Subject: Amendment No. 1 – Traffic and Circulation Analysis for Garfield Elementary School New Construction Project (OUSD Project Number 22102)

Dear Mr. Esposito:

At the District's request, Terraphase Engineering Inc. respectfully submits this Amendment 1 to augment the scope of work under our existing CEQA consulting services agreement for the Oakland Unified School District's (District) Garfield Elementary School New Construction Project (Project) to provide traffic and circulation analysis in parallel with the design process.

As discussed with the District, Terraphase anticipates that further amendment of the CEQA scope will be needed based on the change of the project scope. Following project initiation, Terraphase was informed of a significant change in the Project description from that outlined in the District's CEQA Consulting Services RFQ/P dated February 21, 2025. The original scope assumed modernization of existing buildings in their current location. However, the revised Project now proposes construction of new school buildings on the eastern portion of the campus, demolition of existing structures, and a reconfiguration of campus access points, including new entrances and loading zones near the intersection of 17th Street and 23rd Avenue.

This reconfiguration is expected to alter existing traffic patterns around Garfield Elementary School, thereby necessitating traffic and circulation analysis to adequately assess potential transportation-related impacts under CEQA.

Amended Scope of Work: Traffic and Circulation Analysis

Terraphase's current approved scope does not include traffic and circulation analysis. We are therefore requesting an amendment to include this study, which will be conducted by Garland Associates as a subconsultant. Garland Associates will evaluate the proposed campus reconfiguration's impacts on traffic and pedestrian conditions in the surrounding area. The analysis will address the transportation-related issue areas of the CEQA environmental checklist, including: 1) consistency with transit, roadway, bicycle, and pedestrian plans and programs, 2) vehicle miles traveled, 3) safety hazards, and 4) emergency access.

The study will include an inventory of nearby streets—17th Street, 22nd Avenue, 23rd Avenue, and Foothill Boulevard—documenting lane configurations, traffic control devices, sidewalk and bike lane locations, on-street parking, and public transit routes.

As the Project does not increase student or staff populations, a before-and-after traffic volume analysis is not warranted. Instead, the study will focus on the access, safety, and operational characteristics of the new driveways and parking areas (if appropriate), on-site circulation, drop-off/pick-up zones, and emergency access. Vehicular and pedestrian circulation and safety issues on the adjacent streets will be addressed. The analysis methodology, assumptions, and findings will be documented in a technical memorandum and/or in report sections suitable for insertion into an environmental document. The scope assumes Garland Associates will not be required to attend any project meetings.

Project Management and Coordination

Terraphase's Project Manager will oversee coordination with Garland Associates to ensure the analysis meets District planning needs and CEQA requirements, including whether the Project would "substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)." (CEQA Guidelines, Transportation Checklist XVII(c)).

Fee Amendment

The total fee for the expanded work scope is **\$17,545**, detailed as follows:

Task	Fee
Traffic and Circulation Analysis (Garland Associates)	\$12,500.00
10% Subconsultant Administrative Fee	\$1,250.00
Project Management and Coordination	\$2,200.00
10% District Contingency	\$1,595.00
Total Amendment Request	\$17,545.00

Conclusion

Please contact the undersigned if you have questions or need additional information concerning this amendment request. Terraphase remains committed to delivering high-quality, timely, and cost-effective services in support of the Garfield Elementary School New Construction Project.

Sincerely,

for Terraphase Engineering Inc.

Scope of Services

{SR801406}9

General Services Agreement – Terraphase Engineering Inc- (CEQA) Consulting Services .– Garfield Elementary School Modernization Project -
\$81,381.00

3.5.2 CEQA Approach

Based on a preliminary assessment of the Project, the following Cat-Exs from CEQA may apply to the Project:

- Existing Facilities (Class 1): Assuming that components of the Project are consistent with the definition of existing facilities under Section 15301 of the CEQA guidelines, a Class 1 exemption may be applicable.
- Replacement or Reconstruction (Class 2): Class 2 exemption may apply if one of the Project goals is the replacement or reconstruction of existing schools to provide earthquake-resistant structures which do not increase capacity by more than 50 percent.
- Minor Additions to Schools (Class 14): As discussed in Addendum #2, the District has conducted an analysis of the current and future capacity of Garfield Elementary School and found that the Project would result in a capacity reduction based on current class size limits; additionally, the District has found that the Project would not result in an increase in the number of classrooms. As the number of proposed new classrooms is fewer than 10 and additional capacity associated with the Project would not result in a 25 percent or greater increase in student capacity over existing conditions, the Class 14 exemption would be applicable to the Project.

Although a project may meet the class description for a CEQA exemption, Section 15300.2 outlines *exceptions* to the use of a Cat-Ex. Accordingly, to support the District's CEQA process requirements for the Project, Terraphase proposes to develop a technical memorandum assessing the exceptions in support of the application of the Class 1, Class 2, and Class 14 Cat-Exs to the Project. This would provide supporting documentation for a recommended Filing of an NOE (Task 3) or MND (Task 5). Based on the scope of the Project and location of the modernization and upgrades, Terraphase assumes that archaeology, historical resources, and biology studies are not necessary to complete the technical memorandum and support Class 1, possibly Class 2, and Class 14 Exemptions or MND.

Task 1 – Preliminary Assessment

Terraphase will schedule a kickoff meeting with the District and design team to discuss the whole of the Project with respect to CEQA compliance, scheduling, design details, and data needs. Following the kickoff meeting, Terraphase will submit a draft project schedule and a data request list to the District.

Based on the information provided during the kickoff meeting and a review by Terraphase of the data provided by the District, Terraphase will prepare a draft Project Description for the District's review. The Cat-Ex criteria will be evaluated with respect to the draft Project Description to confirm its applicability and ensure compliance with the selected CEQA pathway. This would require confirmation that modernization to existing structures and components would include restoration or rehabilitation to meet public health and safety, unless determined that damage was substantial and resulted from an environmental hazard such as earthquake, landslide, or flood. This would also require confirmation that the Project consists of minor additions to the existing school facility where the addition does not increase original student capacity by more than 25 percent or 10 classrooms, whichever is less; the addition of portable classrooms is also included in this exemption.

Following incorporation of one round of District comments, the Project Description will be finalized and will serve as the basis for either compliance pathway.

If it is determined that the Cat-Ex criteria is not met, or the Proposed Project satisfies an exception, the appropriate CEQA pathway would be to prepare an Administrative Draft IS (Task 4A).

The two potential project pathways are presented below.

3.5.3 CEQA Compliance Pathway – Notice of Exemption

Task 2 – Cat-Ex Analysis

The Terraphase team will prepare the following technical evaluations to support the environmental analysis needed to make a determination regarding the Cat-Ex. Terraphase will evaluate and document the following exceptions to Cat-Exs identified in Section 15300.2 that apply to the class exemptions:

- **Cumulative Impact:** Terraphase will evaluate the potential for cumulative impacts as the result of successive projects of the same type in the same place (e.g., modernization projects on the Project campus) over time.
- **Significant Effect Due to Unusual Circumstances:** Terraphase will evaluate whether “there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances” (e.g., elements of the Project that are not typical projects identified in the class description). An example of an unusual circumstance would be if the project site had been identified as the site of protected cultural resources.
- **Scenic Highways:** Terraphase will evaluate whether the Project site may result in impacts to scenic resources within a state scenic highway viewshed.
- **Hazardous Waste Sites:** Terraphase will utilize the previous reports provided (including, but not limited to, Phase I Environmental Site Assessments, Phase II investigation reports, Underground Storage Tank Removal Reports, etc.) in addition to review of publicly accessible databases (Envirostor and Geotracker) in order to support the Cortese List analysis.
- **Historical Resources:** Terraphase will evaluate if the Proposed Project would result in a significant impact to a historical resource. Based on preliminary assessment, we believe that the school does not contain values which would make it eligible for listing on the California Register of Historical Resources based on its age location and architectural style.

Task 2A (Optional Task – Not included in Base Fee) – Historical Resources Evaluation and Design Review

As noted above, we believe that the school does not contain values which would make it eligible for listing on the California Register of Historical Resources based on its age location and architectural style. However, should evidence be uncovered which suggests a formal evaluation is necessary due to potential ties to history or other factors that may lead to the school itself being a historic resource, Terraphase would retain a qualified professional Architectural Historian to perform the following analysis, which would be incorporated into the Cat-Ex Analysis (Task 2) documentation.

- Terraphase teaming partner, Applied Earthworks, will conduct historical research of the property. A qualified Architectural Historian will review building permits, Sanborn maps, City Directories, newspapers, documents on file at the History Center and the Oakland Public Library, as well as other research sources to prepare a historic context statement for the property. An Architectural Historian will conduct a site visit to the property, which would provide the basis of a detailed architectural description. The property will be evaluated under the criteria of the California Register of Historical Resources, and the character defining features will be identified. The California Department of Parks and Recreation (DPR) 523 Form will be prepared using the California Office of Historic Preservation’s guidelines for recording historic resources. Applied Earthworks would prepare a memorandum summarizing the above tasks and findings.
- If further evaluation determines that the school is eligible for listing on the California Register of Historical Resources, Applied Earthworks’ Architectural Historian will review the site plans to determine whether proposed alterations to the historical resource comply with the Secretary of the Interior’s Standards (SOIS) for the treatment of historic properties. Applied Earthworks will incorporate the results of this evaluation into a letter report.

Task 3 – Notice of Exemption

Terraphase will prepare a draft memorandum including the following elements:

- **Project Overview:** The Project Overview will summarize the Project information, contacts, and applicable Cat-Ex.
- **Project Description:** The Project Description will summarize the purpose and objectives of the Project, the Project elements, access and parking at the Project site, and the anticipated construction schedule.¹

¹ Terraphase assumes that site layout drawings and construction schedule/equipment use will be provided by the project design team.

- **Cat-Ex Analysis:** The analysis will detail how the Project meets the conditions of Class 1, Class 2, and Class 14 Cat-Exs and that the Project does not present any of the exceptions to the Cat-Exs as identified in Section 15300.2 of the CEQA Guidelines. The analysis will be supported by the technical evaluations which will be appended to the NOE package.

Terraphase will prepare the NOE form, with the Cat-Ex Analysis included as an attachment, for District review; Terraphase assumes one round of District comments will be incorporated into the final NOE package. Terraphase will provide the District with a final electronic document which can be provided to the School Board and posted to the District's website.

Following District signature and authorization to file the NOE, Terraphase will file the NOE with the Alameda County Clerk and SCH on behalf of the District. Terraphase will provide the District with a County-stamped copy of the NOE package. Terraphase has included the Alameda County Clerk handling fee in our cost estimate.

Task 4 – Project Management and Meetings

In order to efficiently complete these tasks, regular meetings will be scheduled with District staff and the design team. Our budget assumes a maximum of 10 hours of technical time for meetings and project management. This scope of work assumes that Terraphase will not be asked to participate in public hearings or community workshops.

Terraphase is interested in being considered for this Project. We are prepared to serve the District expeditiously with a local team of highly qualified staff who are committed to helping the District achieve its goals.

3.5.4 CEQA Compliance Pathway IS/MND

If, during Task 1 or Task 2, it becomes apparent a Cat-Ex is not applicable to the Proposed Project, Terraphase will notify the District and provide a brief memorandum detailing the reasoning. Terraphase will then begin development of an IS to confirm if an MND is applicable. If for any reason, it is determined an EIR is required, Terraphase will provide an updated scope and cost.

Task 5A – Administrative Draft Initial Study

If it is determined during Task 1 or 2 that a Cat-Ex does not apply to the Project, Terraphase will instead prepare an IS that meets the legal requirements of a complete, adequate, and objective statement of the Project's environmental consequences. The resulting CEQA document will provide a concise, integrated source of information for the public, District staff, and decision makers. The IS will incorporate the Environmental Analysis conducted in Task 2, in addition to a technical evaluation of Historic Resources, Hydrology, Noise, Air Quality, and Greenhouse Gas Emissions.²

Terraphase will prepare the Administrative Draft version of the IS for the Project that will consider all potentially significant environmental effects from implementation and include mitigation recommendations. For each major issue area included within the IS checklist, the general outline of the CEQA impact analysis will include the Environmental Setting, the Standards of Significance, Answers to the Checklist Questions, Mitigation Measures, and Findings. Terraphase will establish the methodology for the analysis, determine and identify thresholds of significance, identify impacts, and identify feasible mitigation measures or methods to avoid significant impacts. CEQA Checklist issues required to be addressed include:

² This task does not include supplemental technical studies for each of these resource areas; technical evaluation will be discussed in IS text.

- Agriculture and Forestry Resource
- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology, Soils and Seismicity
- Greenhouse Gas Emissions
- Hazardous Materials and Hazards
- Hydrology and Water Quality
- Mineral Resources
- Noise/Vibration
- Population and Housing
- Public Services
- Recreation
- Transportation and Circulation
- Tribal Cultural Resources
- Utilities and Service Systems
- Wildfire

Task 5A-1 (Optional Task – Not included in Base Fee) – Historical Resources Evaluation and Design Review

If warranted based on site features and requested by the District, Terraphase will evaluate whether the Project may cause an impact to a significant historical resource. The scope of work and costs for this review are as described in Optional Task 2A in addition to the preparation of a letter report to evaluate the potential impacts and potential need for an MND. Draft documents will be submitted for review to the OUSD for comment and circulation. Deliverables included within this task are a letter report, cover letter, updates to the CEQA IS incorporating the historical resources evaluation findings, DPR forms, and impact analysis, as well as maps and other necessary documentation.

Task 5B – Draft IS/MND and Notice of Intent (NOI)

Terraphase will incorporate comments from the District on the Administrative Draft IS and prepare the Draft IS for public circulation. Terraphase will prepare a draft NOI to adopt an MND for the Project. It is assumed that the District will distribute the NOI to interested parties, and will post the document on its website. The District will be responsible for the coordination and costs of publishing the NOI in a local newspaper.

Terraphase will prepare a Notice of Completion and file the Draft MND with the SCH to initiate the 30-day public review period. An electronic copy of the Draft MND will be sent to the SCH for distribution. Terraphase will work with the District to set up an SCH registration for Project submittal as in-person deliveries are no longer accepted.

Task 5C – Responses to Comments and Mitigation Monitoring and Reporting Program

Terraphase will compile the public comment letters received on the IS/MND and identify each comment requiring a response. Terraphase will prepare responses to each bracketed comment received during the public review period for the IS/MND. The proposal assumes a minor level of effort will be required to respond to comments, defined as no more than 4 hours, and no revisions to the IS analysis or conclusions will be necessary to address the comments. Once the mitigation has been approved by District staff, Terraphase will prepare a Mitigation Monitoring Reporting Program that will identify the agency with implementing and monitoring responsibility, compliance standards for the implementation of mitigation measures, and the necessary timing of mitigation measures.

Task 5D – File Notice of Determination (NOD)

Terraphase will prepare the NOD to be filed with the SCH following adoption of the Final MND and approval of the Project by the District. The District has five working days to file the NOD and submit payment to the Alameda County Clerk. Terraphase will submit the stamped NOD to the SCH. Payment of fees associated with the filing of the NOD are not within Terraphase's cost estimate.

Task 6 – Project Management and Meetings

Project management and meetings would be conducted as described in Task 4 of the NOE pathway.

4 Litigation History

There are no judgments against Terraphase nor any other evidence of liability of Terraphase during the past 5 years preceding this response to the RFQ/P.

Terraphase's 5-year summary of litigation, arbitration, and negotiated/settled history with previous clients is provided below.

Entity Bringing Suit:	Terraphase Engineering Inc.
Complaint:	Breach of contract
Accusation:	Contract was breached; client did not inform Terraphase of any issues with invoices and failed to pay them.
Outcome:	Dispute was resolved without further litigation.

5 Professional Fees

5.1 Fee

In accordance with the RFQ/P, the proposed fee for the Project is presented as a "Base Fee" consisting of the scope of work for the preparation of the NOE package and an "Alternate Fee" for the preparation of an MND. The cost estimate also includes a 10 percent contingency, subject to District approval.

Based on our experience with similar projects, we understand that out-of-scope tasks may arise due to the need for additional technical studies, changes to the Project Description, etc. Therefore, Terraphase has included a 10 percent contingency in our total budget, which would be authorized by the District's PM if needed for out-of-scope tasks. If additional out-of-scope tasks are identified beyond the 10 percent contingency, an additional proposal would be provided.

This cost estimate and associated rates schedule assumes that work will be completed prior to January 2026.

Subject: LBU Recommendation - Scope Specific - CEQA Services

Greetings Ms. Chatman and Mr. Jang,

As per the Oakland Unified School District's Local Business Policy Program Requirements Section of AR 7115: Prior to the issuance of a formal invitation for bid, the District shall ensure that there are at least three certified businesses listed in the industry, trade or profession that constitutes a major category of work. If at least three L/SL/SLRBEs are not certified, then the requirement may, subject to the discretion of the District, be waived, or the 50% requirement may be reset from 50% all the way to 0%, depending on the particular circumstances at time of bid.

Referenced Scope: CEQA Services

An availability analysis has been conducted for NAICS Code: 541620 (Environmental Consultant Services) with a specialization in CEQA Services, to determine the availability of certified firms to meet local business utilization on projects. Upon review of the City of Oakland, Port of Oakland, and Alameda County certification databases; we conclude that due to the limited number of L/SLBE firms eligible to perform services within the identified scope, a local business waiver is appropriate.

It is recommended that the District waive the entire 50% LBU requirement for the above listed scope.

LBU Recommendation:

Full LBU Waiver ▾

Please note that updated analyses may be completed on an annual basis, as needed. If there are any questions, please feel free to contact our team at any time.

Sincerely,

Tiffany Knuckles
