Proposed Expenditures

Guidelines

1. In the following sections, please discuss your team’s plan to address the goals of G1:
 - a. Increase access to courses in arts, music, and world languages in grades 6-8.
 - b. Improve student retention during the transition from elementary to middle school.
 - c. Create a more positive and safe middle school learning environment.
2. Please explain how you plan to use the Measure G1 funds to meet the goals, as measured in the METRICS section of this proposal.
3. Add additional lines as needed.
4. The total of all items should equal the amount listed in "Recommended Grant Amount" on page 1
5. Expenditures must supplement, not supplant expenditures made from other funding sources. In other words, Measure G1 funds must be used for new expenditures, expenditures already funded from Measure G1, expenditures previously paid for by a funding source that has ended, or to pay for an expenditure that would have been cut, were it not for Measure G1 funds.

FCSO Plan: 2024-25 and 2025-26 Focus on Math

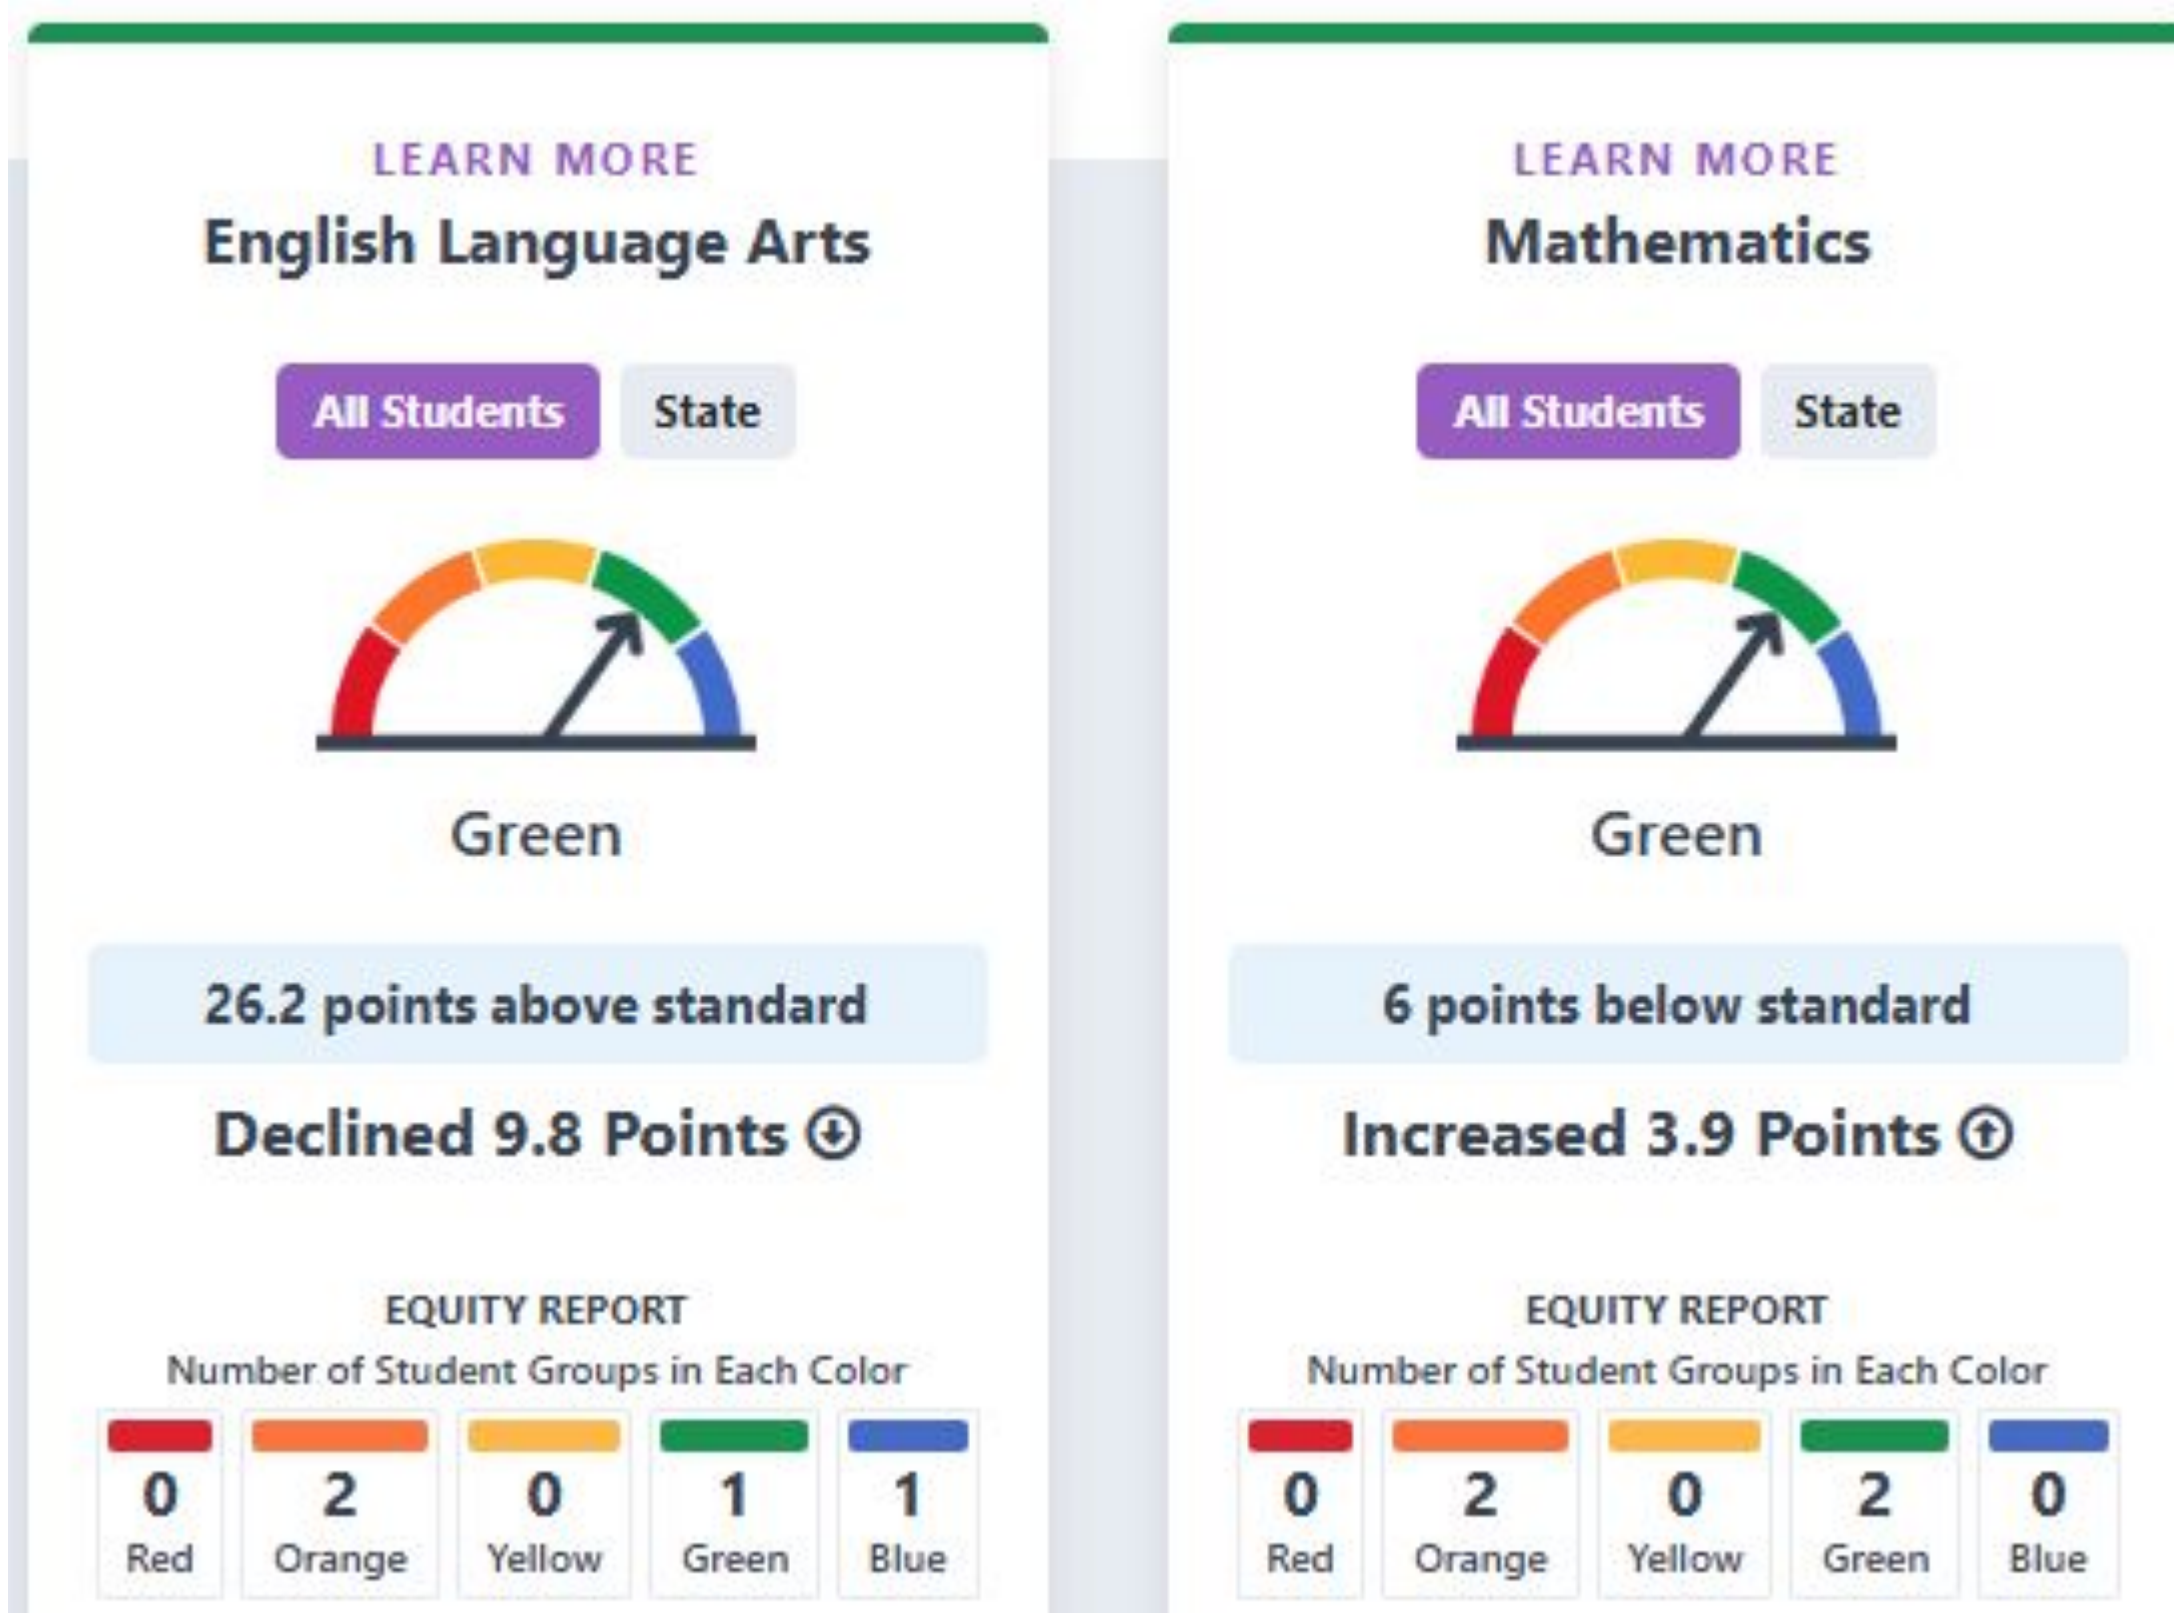

Current Mathematics Instructional Practices at FCSO : In the current language immersion model, Mathematics is taught in French in Grades TK-8. However, all instructional materials adopted by the school are in English. Students therefore engage in Math thinking and work output in English. In the 2023-2024 school year, according to CAASPP results, all student subgroups underperformed in Math as compared to English Language Arts.

2024-2025 Instructional Improvements: In August 2024, we conducted a survey of Math teachers to better understand their needs related to improving Math instruction. Survey results indicated that teachers largely required more support in differentiating Math instruction and accommodating the needs of language learners. Qualitative and quantitative data gathered during teacher observations in December 2024 indicated a need for professional development around lesson planning. We subsequently organized and led professional development around differentiating instruction and lesson planning. Training topics included [aligning lessons to Common Core State Standards](#), [planning vocabulary instruction](#), [the basics of lesson planning](#), [Universal Design for Learning](#), [developing Tier II interventions](#), The next logical step in improving Mathematics instruction is to create French-language translations of key Eureka Math curricular materials. This would allow teachers and students to engage with Math content, and produce Math work, more exclusively in French.

Proposed Improvements: The next logical step in improving Mathematics instruction is to create French-language translations of key Eureka Math curricular materials. This would allow teachers and students to engage with Math content, and produce Math work, more exclusively in French. The translation project would involve creating a French-language version of each Eureka Math exit ticket in grades 2-8. Exit tickets in grades TK-K are not language-heavy, and those in Grade 1 have already been translated.
