RE: Proposal for Architectural Services for Kaiser
Elementary School DSA Uncertified Structure Assessment

Dear Ms. Ledezma,

Thank you for the opportunity to provide this investigative service proposal for the Kaiser Elementary School DSA Uncertified Structure Assessment. As you are aware, we have been working on the District's Kaiser Elementary School Finishing Kitchen project, and are familiar with the DSA requirement to provide DSA certification to the structures on site that have not been documented. We are interested in assisting the District to assess the conditions of the structures that have not been certified or approved by DSA in order to generate an approach to resolve the issue.

We understand that the following structures on site have no documentation of DSA certification;

- Two classroom modular structures
- Two shade structures in playground area
- Fire alarm system installed throughout campus will require confirmation of DSA approval

Our service will include a review of existing conditions and outlining a process to resolve the certification issue.

We note that there are uncertainties. The following scenarios may be anticipated.

SHADE STRUCTURES:

1. Existing shade structures are determined to be DSA pre approved structures. The anchorage information can be verified by an Inspector and/or testing lab, and the structures are certified as-is.
2. Existing shade structures are determined to be non-DSA pre approved types; however, the construction and the design are determined to be adequate per the DSA structural requirement. A full engineering documentation will need to be generated per the existing

condition for a DSA approval. The structures are verified by an inspector and/or testing lab. Then the structures are certified.

3. Existing shade structure are determined to be constructed of minimal quality that does not meet the structural requirement. The structures will need to be demolished and/or replaced with new.

MODULAR CLASSROOMS

1. Structures are determined to be DSA Pre-approved/Pre-checked structures. The location, the building layout, and the building systems, including the fire alarm are found to comply with the code requirement. The installation will need to be verified by an Inspector and/or testing lab.
2. Structures do not have DSA Pre-check documentation. A full design package will need to be generated to comply with the rehabilitation requirement.

As illustrated above, we currently do not have enough information to furnish a full understanding of the project scope. The work proposed is to review existing information, including any available documents, and to provide an outline of process as well as an order of magnitude cost impact.

We propose to deliver the following:

- Provide site assessment of modular buildings and shade structures.
- Research manufacturer of modular buildings and shade structures.
- Coordinate with DSA to locate PC drawings for construction of modular buildings.
- Generate code analysis relating to modular structures as classrooms.
- Meet with DSA to discuss acceptable approaches to certifying the existing structures.
- Generate project schedule and order of magnitude project budget.

Upon completion of the assessment, a full documentation will be required. We can furnish a design fee proposal to complete the project upon the final direction from the District, based on our report. Please refer to the attached Project Budget Worksheet for detailed understanding of the project deliverables and scope.

To complete the project as outlined, we propose the total fee of \$9,000.00.

The fee is fully burdened and no additional reimbursable expenses will be required.

We thank you for the opportunity to submit this proposal and look forward to continue providing value-added service to the District.

Cordially,
