RE: Oakland USD – International Community School Softball Field and Cesar Chavez Soccer Field Turf Replacement Assessment
Verde Design Proposal No. 2407700M

Dear Preston,

In response to your request, Verde Design is pleased to submit the following proposal to provide the identified synthetic turf field assessment and recommendations for International Community School's softball field and Cesar Chavez soccer field. This proposal shall remain valid for a period of sixty (60) days.

PROJECT APPROACH AND UNDERSTANDING:

Verde Design proposes to walk both the softball and soccer synthetic turf fields and then provide a brief report (typically 2-3 pages) providing graphic documentation of the fields' conditions. The document will identify surface deviations, existing turf infill depths, fiber condition, and observed tears or separations for the turf field areas.

The synthetic turf industry has changed dramatically in the years since these fields were installed. Largely the infill systems in the northern California market have shifted to organic infills which reduce the heat generated on the fields. Utilizing a subconsultant to temporarily remove and replace identified portions of the synthetic turf field, Verde Design will perform permeability tests on the existing rock base to determine the performance of the existing permeable stone base. This is a critical analysis to understand how the field will perform going forward and if additional drainage measures are recommended or required. We will also prepare a Rough Order of Magnitude (ROM) recommendation of the anticipated cost of field replacement and associated improvements. Verde Design will compile the information in a report format with our recommendations which will be reviewed with Oakland Unified School District (OUSD).

We have included one meeting with the OUSD team upon delivery of the evaluation report, as well as a Rough Order of Magnitude project budget to address the identified deficiencies. The evaluation includes Gmax (i.e. shock attenuation) testing, which can determine the hardness of the turf field surfaces. Verde Design can complete the above work within two-three weeks of receiving contract authorization.

PROFESSIONAL COMPENSATION:

For the above proposed scope of services that is based on our project understanding and the project timeline identified above, Verde Design, Inc. respectfully proposes a lump sum fee of \$30,880. This fee is based on the current hourly rate of the office as defined by our attached current Charge Rate Schedule, as well as the anticipated work effort that will be required to successfully complete this project.
