget for replacement.

The appended report summarizes our fire alarm improvements at every site and includes the model of the main control panel and approximate timeframe for replacement. Districtwide (108 sites), we have spent an average of \$1.3 million/year on routine maintenance and repair. We anticipate these costs to continue at the same level for the foreseeable future. The efficiencies gained in remote diagnostics and repair are offset by the increased cost of components and training necessary to properly service the equipment.

Based on the data from the Jacobs report (site condition data for the Blueprint) we should be budgeting \$4.25 million/year into the future to be able to replace these systems. This budget need will be split between Deferred Maintenance and Capital Funding with Deferred Maintenance funding the Fire Alarm only projects and the Capital Fund funding the fire alarm portion of larger site improvement projects.

Attached is a Summary of all Fire Alarm Systems

APPENDIX 7.2: SAFETY MATTING MASTER PLAN

OAKLAND UNIFIED SCHOOL DISTRICT DEPARTMENT OF FACILITIES PLANNING & MANAGEMENT

Safety Matting Master Plan
October 18, 2019

This Safety Matting Master Plan provides a primary input to the Facilities Master Plan and resulting Capital Building Programs. The selection, design, and installation of the Safety Matting throughout the District also have a direct relationship to maintenance and repair loads and the capacity of Buildings & Grounds to support safe facilities Districtwide.

BACKGROUND

Fall safety is an important element to maintaining safe play structures across the District and limit injuries.

Impact attenuation is achieved through various matting or loose fill options to reduce the impact intensity of a fall or jump from a play structure.

Loose fill is sand, bark, or wood chips at sufficient depth to soften impact. Loose fill is very economical and is significantly lower in first cost than all other options. Loose fill is subject to spreading and tracking outside of the play area. Loose fill requires regular maintenance to clean up the spread material, redistribute the material to ensure proper depth and protection, and clean the material of contaminants and sharp objects left as litter or vandalism. Loose fill is only suitable in situations where vermin or domestic animals can be excluded and where there is sufficient staff resources to inspect the fill on a daily basis for contaminants, even out any low spots and clean up the spread or tracked material.

Since OUSD does not have the resources to support this daily work, OUSD does not permit loose fill as there is no practical way to ensure safety or document the maintenance of safe conditions

There are two major safety matting product types on our play structures:

1. Poured in place shredded rubber troweled in place
2. Compression formed granular rubber tiles

Both of these products are significantly more expensive than loose fill.

The poured in place/troweled in place product was our standard until 2013 and does offer good initial fall safety. We do have to perform fall safety tests on all troweled in place products since it is a field installed product. We have found that wear is excessive. Areas under slides and

swings usually require replacement in one or two years. Replaced areas must be retested after each replacement or repair. Maintenance on each poured in place mat averages \$3,200/year

CURRENT

Our current standard for safety matting is compression formed granular rubber tiles. Our current standard matting material is DuraSAFE playground matting. This is currently a sole source procurement as there is no known equal. There is at least one competitor coming to market, but they have not passed all the required safety tests. We have standardized on this product for the following reasons:

1. Durability: DuraSAFE has been in use at OUSD for over 7 years. During that time we have not replaced any product due to damage or vandalism. Previous products also degraded through UV exposure or age. Other products must be replaced or extensively repaired and retested on 3 to 7 year cycles.
2. Safety: DuraSAFE is pretested and documented to meet safety standards over time. All other products need regular testing as product degrades and regular repairs or replacement as matting wears away under swings and slides.
3. Life-cycle costs: DuraSAFE costs 50% more than other matting materials. The long term durability and safety result in savings over time of two to three times the installed cost.
4. Yearly maintenance costs are limited to power washing (we included a cost for tile replacement, but we have not had to replace any tile to date). Maintenance on each DuraSAFE mat averages \$1,250/year.

We did replace a small amount of edge tile on early installations to improve access compliance.

FUTURE

The appended report summarizes our 111 safety mats and includes the type of safety matting, the expected replacement date, and yearly maintenance costs. We plan on replacing all poured in place matting with DuraSAFE as the poured in place reaches its end of life. We will continue to monitor the market to utilize a competitive product when it meets all standards and safety tests.

Based on this report we will need to budget \$271,560/year for routine repair and maintenance of all safety matting. Once we have fully transitioned to DuraSAFE we expect this yearly cost will be reduced resulting in a year over year benefit to the District and allow B&G to better focus on other high priority needs. We also need to budget \$617,092/year in capital and/or deferred maintenance fund for replacement of end of life safety matting. This amount will enable us to replace the poured in place product at end of life and then continue to replace the DuraSAFE or comparable product on a much less frequent (but more expensive unit cost) basis.

Attached is the Summary of all Safety Matting in OUSD

Site Profiles

Site Inventory

Site Name	1025 2nd Avenue	School Programs at Site:
2018 Alternate Name	OUSD Administration Building	
2012 Master Plan Name	1025 2nd Avenue	

Site Information Source: MKThink Site Data, 2019			
Site Type	Vacant	Street Address	1025 2nd Avenue
Region	Central	Site Acreage	1.6
District		Building Area (Net SF)	96,900

The 1025 2nd Ave. site includes both the 1025 2nd Ave Paul Robeson Building and the Ethel Moore Building. There is no current approved reutilization plan for this facility to determine if the buildings will be reused or demolished. As of the production of this Master Plan, the most recently approved project at this site was a complete rehab and renovation of both buildings including structural upgrade and complete systems and finishes replacements. The final estimate for the approved plans was \$85 million, not including the multipurpose building and teaching kitchen proposed for Dewey.

Any new proposals for reuse of this site would not be able to be completed in a bond cycle arising out of this Facilities Master Plan. Planning for a new project could be initiated with funding to be procured from a budget established after a following master plan.
