1. **Description of Services to be Provided:** Provide a description of the service(s) the contractor will provide. Be specific about what service(s) OUSD is purchasing and what *this* Contractor will do.

Mr. Rega will be responsible for computer lab inventory as far as assessing all technology within and organizing any and all working equipment from any and all non-working equipment. After assessment, setup and optimization of the computer lab is a priority to make it usable by students. Once the lab is set up any repairs that can be done to non-working equipment will be important to know what needs to actually be replaced. Outside of the computer lab, Mr. Rega will be responsible for general maintenance of technology within the classrooms, first in assessing specific needs (repairs, replacement, peripherals), and then in troubleshooting and providing any network support needed. Rega will also use any opportunity possible to assist in helping teachers become better prepared and equipped to troubleshoot on their own.

2. **Specific Outcomes:** What are the expected outcomes from the services of this Contract? Be specific. For example, as a result of the service(s): 1) How many more Oakland children are graduating from high school? 2) How many more Oakland children are attending school 95% or more? 3) How many more students have meaningful internships and/or paying jobs? 4) How many more Oakland children have access to, and use, the health services they need? Provide details of program participation (Students will...) and measurable outcomes (Participants will be able to...). NOT THE GOALS OF THE SITE OR DEPARTMENT.

In providing these services, students will have a more rounded education, being introduced and trained on technology sooner and more effectively. With these resourced kept in good repair, teachers will be more fluid and allow teachers to be more effective at delivering their lessons. These two critical factors combine to make more confident students, higher test scores (as State is computer based now), higher ability to access meaningful researches, which will increase the success of the school. This will lead to higher enrollment and more graduations as these prepared, intelligent, students progress through their students career.
