Written notice by the District Superintendent or designee shall be sufficient to stop further performance of the Services by Contractor or the Contractor Parties. In the event of early termination, Contractor shall be paid for satisfactory Services performed to and including the date of termination. Upon payment by District, District shall be under no further obligation to Contractor, monetarily or otherwise, and District may proceed with the work in any manner District deems proper.
4. **Termination.** District may terminate this Agreement at any time by giving written notice to Contractor if Contractor materially breaches any of the terms of this Agreement, any act or omission of Contractor or the Contractor Parties exposes District to potential liability or may cause an increase in District’s insurance premiums, Contractor is adjudged bankrupt, Contractor makes a general assignment for the benefit of creditors, or a receiver is appointed because of Contractor’s insolvency. Such termination shall be effective immediately upon Contractor’s receipt of the notice.

RE: SWPPP Consultant Proposal for Demolition and Construction Activities at Cole
Campus Central Administrative Center (CAC)

Dear Mr. Nakadegawa:

We are pleased to submit this proposal to develop a Storm Water Pollution Prevention Plan (SWPPP) and to provide the Oakland Unified School District ("District") support in maintaining compliance with the Construction General Permit ("General Permit"), Order No. 2009-0009-DWQ, adopted by the State Water Resources Control Board (SWRCB) and enforced by the San Francisco Regional Water Quality Control Board (SFRWQCB) for stormwater runoff associated with construction activities.

Background

Although we have provided many different types of services related to environmental protection, its focus has been compliance with the General Permit. This includes the preparation and review of storm water pollution prevention plans (SWPPPs) for government agencies, providing ongoing site monitoring and staff training, and acting as a liaison between the Contractor, government agency or Legally Responsible Person (LRP) and SWRCB/SFRWQCB. Our personal relationship with SFRWQB over the past 10 years benefits our clients with expediting permit coverage and resolving action notices.

We have successfully developed hundreds of SWPPPs, within or under budget, for a variety of different school district projects within the State of California. This also includes the following successfully completed and active projects with the District:

Montclair Elementary School – New 2-Story Classroom Building with Faculty Room (under separate contract with West Bay Builders), April 27, 2012 through July 25, 2013.

Greenleaf Elementary School – Whittier Expansion and Renovation (under direct contract with District), June 12, 2015 through June 5, 2017.

Glenview Elementary School – Increments I and II (under direct contract with District), July 2, 2016 through *March 1, 2021*.

Fremont Highschool – Demolition and Construction of Administration and Classroom Buildings (under direct contract with District), March 19, 2018 through *May 1, 2021*.

Demolition and Construction Activities at Cole Campus CAC

Working with the District for the past five years has been an honor. The District's staff are helpful when there is an issue to be resolved and proactive with preventing mishaps and protecting the District's interests. This has made our job easier. Our growing relationship in working together on new jobs helps us better understand the strengths and weaknesses of the District. This allows us to be more efficient by focusing attention on areas that need fine tuning. Given this, we believe a 2-member team, including myself, will be best fit to meet the needs of the District.¹ This includes:

Team Member	Credentials	Assignment
Robb Hertz Project Engineer	CPSWQ, QSP, QSD	<ul style="list-style-type: none">✓ Develop contract specifications✓ Design SWPPP✓ SMARTS management✓ Monthly site assessments and record audits
Pamela Llewellyn Project Inspector	CPESC, QSP, QSD	<ul style="list-style-type: none">✓ Weekly site inspections✓ Weather monitoring✓ Water sampling✓ State reporting

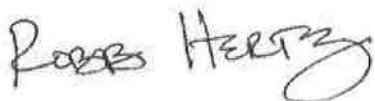

Philosophy

Ultimately, everyone involved in a construction project, including seasoned SFRWQCB staff are working together to achieve the same goal—to protect the quality of stormwater. With the exception of willful negligence, it is always expected to encounter mistakes and mishaps during a construction project. These problems must be confronted with sensible alternatives and qualified persons that understand the Contractor's main role. Substitute ridicule and blaming with patience and education will everyone's goal be achieved.

We operate under the principle of Occam's razor, which is the argument that for every problem that is encountered, the simplest explanation that has the fewest assumptions tends to be the best solution. Hence, our slogan, *quality through knowledge, experience and keeping it simple*.

We greatly appreciate the opportunity to submit the attached proposal for your consideration.

Respectfully submitted,

Robb Hertz

RE: SWPPP Consultant Proposal for Demolition and Construction Activities at Cole

Campus Central administrative Center

- The project is located at Cole Middle School, 1011 Union Street, in the City of Oakland, Alameda County.
- The project consists of demolition and sitework associated with the administrative center.
- It is our understanding that the District wishes to have HERTZ act on behalf of Oakland Unified School District (OUSD) to maintain full compliance of the Permit.
- The SWPPP shall be designed to be amendable to incorporate subsequent construction phases following completion of Phase I. This saves time and prevents unnecessary spending in preparing new SWPPPs applying for new permits for each construction phase.

Scope of Work

I Pre-Bid Planning and Coordination

The following list of activities is recommended prior to preparation of the SWPPP and obtaining coverage under the Permit:

Cole Campus Central Administrative Center

1. Meet with OUSD project management to discuss project including construction schedule, erosion and sediment control recommendations, and Permit requirements.
2. Prepare draft Water Pollution Control Section in the bid/contract specifications that describes Contractor's responsibilities to implement SWPPP and maintain compliance with the Permit.

II Preparation of SWPPP

Prepare a Storm Water Pollution Prevention Plan for the referenced project that includes the following components, pursuant to the requirements of the Permit.

1. Conduct a risk assessment to determine what Risk Level (1-3) the project is by determining the potential rate of erosion (using the Revised Universal Soil Loss Equation (RUSLE)) and risk of discharge to a beneficially-impaired water body per Appendix 1 of the Permit.
2. Provide description of existing soils and determine hydrologic soil group (HSG) and determine runoff coefficients between pre- and post construction, as needed.
3. Perform a preliminary hydrologic analysis of the project site including calculating the change in runoff rate and volume between pre- and post construction (Δq), as needed.
4. Identify onsite pollutant sources and recommend Best Management Practices (BMPs) that address the following:
 - a. Erosion control;
 - b. Tracking control;
 - c. Sediment control;
 - d. Wind erosion control;
 - e. Non-storm water control;
 - f. Waste management and materials pollution control;
 - g. Management of discharges to ground surface and watersheds;
 - h. Protection of natural waterways and municipal storm drains.
5. Prepare a Water Pollution Control Drawing (WPCD) and a typical BMP construction sheet. Please note that if no erosion control plan is available, Client's topographic survey or improvement plans will serve as a base map.
6. Prepare a Rain Event Action Plan (REAP) as required.
7. Prepare a Construction Site Monitoring Program (CSMP) as required.
8. Include templates for training logs, monitoring programs, sampling data and inspection reports.¹

¹ To be completed by Contractor's Qualified SWPPP Practitioner (QSP) in addition to any required annual compliance reporting. QSP or LRP must also submit an Annual Report to SWRCB via SMARTS each year before September 1.

Cole Campus Central Administrative Center

9. Provide recommended BMPs and their locations on the WPCDs.
10. Provide SWPPP in electronic format and one (1) hardcopy. *Per the newly adopted CGP (effective July 1, 2010), the SWPPP must also be uploaded directly to SWRCB by the Legally Responsible Party (LRP) or via the assigned Data Submitter (DS).*
11. Provide post-construction water balance calculations for projects outside a Phase II permitted area, as required.
12. Be available for questions by the site superintendent and make appropriate revisions to the SWPPP throughout the construction/demolition process, as needed.
13. Provide additional compliance support to the site superintendent to provide to agency inspectors in the event that a Notice to Comply (NTC) or Notice of Violation (NOV) is issued. (Site Superintendent is strongly encouraged to keep a camera phone or digital camera readily available).
14. Groundwater: provide a schedule of Pollutants of Concern (POC) and instructions for the sampling consultant in the event that groundwater is encountered. Groundwater plan will be incorporated into the SWPPP for review by the lead agency² and will be prepared according to the guidelines of the Permit.
15. Prepare a Sampling, Analysis, and Monitoring Plan.
16. If groundwater is encountered and if the Contractor (with Lead Agency approval) choose not to allow water to recharge, either:
 - a. Assist District to submit an application for a dewatering discharge permit with the San Francisco Regional Water Quality Control Board (SFRWQCB) to allow discharges to surface, or
 - b. Assist Contractor with obtaining a permit with the County of Alameda to discharge to sanitary sewer, or
 - c. Coordinate with outside party to pump water to baker truck to be delivered to a State-certified off-site water treatment facility.

² Lead agency is the government entity that requires a SWPPP (e.g., city, county, Caltrans, federal or combination of government agencies).

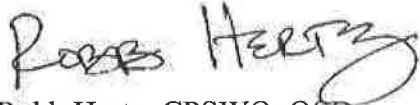

III QSP Site Inspection, Reporting and Permit Compliance (SMARTS Management)

1. Prepare and submit (on behalf of District) Notice of Intent (NOI) including upload of all project review documents to SMARTS.
2. Coordinate with SWRCB to expedite obtaining coverage under the Permit and issuance of a waste discharge identification (WDID) number.
3. Provide SWPPP and Permit compliance training to Contractor and subcontractors at tailgate meetings.
4. Conduct at least weekly site inspections to
 - a. Audit Contractor's performance in implementing SWPPP,
 - b. Provide ongoing education to Contractor and subcontractors to maintain compliance with Permit, and
 - c. Complete required BMP Inspection Reports for weekly and pre-/ post-storm events.
5. Collect water samples during qualifying rain events, as required for Risk Level 2 and 3 projects.
6. Coordinate with outside laboratory for analysis of water samples to test levels of pH and turbidity, as required for Risk Level 2 and 3 projects.
7. Submit lab results (ad hoc reporting) and submit corrective action reports, if necessary, to SWRCB via SMARTS.
8. Follow up with Contractor in performing required corrective actions per SOW Items 6 and 7.
9. Complete required reports including rain event action plans (REAPs), training logs, quarterly construction site monitoring reports for non-visible pollutants, and compile weekly, pre-/post-storm BMP inspection checklists into Annual Report.
10. Prepare and submit (on behalf of District) Annual Report on or before September 1 of each reporting year.
11. Provide additional compliance support to Contractor in the event that a Notice to Comply (NTC) or Notice of Violation (NOV) is issued. Coordinate necessary corrective actions directly with SFRWQCB.
