2026 Extended School Year (ESY)

Special Education

Extended School Year (ESY) 2026

Extended School Year (ESY) services are primarily designed for disabled students with moderate to extensive support needs. These students may experience significant regression in their skills over a long school break and struggle to regain them once classes resume.

Generally, ESY is not intended for students in resource or mild/moderate programs because these students often benefit more from general education summer intervention programs that allow them to continue their learning with general education peers.
