Date Prepared: Wednesday, March 21, 2018

#### Scope of Work Description

Task 1.0 Asbestos & Lead Survey and Report

ACC shall conduct a limited asbestos survey and lead paint screening of Fruitvale Elementary School, in connection with the planned Fire and Intrusion Alarm project. ACC will conduct an asbestos survey per OSHA protocol for the survey areas.

ACC estimates up to 80 asbestos bulk samples will be collected and delivered to an independent laboratory for analysis by Polarized Light Microscopy (PLM) with a 24-hour turnaround time. PLM samples include up to 3 layers within each sample; multi-layered material include floor tile and adhesives, gypsum wallboard, taping compound, texturing compounds, roofing materials, etc. ACC has designed the work using a team comprised of Cal/OSHA certified personnel to perform the asbestos survey work.

ACC will conduct a limited lead bulk sampling screening of representative major paint colors for the interior and exterior of the site focusing on paints likely to be impacted by the project. Samples will be collected by ACC's California Department of Public Health (CADPH) Certified Lead Inspector Assessors and Sampling Technicians. One to three samples of each homogenous suspect lead-containing materials will be collected. Visible color and texture of suspect materials will determine homogeneity. Analysis of lead samples will be by NIOSH 7082 Flame Atomic Absorption (Flame AA). Samples will be delivered to an American Industrial Hygiene Association (AIHA ELLAP) and California Department of Public Health certified laboratory for metals analysis using NIOSH 7082 under a 24-hour turnaround time. At ACC's discretion, the laboratory may be instructed not to analyze additional homogeneous material samples after a material tests positive. ACC shall prepare a report of findings, which will include material descriptions, sample locations, descriptions of locations of materials tested, and quantities of asbestos-containing materials and of any lead-containing damaged/peeling paints or materials at the subject sites.

### Task 2.0 Asbestos and Lead Work Plan

ACC shall prepare technical work plans for the management of asbestos and lead containing materials that will be impacted by the planned project activities. The work plan will include: the scope of work, written requirements and procedures to be followed during containment/work area preparation, asbestos and lead-based paint work.

Following Client's approval of the written technical specifications, ACC will conduct a bid walk, in conjunction with Client representatives, with prospective contractors and develop any necessary clarifications to successfully price the building materials-related removal of asbestos, lead and universal waste materials. ACC will summarize abatement contractor bid packages and provide award recommendations for Client consideration.

### Task 3.0 Project Management and Oversight (subject to change based on findings of surveys and Contractor's schedule):

ACC shall provide project management and air monitoring services during the work which disturbs asbestos containing materials and lead related activities. These services include air monitoring, on-site management of contractor activities, visual inspections, final clearance sampling, and project documentation.

ACC shall staff the project with a minimum of one full-time Certified Asbestos Professional and California Department of Public Health Lead Certified Personnel as required during the abatement contractor's schedule, Monday to Friday, 8-hours per day during normal working hours. ACC's personnel will be scheduled according to the abatement contractor mobilization, size of work area and expected number of daily personnel.

ACC representatives will be on-site during times when disturbance to asbestos and lead is scheduled unless otherwise directed by the Client. ACC representatives will observe contractor activities and perform daily air monitoring outside the work areas, review the work procedures, monitor compliance with federal, state and local regulations pertaining to asbestos related work, monitor schedule compliance, observe worker safety procedures and prepare a daily log of contractor activities while on-site.

ACC will use PCM (NIOSH 7400) analysis of all airborne asbestos samples on the project. In the event a sample exceed regulatory guidelines, ACC will submit the sample for TEM (AHERA) analysis upon request of the Client as additional analytical costs. Lead work will be visually inspected for adequate workmanship in relation to the work plan requirements; no lead air/wipe samples will be collected unless directed by the Client and charged at additional cost.

At the completion of the project, ACC shall submit a final project documentation package to client.
