Date Prepared: Friday, September 9, 2016

Scope of Work Description

This change order is submitted to address actual requirements for site work and schedule related to abatement of asbestos and lead containing materials by Sterling Environmental prior to demolition. The proposal is based upon current information obtained from Alten and Sterling.

ACC shall provide project management and air monitoring services during the removal of asbestos containing materials. These services include air monitoring, on-site management of contractor activities, visual inspections, final clearance sampling, and project documentation

ACC shall staff the project with one full-time Senior Technician / Certified Asbestos Consultant or Certified Site Surveillance Technician during the abatement contractor's schedule, estimated to be an additional 20 days, Monday to Friday, 8-hours per day during normal working hours. ACC's personnel will be scheduled according to the abatement contractor mobilization, size of work area and expected number of daily personnel.

ACC representatives will be on-site during the containment setup through the completion of the abatement activities unless otherwise directed by the Client. ACC representatives will observe contractor activities and perform daily air monitoring outside the work areas, review the work procedures, monitor compliance with federal, state and local regulations pertaining to asbestos related work, monitor schedule compliance, observe worker safety procedures and prepare a daily log of contractor activities while on-site.

ACC will use PCM (NIOSH 7400) analysis for perimeter airborne asbestos samples on the project. ACC will submit clearance samples for TEM (AHERA) analysis as necessary.

A final project report will be provided after the completion of the abatement project.

Additionally, ACC will collect asbestos and lead samples as necessary to help define the scope of work from the original survey and evaluate hidden conditions.

ACC also was requested to attend two community meetings to address concerns related to abatement.
