Subject: Proposal to Perform SWPPP Inspections for the Oakland Unified School District Bret Harte Middle School Project

Dear Ms. Sims:

Terraphase Engineering Inc. (Terraphase) thanks the Oakland Unified School District (the District) for the opportunity to submit this Proposal to Perform Storm Water Pollution Prevention Plan (SWPPP) Inspections for the Bret Harte Middle School (the Project) located at 3700 Coolidge Ave in Oakland, California ("the Site").

Our understanding is that the Project currently has coverage under the State Water Resources Control Board (SWRCB) Order No. 2009-0009 DWQ (as amended by Order Nos. 2010-0014 DWQ and & 2012-0006-DWQ) General Permit for Construction (CGP). Our services would begin immediately upon contract approval and would extend through final stabilization and permit closure. For the purposes of this proposal we have assumed this period to extend from March 19, 2018 through April 30, 2018, per discussions with Mr. Mike DeLong of Verde Design, Inc.

Scope of Work

Task 1: SWPPP Training, Inspections, and Sampling

Terraphase will conduct on-site BMP and stormwater awareness training. The BMP training scope includes training materials preparation, contractor and subcontractor notification, presentation, and travel to the site. The BMP training will include one 1-hour training seminar for contractors and subcontractors associated with project proposed construction activities, and will occur in a tailgate training format.

Terraphase will perform regular inspections in accordance with the requirements of the CGP. This will include:

- Pre-storm inspections and Rain Event Action Plan (REAP) preparation within 48 hours of forecasted rain with a 50% or greater chance.
- During-storm inspections once every 24-hour period during extended rain events.
- Post-storm inspections within 48 hours of conclusion of qualifying rain events (a precipitation depth of 0.5" or greater).
- Conduct weekly inspections during periods of no rain.

- One quarterly non-stormwater inspection (in tandem with one of the inspections above). Filing inspection reports in the onsite Storm Water Pollution Prevention Plan (SWPPP) and providing copies to relevant team members
- Periodic project coordination, weather forecasting, and management

This task assumes that Site monitoring tasks will begin March 19, 2018 and will conclude by April 30, 2018. Terraphase will coordinate with Site personnel on an ongoing basis, track construction progress and changing site conditions, conduct weather forecasting, and manage scope, schedule, and budget. Terraphase will work directly with construction personnel and project managers if corrective actions (including additional BMPs or BMP maintenance) are required based on inspection results.

Terraphase's QSP or their designee will conduct inspections of the construction during business hours, which are assumed to be approximately 7 am to 5 pm Monday through Friday. Tracking of rainfall and inspections will be performed in accordance with the site-specific SWPPP. Up to twenty inspections have been assumed. Inspections will be conducted weekly and surrounding rain events (before, every 24 hours during, and following qualifying events). Inspections will be conducted or overseen by a Terraphase Qualified SWPPP Practitioner (QSP). This task also includes compliance training, required by the CGP for all onsite personnel. Training will be conducted onsite, in a tailgate format, at construction kickoff and subsequently during inspection visits, as needed.

If weather or construction schedule dictate further visits, sampling, or reporting is necessary, additional fees will apply. Only with written authorization from the District will additional work be conducted.

pH and Turbidity Sampling

Terraphase will collect storm water grab samples from locations characterizing active construction, within the first two hours of discharge from rain events that occur during business hours and which generate runoff. The storm water grab samples obtained will be representative of the flow and characteristics of the discharge. At a minimum, Terraphase will collect 3 samples per day of the event, and analyze them for pH and turbidity using field meters. Terraphase will collect run-on stormwater samples, if necessary, to assess the contribution of the Site(s) to pollutants in run-off. Five days of runoff sampling have been assumed.

Non-Visible Pollutant Sampling

Collection of discharge samples for non-visible pollutant monitoring will be triggered when pollutants associated with construction activities have the potential to be discharged with storm water runoff due to a spill or in the event there was a breach, malfunction, failure and/or leak of any BMP. Sampling for non-visible pollutants will be conducted during the first two hours of rain events. Samples for non-visible pollutants and a sufficiently large uncontaminated background sample will be collected during business hours and for rain events which generate runoff. Lab analysis costs are not included and will be provided if such work becomes necessary and once potential pollutants are determined. Up to five sampling events have been assumed.

Additional Assumptions

- Permit fees will be paid by the District.
- An employee of Verde Design, Inc. will continue to serve as the Qualified SWPPP Developer (QSD). The QSD will perform all SWPPP updates that are required online per the CGP, prepare the Annual Report, and prepare the Notice of Termination.
- All deliverables will be provided in electronic format.

Cost Estimate

A twenty percent contingency has been added to the project as shown in the following table, which will not be used without District approval. Our not-to-exceed cost for performing the work is \$22,144 (\$18,453 plus contingency of \$3,691). A detailed cost estimate is provided in the attached table.

Closing

Thank you for the opportunity to provide the District with this proposal. If you have any questions, please contact Hans Kramer at 510-414-6169 or Alice Hale Price at 510-390-1276.

Sincerely,

For Terraphase Engineering Inc.
