AGREEMENT FOR MATERIALS TESTING AND SPECIAL INSPECTION SERVICES

THIS AGREEMENT FOR MATERIALS TESTING AND SPECIAL INSPECTION SERVICES (“Agreement”) is made and entered into effective **December 12, 2024**, by and between the Oakland Unified School District, a school district duly organized and existing under the laws of the State of California (the “District”), and **Consolidated Engineering Laboratories** (the “Consultant”), with respect to the following recitals:

- A. District proposes to undertake the construction of an improvement project which requires the services of a duly qualified and licensed materials testing and special inspection consultant.
- B. Consultant represents that Consultant is licensed to provide materials testing and special inspection services in the State of California and is specially qualified to provide the services required by the District in this Agreement.
- C. The parties have negotiated the terms pursuant to which Consultant will provide such services and reduce such terms to writing by this Agreement.

In consideration of the covenants and conditions contained in this Agreement, the parties agree as follows:

1. **Retention of Consultant.** District retains Consultant to perform, and Consultant agrees to provide to District, for the consideration and upon the terms and conditions set forth below, the materials testing and special inspection services specified in this Agreement. Consultant agrees to perform such services as expeditiously as is consistent with professional skill and care and the orderly progress of the Project. All services performed by the Consultant under this Agreement shall be conducted in a manner consistent with the level of care and skill ordinarily exercised by materials testing and special inspection consultants specially qualified to provide the services required by the District.
2. **Description of Project.** The project concerning which such materials testing and special inspection services shall be provided (“the Project”) is described as the following: **Garfield Site Renovation Project.**
3. **Term; Basic Services.** The term for performance of the Basic and Additional Services (“Services”) shall be the duration of the Project (“Term”), and Consultant shall complete the Services within the Term. Time is of the essence for performance of the Services under this Agreement. The Project is expected to be complete as of **June 30, 2025**, but may not be completed until later if delays in design or construction arise. Consultant’s “Basic Services” consist of materials testing and special inspection services more specifically described in the attached **Exhibit B**. Consultant shall perform all Basic Services required by this Agreement, even if no more compensation is possible due total compensation having reached the not-to-exceed amount.

If delays in completion of the Project occur that are not caused by wrongful conduct by Consultant, including but not limited to Consultant's breaches of contract or deficient performance of Basic or Additional Services, then Consultant shall be entitled to an amendment to the Agreement that increases the not-to-exceed amounts for Basic Services during the additional time of the Project.

In addition, as a part of its Basic Services, the Consultant shall assist the District in evaluating claims, disputes and other matters in question between the contractor and the District relating to Consultant's work, including but not limited to claims made against the District as a result of Consultant's alleged or claimed errors or omissions, and shall in all instances provide such truthful testimonial assistance as may be required by the District at no cost to the District.

Consultant shall confer and cooperate with District's other consultants. Consultant shall take precautions to minimize any damage due to Consultant's activities. Consultant shall be responsible and liable for any damage Consultant causes through its wrongful acts or omissions.

During the construction phase, Consultant shall visit the Project site when requested by District to observe conditions encountered by the contractor and to assess the progress and quality of contractor's work. Consultant shall participate in job site meetings as requested by District.

The Consultant must comply with the applicable requirements of the Division of State Architect Construction Oversight Process ("DSA Oversight Process"), including but not limited to (a) obtaining a copy of the DSA-approved construction documents and Statement of Structural Tests and Special Inspections (DSA form 103) from the Architect before the beginning of construction; (b) reporting all project related activities to the Inspector of Record (the Inspector of Record is responsible for monitoring the work of the Laboratory of Record and Special Inspectors to ensure the testing and special inspection program is satisfactorily completed); (c) submitting applicable verified reports (DSA forms 291, 292, and 293) to DSA, Inspector of Record, Owner and Architect; and (d) coordinating with the Owner, Owner's Architect, any Construction Manager, the Inspector of Record, and the Contractor to meet the DSA Oversight Process requirements without delay or added costs to the Project.

In the performance of the special inspection duties required by this Agreement, the Consultant exercises limited authority as defined in this Agreement. The Consultant shall not:

- a. Authorize deviations from the construction contract documents;
- b. Avoid conducting any required tests;
- c. Enter the area of responsibility of the contractor's field superintendent;
- d. Expedite the job for the contractor;
- e. Advise on, or issue directions relative to, any aspect of the building technique or sequence unless a specific technique or sequence is called for in the specifications;

- f. Approve shop drawings or samples;
- g. Authorize or advise the District to occupy the Project, in the whole or in part, prior to final acceptance of the Project; or
- h. Interfere in contractor/subcontractor relationships.

If Consultant determines contractor is not meeting the requirements of Consultant's recommendations or the plans and specifications, Consultant shall immediately bring that information to District's attention.

Consultant shall retain all samples for the duration of the Agreement unless the District requests a longer period.

For all Basic Services satisfactorily performed, compensation shall be as described in *Exhibit A* to this Agreement.

4. **Additional Services.** Any services not included in this Agreement but related to the Project shall be considered "Additional Services." Compensation for additional services shall be as described in *Exhibit A* to this Agreement. Consultant shall keep complete records showing all hours worked and all costs and charges incurred for Additional Services. District shall be given reasonable access to those records for audit purposes. Consultant shall provide Additional Services if directed in writing by District to perform specific Additional Services and if sufficient contract funds for Additional Services remain to pay for the directed Additional Services (see *Exhibit A*).

5. **Payment.** Services satisfactorily performed shall be billed monthly via properly documented and submitted invoices. Invoices that are not disputed by District shall be paid within thirty (30) days of District's receipt of the invoice. Consultant shall comply with any applicable prevailing wage law. Consultant shall not be reimbursed for any of its expenses; the parties agree that Consultant shall pay all of its expenses from its fees for Services.

Schedule

Following our receipt of your Notice-to-Proceed (NTP), field exploration for our study is anticipated to occur between two and three weeks after NTP depending on driller availability. Submittal of the report is anticipated to be on the order of three to four weeks after the completion of field exploration. However, if needed, preliminary recommendations could be developed and transmitted to the project design team prior to completion and submittal of the final report. Additionally, we will make every effort to accommodate other adjustments to the proposed schedule to more closely meet the needs of the design team, if possible, subject to constraints regarding completion of field exploration and subsequent laboratory testing.

EXHIBIT B

Scope of Services

The services to be provided for our geotechnical engineering study include the following:

Preliminary Field Activities

- 1) Review existing local geotechnical investigation reports and other available regional data.
- 2) Mark the location of the subsurface exploration at the site using flags, stakes or white spray paint.
- 3) Contact Underground Service Alert (USA) for liability purposes and obtain Ticket Number. Note that USA participant agencies (e.g., EBMUD, PG&E, Comcast Cable, AT&T) will generally not enter private property to perform marking services.
- 4) Utilize an underground utility locating subcontractor to define/clear the boring locations of existing buried utilities.

Field Exploration

- 1) The field exploration program will consist of drilling seven borings within the proposed project area to a maximum depth of about 50 feet below grade.
- 2) Sampling will occur in roughly 3 to 5-foot intervals in the borings, with more frequent sampling generally within the uppermost 8 feet. The soil will be sampled with a Modified California sampler fitted with 6-inch-long inner steel liners; or a Standard Penetration Test (SPT) split spoon sampler. The relatively undisturbed liner samples will be sealed and the SPT samples will be placed in plastic bags. The samplers will be driven 18 inches with a 140-pound hammer with an approximate 30-inch drop. Blow counts for the last foot will be logged as the penetration resistance. The blow counts from the SPT sampler will be utilized to determine subsurface soil characteristics for correlation with USCS soil types. Bulk soil samples will also be obtained from the upper few feet of auger cuttings in the borings or from exposed soil areas.
- 3) Groundwater depth will be measured during and at the completion of drilling of the borings, if encountered.
- 4) The borings will be backfilled with grout by County requirement. All excess drill cuttings will be removed off-site by the drilling subcontractor.
- 5) Field exploration costs assume that field personnel, including the drilling subcontractor, are subject to California Prevailing Wages.

Geotechnical Laboratory Testing

The following laboratory tests would be conducted:

- 1) Several in-situ moisture and density tests will be performed on selected steel liner samples.
- 2) Up to four Sieve Analysis tests may be performed to help determine subsurface soil characteristics and evaluate liquefaction potential.
- 3) Up to four fines content tests (minus No. 200 sieve) may be performed to help determine subsurface soil characteristics and help evaluate liquefaction potential.
- 4) Four Atterberg Limits test may be performed to measure the plasticity and interpret the expansive potential of the near surface soil.
- 5) Up to two Unconsolidated-Undrained triaxial strength test and/or set of 3-point direct shear tests may be performed to help assess the supporting capacity of the subsurface soils for supporting the buildings.

CONSOLIDATED ENGINEERING
LABORATORIES

- 6) One set of Corrosion tests will be performed as required by the 2022 California Building Code (CBC) to help evaluate the corrosive potential of the subsurface soils on buried concrete and metal structures.

Geology and Geologic Hazards (Geohazards) Study

In accordance with the requirements of Title 24, DSA IR A-4 and the 2022 CBC, a Geologic Hazards Study is required since the project site is in a mapped CGS liquefaction evaluation zone. Geologic hazard studies must satisfy requirements imposed by Note 48 of the California Geological Survey. The Geology and Geologic Hazards Study would include site plans, geology maps, soil series maps, geologic cross-sections, a fault map, a liquefaction susceptibility map, and a flood map. A California-registered Certified Engineering Geologist will perform a site reconnaissance of the property. Pertinent geologic maps, literature, and aerial photographs will also be reviewed by our engineering geologist. The local and regional geology and geologic hazards will be discussed.

Engineering Analysis and Report Preparation

A geotechnical engineering and geologic hazards study letter report will be prepared and will contain a site plan showing boring locations; boring logs, laboratory test data, a summary of site soil and groundwater conditions, and engineering properties (i.e., index properties) of the on-site soils. The geotechnical data generated from our field and laboratory testing program will be analyzed and used to develop conclusions and recommendations for use in the design of the aggregate base (AB) layer that will be placed across the entire field and which will support the proposed modular classroom buildings. The report will be submitted to you as an electronic (PDF) copy.

Summary of Fees

The table below provides our estimated breakdown of the fees for our geotechnical engineering and geologic hazards study, as well as the subsequential consultation usually required during the design phase and construction phase observation services. This Lump Sum fee for Phase "PW" was derived based on the estimated costs of the various tasks outlined in the following table which covers services only through the submittal of the study report. Our fees are based assuming that significant environmental contamination (e.g., fuel or other chemical odors) will not be encountered during drilling.

As mentioned, our fees include supplemental consultation with the design team occurring after submittal of our study report. They are expected to include review of plans, specifications, and calculations (as appropriate) and possibly answering questions/providing additional recommendations not included in our report. These services would be provided on a time and materials (T&M) basis in accordance with our Schedule of Fees. As listed in the following table, we suggest you establish an initial T&M budget of **\$2,000.00** for such services.

Geotechnical construction-phase services are preliminarily estimated to consist of grading associated with the placement of AB across most of the existing field, as well as the placement of asphalt for walkways. Our services would primarily include compaction testing, as well as related laboratory testing (e.g. proctors/"curves"). The work would be performed per DSA LEA regulations, including submission of interim and final DSA-293 Geotechnical Engineer-of-Record reports. As shown in the following table, we suggest an initial T&M geotechnical construction budget of **\$4,500.00** be established for this task.
