LWP is an Aspire Public School

At Aspire, we proudly partner with and serve families and students at 9 schools in Oakland, Richmond, and East Palo Alto.

6 schools are authorized by Oakland Unified School District.

Vision

Aspire scholars are prepared and empowered to build a fulfilling and liberated future for themselves and their communities.

Together we will develop the skills and mindsets necessary to design an *equitable reality* for ourselves, our families, our community, and our world.

Aspire LWP

A Sobrante Park Community School

Chartered in 2002. At the time was the first high school to open in Oakland in over forty years

Renewed in 2007, 2012, 2016

Here tonight to renew for 2025-2030

Designing for Social Change

City Planning to Create a More Equitable Reality in East Oakland

Senior Defense

What social issue will the project attempt to address?

I will be focusing on solving the housing crisis in the Bay Area.

What building will I be designing?

Because I believe that low-density multi-family housing would help the housing crisis will be designing a duplex.

Why did I choose this?

I chose the housing crisis because living in Oakland exposes one to high costs of living with a dangerous and poverty-ridden community. This means residents of Oakland often can't afford to live in a neighborhood that suits their needs. This is worsened by the large amount of single-family residences which makes the amount of housing that can be used for single-family developments to reduce the housing crisis and decrease high costs of living. Although single-unit houses are the backbone of their community, by allowing for single-unit multi-buildings and can go far. As to see their developers there are opportunities as can make both the low-density multi-family housing which include duplexes, triplexes, and quadruplexes.

What are the obstacles? Why hasn't this problem been solved already?

The problem isn't just for cities because developers don't want to purchase the construction of affordable housing and low-density housing because it's usually much less profitable than luxury apartments and expensive single-family houses. One consideration of this is the proliferation of single-family developments in suburban areas near downtowns. If the land is available, and all you can build are a single-family home, why not build a very expensive single-family home? (Strong Davis, Heritage Senior Legal, applies to luxury apartments or condos in urban locations. When land and resources are only, developers will tend to build what will make them the most profit to recuperate the money they put into the total construction. Being developers that develop a huge contributing factor into why developers don't build multi-family housing. All of the reasons that this issue hasn't resolved in California through the passing of a law that has been passing for single-family homes.
